We really don't know how to put into words for what we feel in our hearts. On June 2010 you seven wonderful men risked your own lives & went to Norfolk, Ne so that you could recover our son from the fallen railroad bridge & Elkhorn river. We will be forever greatful to all of you for that.

We know that is your job & this is what you do for a living, but here is what you don't know. Someone was watching from a distance and they said they had never before seen a group of guys be so careful, caring & treat someone with so much respect & dignity as you did with our son.

We know he is smiling down on all of you because that's the way he treated other people, with care & respect.

We are thankful & humbled by your actions & you'll always have a special place in our hearts.

God Bless all of you Wally & Karen
