Finance Department - Communications Center

0361 - Emergency Communication Center/Radio Shop (1) - 07060000361 - 2010/2011 FINAL

Group: (None)

Program: (None)

Description: The growth of the City's boundaries, service population, User Agency staff and a commitment to provide all of public safety and our community with a high level of service makes it necessary to relocate and expand the facilities currently available to the Emergency Communications Center and Radio Shop. Partnership with other city/county agencies or other entities is being actively explored for maximum efficiency and location. Essential components to be considered:

- adequate space for dispatch operations
 - adequate space for management/support operations
 - administrative/classroom space for the Emergency Communications Training Academy
 - technology lab for training simulation for Emergency Communications Training Academy and In-Service Training
 - state of the art technology and connectivity
 - adequate space for technology systems to support radio, telephone, and computer aided dispatch
 - planning for the least disruption of public safety communications
 - coordination with 800 MHz Trunked Radio System upgrade project
 - coordination with back-up facility and technology
 - adequate Emergency Operating Center to support city/county needs
- (SUST CAT 3)

Comp Plan Conformance: Generally Conforms with Plan

0362 - 800 MHz Trunked Radio System Upgrade (1) - 070600000362 - 2010/2011 FINAL

Group: (None)

Program: (None)

Description: The City of Lincoln's 800 Mhz Trunked Radio System was initially installed as a 10 channel, single site system utilizing funding from a 1986 bond issue. In 1996 the citizens of Lincoln approved a bond funding Phase 2 of the Radio System which provided for an upgrade of the existing site equipment, addition of a second site and an increase to 20 channels. The radio system will require a major backbone upgrade consistent with previous upgrades due to various components of the system reaching end of life or no longer being supported. This upgrade must include the replacement of site equipment, dispatch consoles, auxillary site equipment and up to 3,000 mobile and portable readios. An upgrade of this magnitude must be planned and executed carefully to cause the least disruption of service possible for public safety as well as other users of the system. This project must be linked with the Emergency Communications Center/Radio Shop Project (#070600000361) which is part of the proposed Public Safety Bond Issue.

0364 - Communications Command Post (1) - 070600000364 - 2010/2011 FINAL

Group: (None)

Program: (None)

Description: The Lincoln Emergency Communications Center provides communications support for radio for the City's 800 Mhz trunked radio system as well as various other frequencies and communications systems utilized by area Public Safety User agencies. The Emergency Communications Incident Dispatch Team and Radio Shop provide vital support for User agencies for routine incidents as well as major events and incidents. To provide this support in the field the Center requires a Communications Command Post vehicle for staff and infrastructure support in the field.
