Subject 'J' Street - Lincoln High Roundabout to 16th St- Street Trees

Lynn:

The following is a summary of the existing street trees on 'J' Street-
30 Existing Red Oaks approx. 20" diameter; good condition; trimmed 2 years ago
1 existing Ash 25" diameter
2 existing Red Maples 5" diameter

27 open planting spaces for street trees between curb and sidewalk.
Possible tree species(see below). Diversity in species planted should be emphasized.
Autumnspire Red Maple and Frontier Elm would be compact and upright. Hophornbeam also.

Subject Front of Kaplan U on 'K' Street 

Lynn:

The front of Kaplan U faces 'K' Street. 'K' is 3 lanes and therefore has wide ROW. Scale of street tree species in relation to street would be large type (Elm, Oak, Zelkova, etc.) Height of these species would be 50+ feet at maturity. Since 'K' is a one way street going east, I would think there would not be a concern about the height of these types of trees in relation to the view of the state capitol.

Linear street frontage on 'K' Street is approx 700'. If street trees were planted at 40' to 45' apart, 16 street trees could be planted.

Recommended species are below (see attached). Accolade Elm, Valley Forge Elm, State Street Maple or Fall Fiesta Sugar Maple (especially if it can be planted back of walk) would be choices.
