

DIRECTORIAL ORDER NO. 33661

Originating Department:

LTU TRANSIT

BY VIRTUE OF THE AUTHORITY VESTED IN ME BY THE MAYOR OF THE CITY OF LINCOLN, NEBRASKA AS SET FORTH IN ADMINISTRATIVE REGULATION NO. 26:

I hereby execute and approve on behalf of the City of Lincoln the attached **Agreement**, which involves the following information:

Name of	Federal Transit Administration
Contractor(s)	
Duration	1/1/2025 to 12/31/2025
Amount	No Financial Consideration
Purpose of Agreement	The StarTran Public Transportation Agency Safety is an annual update based on requirements set forth by the Federal Transit Administration. This plan is required to be signed by the LTU Director.
Funding Source	

Dated this 16th day of December, 2024.

Approved as to Form & Legality:

City Attorney's Office

Approved:

Transportation and Utilities

Department

Lincoln, NE StarTran

Public Transportation Agency Safety Plan - Annual Update

September, 2024

Accountable Executive: Carla Cosier

Introduction

Document Organization

StarTran is committed to providing a safe work environment for employees and visitors and a safe operating environment for customers and travelers throughout Lincoln who interact with StarTran. To ensure the plan complies with 40 U.S.C 5329 and 40 Code of Federal Regulations (CFR) 673, sections following this introduction adhere to the sample structure provided by the Federal Transit Administration (FTA) in *Public Transportation Agency Safety Plan Template for Bus Transit* (December 31, 2019).

This plan complements the StarTran System Security and Emergency Preparedness Plan (SSEPP). The current SSEPP (2016) overlaps in many of the topic areas identified through the federal guidance to be addressed in the ASP. Thus, to reduce duplication of effort in future updates and use application of actions from the plans, StarTran has reviewed each of the planning and operations documents addressing safety and has documented the primary source for information and direction. The ASP addresses hazards that arise during day-to-day operations, while the SSEPP addresses the agency's response to external threats, such as extreme weather and intentional attacks. A third plan, the Transit Development Plan, contains up-to-date information about the size, service schedule, and other characteristics of the StarTran system. Table 1 provides a quick guide to the contents of each document.

Plan Development

This plan represents an annual update to the 2023 StarTran Agency Safety Plan (ASP).

Beginning in Fall of 2019 StarTran and the Nebraska Department of Transportation (NDOT) drafted the StarTran Agency Safety Plan (ASP), with the assistance of SRF Consulting Group, Inc. During this process, a series of four workshops provided

opportunities for input and collaboration by StarTran and other Lincoln staff. Participants included key StarTran staff.

Topics covered in each workshop are provided below:

- Workshop 1 introduced the Public Transportation Agency Safety Plan (PTASP) and Safety Management Systems (SMS) process, identified the roles and responsibilities of the Accountable Executive and the Chief Safety Officer, and included a discussion on the desired deliverables.
- Workshop 2 covered the current safety practices at StarTran and the revisions necessary to move towards a SMS approach, established the safety culture, set seven safety performance targets, introduced the hazard risk matrix, and identified hazards staff encountered over the past five years.
- Workshop 3 focused on risk management through assigning hazards to the hazard risk matrix. This workshop assessed the likelihood and severity of identified hazards and discussed concepts for mitigation for the hazards. By running through examples encountered over the past five years, personnel gained practice at identifying and mitigating hazards in the future.
- Workshop 4 synthesized the input received during the first three workshops by presenting the draft safety plan for comments and revisions.

Outcomes from the workshops are reflected throughout the plan in call-out boxes. This plan is a "living document," tested and reaffirmed through daily executed processes and with annual reporting and updates to the plan to be recorded as revisions.

About StarTran

Information outlining StarTran operations and organization is provided in the Lincoln Transit Development Plan (August 2023). StarTran directly operates both fixed route bus service and paratransit demand response bus service. Both modes are covered in this Agency Safety Plan. StarTran employs approximately 145 staff members, with a majority in safety-sensitive positions.

The StarTran ASP and Safety Management Systems

Moving Ahead for Progress in the 21st Century (MAP-21) granted the FTA the authority to establish and enforce a comprehensive framework to oversee the safety of public transportation throughout the United States. It provided an opportunity for FTA to assist transit agencies in moving towards a more holistic, performance-based approach known as the Safety Management System (SMS).

Figure 1. SMS Elements

SMS is a formal, top-down, organization-wide approach to managing safety risk and assuring the effectiveness of a transit agency's safety risk mitigation. It includes systematic procedures, practices, and policies for managing risks and hazards, and consists of four primary elements:

- Safety Management Policy: A transit agency's documented commitment to safety, which defines the transit agency's safety objectives and the accountabilities and responsibilities of its employees regarding safe practices.
- **Safety Risk Management**: A process within a transit agency's Agency Safety Plan for identifying hazards and analyzing, assessing, and mitigating safety risk.
- **Safety Assurance:** A process within a transit agency's Safety Management System that functions to ensure the implementation and effectiveness of safety risk mitigation, and to ensure that the transit agency meets or exceeds its safety objectives through the collection, analysis, and assessment of information.
- Safety Promotion: A combination of training and communication of safety information to support SMS as applied to the transit agency's public transportation system.

Existing StarTran Policy & Protocol

StarTran has other plans and policies that complement the ASP by elaborating on detailed aspects of day-to-day operations. They include but are not limited to the following plans:

- StarTran Maintenance Plan (August 2023)
- Drug and Alcohol Testing Program and Policy (August 2018)
- Bus Passenger Behavior Policy

COVID-19 Response

The COVID-19 Pandemic has impacted StarTran operations in several ways. In response to these challenges StarTran has made several changes to ensure the safety of bus passengers and employees:

- Free fare beginning April 2019
- Mask mandate for bus riding passengers. Free face mask for all customers
- An electrostatic sprayer is used to sanitize buses every evening.
- Driver barriers installed on all fixed route buses.
- Face masks, disposable gloves and hand sanitizer are provided to all employees.
- Hand sanitizer dispensers installed on new fixed route buses.

At the declared end of the pandemic, fares were reinstated, the mask mandate for passengers was canceled, driver barriers were removed, and daily electrostatic cleaning was discontinued. PPE is still available should drivers choose to avail themselves of it, and hand sanitizer dispensers remain on the buses.

1. Transit Agency Information

Table 2 provides an overview of StarTran's contact persons and other information of immediate relevance to the FTA.

Table 2: Transit Agency Information

Transit Agency Name	Lincoln StarTran
Transit Agency Address	710 J St, Lincoln, NE 68508
Name and Title of Accountable Executive	Carla Cosier, Asst Director of Transit, Lincoln Transportation & Utilities
Name of Chief Safety Officer or SMS Executive	Colin Clark, Safety & Training Specialist
Modes of Service Covered by This Plan	Motor Bus (Fixed Route) and Demand Response (Paratransit)
All FTA Funding Types	5303, 5307, 5337, and 5339
Modes of Service Directly Provided by the Transit Agency	Motor Bus (Fixed Route) and Demand Response (Paratransit)
Does the agency provide transit services on behalf of another transit agency or entity?	No
Description of Arrangement(s)	N/A
Name and Address of Transit Agency(ies) or Entity(ies) for Which Service is Provided	N/A

2. Plan Development, Approval, and Updates

The Agency Safety Plan for StarTran is a "living document." As major revisions occur, the entire plan will be reproduced and distributed. For minor revisions, only the affected pages will be issued. Upon reception, previous revisions of the document shall be destroyed. Table 3 documents the most recent approvals of this plan, and Table 4 records the complete history of successive versions.

Annual Review and Update of the Agency Safety Plan

The StarTran ASP, including the Safety Management Policy Statement, is reviewed annually (fall of each year) to ensure it remains relevant and appropriate to the agency's safety objectives and safety performance targets, per § 673.11(a)(5). Following review and updating as warranted, the plan is approved by the Lincoln Transportation and Utilities Director and the Nebraska Department of Transportation (NDOT) Transit Manager.

As a component of the annual ASP review process completed in fall of each calendar year, StarTran will communicate updated safety performance indicators to the NDOT and the Lincoln Metropolitan Planning Organization (MPO), to aid in their planning processes. In coordination with the State and MPO, StarTran may adjust its safety performance targets or develop new safety performance measurement areas for tracking and monitoring by the agency.

Updates to the ASP are recorded in the Version Number and Updates, including a version history. All documentation shall be retained for a minimum of three years.

3. Safety Performance Targets

Clearly defined safety goals, objectives, and targets are key elements of StarTran's policy and strategic planning. Goals are general descriptions of desirable long-term impacts, while objectives are more specific statements that define measurable results. StarTran has established high-level goals and objectives that guide safety activities at the agency (Table 5).

Table 5: StarTran Safety Goals and Objectives

Goal 1: StarTran will create a culture that supports employee safety and security and safe system operation (during normal and emergency conditions) through motivated compliance, rules and procedures, the appropriate use and operation of equipment, and an active safety promoting role for everyone in the organization

Objectives

Actively participate in the City-Wide Safety Committee

Establish regular transit safety meetings to address training needs, review events and near misses, and to develop safety awareness activities and programs

Enhance safety input and feedback processes, including creating a more rotund employee reporting program

Increase employee safety training opportunities

Goal 2: StarTran encourages safe system operation through identifying hazards, mitigating risk, and reducing occurrences

Objectives

Implement and maintain a hazard identification and risk assessment program, and based on the results of this program, establish a course of action for improving safety and reducing hazards

Achieve a level of safety performance that meets or exceeds the agency's established performance targets

Where it is appropriate and feasible, StarTran assigns numerical metrics and target values to its safety performance. This ASP specifies seven performance targets for each service mode the agency operates, based on the safety performance measures established under the National Public Transportation Safety Plan. They are:

- Fatalities: Total number of reportable fatalities and rate per 100,000 vehicle revenue miles
- Injuries: Total number of reportable injuries and rate per 100,000 vehicle revenue miles

- Safety Events: Total number of reportable events and rate per 100,000 vehicle revenue miles (event, as defined in § 673.5)
- System Reliability: Mean (or average) revenue miles of service between major mechanical failures

Through discussion in Workshop 2, the target for each performance measure was established as a trend rather than a specific numeric value. Across each measure, the target is to demonstrate an incremental improvement over an established baseline calculated from a recent five-year experience in each category. Current baselines were set as the averages of the performance measures from 2020 to 2023. StarTran will seek annual improvements over this baseline from 2023 through 2027, when a new five-year baseline will be set. If the average was already at zero, the target will remain zero. The targets for each mode are shown in Table 6 and Table 7. In a plan such as the ASP, it is critical to demonstrate a connection between the

performance measures and system goals. Thus, which of the safety goals each performance measures supports by mode is included in the tables.

Table 6: Fixed Route Safety Performance Baseline and Targets - 2020 - 2023

		FY 2020- 2023			Target Met (Y/N)
Safety Performan	ce Category	Baseline	Target	FY 2024 Value	
	Total	0.25	0	0	Υ
Fatalities	Rate per 100,000 VRM	0.00	0	0	Y
Injuries	Total	0.75	Reduction from baseline	8	N
(Minor/Major)	Rate per 100,000 VRM	0.00	Reduction from baseline	0.44	N
Safety Events	Total	0.50	Reduction from baseline	4	N
(Minor/Major)	Rate per 100,000 VRM	0.00	Reduction from baseline	0.22	N
System Reliability (Minor/Major)	Rate per 100,000 VRM	3,829	Increase from baseline	5,682	Y

Table 7: Paratransit Safety Performance Targets - 2020 - 2023

Safety Performance Category		FY 2020- 2023 Baseline	Target	FY 2023 Value	Target Met (Y/N)
	Total	0.00	0	0.00	Υ
Fatalities	Rate per 100,000 VRM	0.00	0	0.00	Y
Injuries	Total	0.50	Reduction from baseline	3.00	N
(Minor/Major)	Rate per 100,000 VRM	0.00	Reduction from baseline	0.43	N
Cofety France	Total	0.25	0	0.00	Υ
Safety Events (Minor/Major)	Rate per 100,000 VRM	0.00	0	0.00	Y
System Reliability (Minor/Major)	Rate per 100,000 VRM	21,396	Increase from baseline	17,260	N

Major and Minor Events

In describing these categories, the definitions for "major" and "minor" from the National Transit Database (NTD) are as follows:

Reportable Event (Major):

A safety event occurring on transit right-of-way or infrastructure, at a transit revenue facility, or at a transit maintenance facility during a transit-related maintenance activity or involving a transit revenue vehicle that results in one or more of the following conditions:

- o A fatality confirmed within 30 days of the event.
- An injury requiring immediate medical attention away from the scene for one or more person.
- o Property damage equal to or exceeding \$25,000.
- o Collisions involving transit revenue vehicles that require towing away from the scene for a transit roadway vehicle or other non-transit roadway vehicle.
- o An evacuation for life safety reasons

- Non-Major Summary Incident/Event (Minor) are less severe incidents or events that do not meet the requirements of Reportable Events:
 - o Other safety occurrences not otherwise classified (injuries); and
 - o Fires
- Major mechanical system failures, as defined by the NTD, are those that limit actual vehicle movement or create safety issues. This includes but is not limited to failures involving:
 - Brakes
 - Doors
 - Engine cooling systems
 - o Steering, axles, and suspension
- failures of some other mechanical element of the revenue vehicle not caused by a collision, natural disaster, or vandalism, but that, because of local agency policy, prevent the revenue vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip even though the vehicle is physically able to continue in revenue service. They include but are not limited to issues involving:
 - Fareboxes
 - Wheelchair lifts
 - Heating, ventilation, and air conditioning systems

ESTABLISHING A BASELINE

Introduced in Workshop 1, the process to establish the seven safety targets involved a discussion on what is measurable and what is achievable. The workshop participants considered multiple approaches to set the targets, including the five-year average for StarTran, the averages among its peers from the last TDP, and targets established in completed safety plans from across the county. Using internal safety numbers would

Safety Performance Target Coordination

StarTran provides up-to-date editions of this plan, including safety performance targets, to the Lincoln MPO and the NDOT, in accordance with § 673.15(a) and § 673.15(b). The most recent dates of transmission are shown in Table 8.

Table 8: Safety Performance Target Coordination

Targets Transmitted to the	State Entity Name	Date Targets Transmitted	
State	Nebraska Department of Transportation	12/16/2022	
•			
Targets Transmitted to the MPO	MPO Name	Date Targets Transmitted	

4. Safety Management Policy

Safety Management Policy Statement

StarTran prioritizes safety as the positive effects influence every aspect of service. Identifying and addressing potential threats and hazards can save lives, reduce injuries, improve service and help manage costs.

StarTran uses the Safety Management Systems (SMS) framework to make informed decisions appropriate for operations, passengers, employees and how we interact with the community. As an agency we are committed to the following objectives:

- Actively participate in the City-Wide Safety Committee (additional information regarding the Committee is included in Chapter 5 and Chapter 6)
- Establish regular transit safety meetings to address training needs, review events, and to develop safety awareness activities and programs
- Enhance safety input and feedback processes
- Increase employee safety training opportunities
- Implement and maintain a hazard identification and risk assessment program, and based on the results of this program, establish a course of action for improving safety and reducing hazards
- Achieve a level of safety performance that meets or exceeds the agency's established performance targets

Promoting a non-punitive safety culture is a critical element of the SMS framework. StarTran management is fully committed to ensuring that the employee safety reporting processes established within this plan allow all employees to report safety hazards to senior management without concern of retribution. Except in the instance of willful safety rule violations as defined in the employee handbook, StarTran employees reporting safety hazards shall not be subject to disciplinary action.

Accountable Executive	Date

Safety Management Policy Communication

Per § 673.23(c) and § 673.29(b), StarTran communicates its safety management policy within the organization in three ways. 1) All personnel receive the Rules and Regulations handbook that includes the safety policy statement. 2) Staff can access the complete ASP digitally and in hard copy at the StarTran main office. 3) During orientation new employees are introduced to agency safety programs.

Safety Committee

StarTran has an internal Safety Committee comprised of equal representation from management and front-line staff. The StarTran Safety Committee was created because of the Bipartisan Infrastructure Law passed in 2022 and updated by publication of the Federal Transit Administration's final rule changes to 49CFR 673 on April 11, 2024. The purpose of this committee is to provide front-line workers with more input into safety decision-making. The Rules and Procedures for this committee can be found in Appendix A.

Authorities, Accountabilities, and Responsibilities

The Assistant Director of Transit, Lincoln Transportation & Utilities serves as the agency's **Accountable Executive** and has the authority to develop and execute the StarTran ASP. The Assistant Director is accountable for the agency's safety and the maintenance of the SMS program.

StarTran has a **Safety and Training Specialist**. The Safety and Training Specialist will serve as StarTran's **SMS Executive/Chief Safety Officer** responsible for day-to-day implementation and management of the ASP and the SMS process. This position will report directly to the Assistant Director of Transit, Lincoln Transportation & Utilities, and they will meet regularly to discuss the agency's safety performance and advancement of the SMS within StarTran, in accordance with § 673.23(d)(2). In order to work effectively and maintain consistent lines of communication, the Safety and Training Specialist may convene a standing Safety Committee with executive managers and department representatives.

Other senior staff at StarTran hold important roles in ASP development, implementation, and management. Table 9 gives an overview of these roles and responsibilities.

Safety Reporting-Response Opportunities

StarTran is committed to providing a safe work environment for employees and visitors and for responsible operations throughout Lincoln. Thus, it is imperative that StarTran employees and stakeholders have convenient and available means to report incidents and occurrences which may compromise the safe conduct of StarTran operations. StarTran encourages employees, customers and community stakeholders to report activities/conditions that may affect the integrity of transit safety. Such communication must be completely free of any form of reprisal, per § 673.23(b) and § 673.23(c).

StarTran's Rules and Regulations handbook, as well as the Bus Operator's Manual, outline the reporting methods available to employees. StarTran will not take disciplinary action against any employee who discloses an incident or occurrence involving transit safety. This policy shall not apply to information received by StarTran from a source other than the employee, or which involves an illegal act, or a deliberate or willful disregard of StarTran regulations or procedures.

The Safety and Training Specialist will be responsible for reviewing reported events and addressing events consistent with the Safety Risk Management process. The reporting and response process encompasses three phases in addressing events. Each phase is outlined below:

- Detection and reporting. StarTran provides a range of methods for employees, customers and/or others to report incidents/events covered in the safety program, including:
 - Employees: StarTran has developed an incident/event/condition reporting form through which employees can report an event that has occurred or a

- condition of concern that could result in a safety event. Employees are required to report accidents that involve operations, maintenance, vehicles, and/or injuries to employees.
- O Customers: Operators are instructed to contact the Operations or Maintenance Supervisors in the event of a customer reported incident/event. Reporting to the Operations or Maintenance Supervisors initiates the incident/event review process. Additionally, the StarTran webpage provides information on how to contact StarTran to report an incident or to provide comment on service. Input from customers relative to safety incidents/concerns is directed to the Safety and Training Specialist.
- Stakeholders: Persons StarTran comes in contact with through operations or a visit to any StarTran facility can report incidents to the customer service representative or through the StarTran website. The Safety and Training Specialist will be responsible for creating displays of how stakeholders can provide their input.
- Response. StarTran is committed to open communication regarding employee, customer, and stakeholder safety. Presently, there is not a formal program for wide dissemination of the outcome and/or actions with safety hazards or events reported through the range of means available. The Safety and Training Specialist's responsibilities will include establishing a range of digital, print and verbal methods through which actions taken to address hazards or events reported to StarTran are communicated internally and externally.

If the reporting employee provided their name during the reporting process, the Safety and Training Specialist ensures that they learn of any actions taken in response to their report. The identity of the reporting employee is protected to the extent permissible by law when Star Tran collects, records, or disseminates information obtained from transit safety reports.

City-Wide Safety Committee

Since 2008, the City-Wide Safety Committee has been addressing safety and health across each department of the city. The committee is composed of 15 members, with representatives from each of the six bargaining groups active in Lincoln. StarTran is represented on this committee by a member of the Amalgamated Transit Union (ATU) that represents drivers/operators and maintenance staff and the Safety and Training Specialist. ATU representation to the Committee is from the driver/operator ranks and serves a one or two-year term.

The charge of the committee is consistent with the supporting the goal of the SMS including:

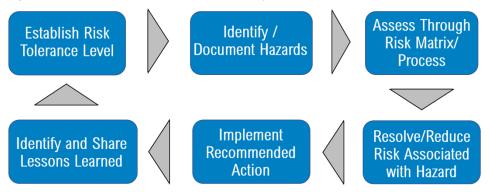

- Adopt and maintain an effective written injury prevention program.
- Promote safety at the agency.
- Make recommendations for addressing safety and health at worksites throughout the city.
- Assist in the investigation of unsafe practices or conditions which are brought to the attention of the committee and address the concerns brought to the committee.
- Review accident/injury reports and records and, if appropriate, make recommendations regarding methods to prevent a repeated occurrence in the future.

StarTran will provide the Committee with annual updates to the ASP following recertification.

5. Safety Risk Management

The Safety Risk Management process applies to all elements of the system, including operations and maintenance (facilities and vehicles) and administration. StarTran's risk management process begins with hazard identification, both internal and external to the StarTran facility. StarTran's approach focuses on prevention and/or control of hazards in a systematic manner to reduce the risk of identified hazards to the lowest practical level through effective use of resources. The hazard analysis process includes a feedback loop that re-incorporates lessons learned (Figure 1) through earlier assessments.

Figure 1. Hazard Assessment Feedback Loop

In carrying out the Safety Risk Management process, StarTran uses the following terms:

- Event Any accident, incident, or occurrence
- Hazard Means any real or potential condition that can cause injury, illness, or death; damage to or loss of the facilities, equipment, rolling stock, or infrastructure of a public transportation system; or damage to the environment
- Risk Composite of predicted severity and likelihood of the potential effect of a hazard.
- Risk Mitigation Method(s) to eliminate or reduce the effects of hazards
- Consequence Means the potential outcome(s) of a hazard

Hazard Identification

StarTran has established formal requirements for proactive identification of hazards, per § 673.25(b). The primary methods used to identify hazards and threats to the transit system are input submitted to drivers or to customer service by riders or interested stakeholder and incident reports by employees. Copies of the StarTran customer complaint form and incident report are on file and can be produced for review.

Employees are encouraged to report near-miss incidents, known as precursors. These incidents are more numerous than accidents and including them in the process can help identify effective mitigation and avoid more serious events.

Potential sources regularly reviewed for hazard information include, but are not limited to, the following:

Table 10: Hazard Identification Sources

Hazard Information Source	Responsibility	Review Frequency
Markout list	Maintenance/Operations Superintendents	Daily
Dispatcher daily log	Operations Superintendent	Daily
Maintenance shift reports	Maintenance Superintendent	Daily
Facility inspection or walk around reports	Maintenance Supervisor, Safety & Training Specialist	Weekly
Statistical reports / historical data	Operations Superintendent, Safety & Training Specialist	Annually
Safety Assessment and System Review	Safety & Training Specialist	Annually
Facility Safety and Security Assessment	Maintenance Superintendent, Safety & Training Specialist	Annually
Internal and external audits and inspections (including FTA and NDOT audits and inspections)	Director, Safety & Training Specialist	As needed
Passenger/public customer service reports	Safety & Training Specialist	As needed
Incident/accident reports	Operations Superintendent	As needed
Information from public safety officials, local governments, and other major StarTran stakeholders	Asst Director of Transit, Safety & Training Specialist	As needed
City of Lincoln Risk Management Division	Safety & Training Specialist	As needed
Employee safety reports to supervisors or management	All	As needed

StarTran senior management, including the Assistant Director of Transit and department heads are directly involved in hazard review and documentation. Initial hazard reports are provided to senior management through reports from Dispatch and discussion with supervisory personnel.

Risk Assessment

With implementation of the initial ASP in 2020, StarTran is committed to conducting a formal analysis and evaluation process of reported hazards to ensure they are addressed. The steps StarTran employs to assess risk are outlined in the bullet points below and are recorded in Table 11:

- Step 1: Document the Risk or Event. Sources of risks or events addressed through the assessment process include complaints received from customers/visitors/stakeholders, incident reports submitted by employees, and observations recorded by employees and submitted to the Safety and Training Specialist or to a supervisor.
- Step 2: Characterize the risk. Consistent with the FTA Sample Safety Risk Assessment Matrices for Bus Transit Agencies (September 2019), StarTran identifies the likelihood and potential severity of consequences associated with each identified risk or event. StarTran employs a "worst credible consequences" definition to characterization of risks, meaning the outcome is realistic and imaginable in day-to-day operations, but is not the worst possible consequence. Definitions applied in the process are provided in the next section.
- Step 3: Describe the current actions to reduce risk. StarTran employs a range of practices promoted to employees through pre-employment training in their profession, on-going safe operating and/or practices training, distributing operating and maintenance manuals, etc. Applicable actions currently being deployed are documented in the risk assessment process.
- Step 4: Assess current practices. Understanding new or modified methods for safe operations and maintenance practice are continuously being developed,
 StarTran acknowledges the need to periodically assess current practices and

safety events to determine the need to revise promoted practices. Through regular application and documentation of the Risk Assessment process, StarTran staff included in risk evaluation workshops consider and discuss other actions to better address observed or anticipated events.

To assess the risk level of a given hazard, experienced personnel at StarTran use a standardized tool, the Risk Assessment Matrix. Results of the risk assessment process will help determine whether the risk is being appropriately managed or controlled. If the risk is acceptable, the hazard will simply need monitoring. If the risk is unacceptable, StarTran will take steps aimed at lowering risk to an acceptable level, or to remove or avoid the hazard.

The Safety & Training Specialist (Chief Safety Officer) will be responsible for coordinating the risk assessment process, consulting with senior management, supervisors, external subject matter experts, and federal and state bodies as necessary. The goal is to consider all human factors, environmental factors, supervision elements, and organizational elements.

The StarTran senior management team, including the Assistant Director of Transit and Chief Safety Officer, is directly involved in the review of all hazards, with the exception of those that have been immediately mitigated by frontline employees or minor disciplinary actions in response to rule violations not constituting systematic, widespread issues.

The Safety & Training Specialist will also be responsible for:

- Developing strategies to minimize the exposure of the public, personnel, and property to hazards and unsafe conditions, and consistent with guidelines of the Centers for Disease Control and Prevention or a State health authority, minimize exposure to infectious diseases.
- Developing a risk reduction program for transit operations to improve safety by reducing the number and rates of accidents, injuries, and assaults on transit workers based on data submitted to the national transit database

Table 11: Hazard Identification and Risk Assessment Log

	R	isk Lev	el			
Risk Description	Risk Likelihood	Risk Rating Severity	Hazard Risk Index	Current Measures to Reduce Risk	Further Action Required to Reduce Risk	Staff Responsibility

Rating System

To organize and prioritize identified hazards, StarTran defines severity according to the following scale:

- Catastrophic I: Conditions are such that human error, environment, design deficiencies, element, subsystem or component failure, or procedural deficiencies may commonly cause death or major system loss and require immediate termination of the unsafe activity or operation.
- Critical II: Conditions are such that human error, environment, design
 deficiencies, element, subsystem or component failure or procedural deficiencies
 may commonly cause severe injury or illness or major system damage and
 require immediate corrective action.
- Marginal III: Conditions may commonly cause minor injury or illness or minor systems damage such that human error, environment, design deficiencies, subsystem or component failure or procedural deficiencies can be counteracted or controlled without severe injury, illness or major system damage.

 Negligible – IV: Conditions are such that personnel error, environment, design deficiencies, subsystem or component failure or procedural deficiencies will result in no, or less than minor, illness, injury or system damage.

StarTran and Omaha Metro have reviewed the generalized definitions of probability of an event occurring and have refined the operating hours between occurrences to reflect local conditions. Listed below are the StarTran probability of occurrence definitions:

- Frequent A: Continuously experienced; mean time between events (MTBE) is less than 3,000 operating hours.
- Probable B: Will occur frequently; MTBE is between 3,000 and 100,000 operating hours.
- Occasional C: Will occur several times; MTBE is between 100,000 and one million operating hours.
- Remote D: Unlikely but can reasonably be expected to occur; MTBE between one and 10 million operating hours.
- Improbable E: So unlikely, it can be assumed occurrence may not be experienced; more than 10 million operating hours between events.

StarTran determines the overall risk presented by each hazard using a composite measurement of the hazard severity and probability according to the risk assessment matrix shown in Table 12. The matrix is broken down into the categories of High, Moderate, and Low. This standardized hazard analysis matrix helps staff to focus first on the most serious safety hazards requiring resolution. Hazards identified as "High" will require StarTran to further evaluate the potential consequence/condition and identify a mitigation strategy. A "Moderate" rating in the matrix indicates that countermeasures should be implemented, within fiscal constraints of the agency. A "Low" rating means that StarTran may accept the risk without providing any countermeasures.

Table 12: Risk Assessment Matrix

Francisco	Hazard Categories					
Frequency of Occurrence	A Catastrophic	B Critical	C Marginal	D Negligible		
(1) Frequent	1A	1B	1C	1D		
(2) Probable	2A	2B	2C	2D		
(3) Occasional	3A	3B	3C	3D		
(4) Remote	4A	4B	4C	4D		
(5) Improbable	5A	5B	₅ C	5D		

Hazard Risk Index	Risk Decision Criteria			
1A, 1B, 1C, 2A, 2B, 3A	High (H)	Hazard must be mitigated.		
1D, 2C, 2D, 3B, 3C, 4A, 4B, 5A	Medium (M)	Hazard should be mitigated if possible within fiscal constraints.		
3D, 4C, 4D, 5B, 5C, 5D	Low (L)	Hazard is acceptable with review by management.		

Once a hazard analysis is performed to define its potential severity and probability of occurrence, the project team must work to address, or resolve, such hazards. Hazard resolution is defined as the analysis and subsequent actions taken to reduce to the lowest level practical the risk associated with an identified hazard.

Risk Mitigation

If the assessment process indicates a need for mitigation, then StarTran executive, operations, and maintenance management develop corrective actions in consultation with frontline personnel and subject matter experts as necessary.

Hazard Tracking and Recordkeeping

The Safety & Training Specialist will be tasked with maintaining a record of current and past risk assessment reviews using the Hazard Identification and Risk Assessment Log. This document serves as a unified repository for data and information related to the proactive and reactive identification of hazards, as well as the results of the StarTran hazard analysis process and any corrective actions developed under the safety risk mitigation process.

Mitigation Actions

Mitigation can take a wide variety of forms, some of them standard and some creative. Actions fall into the following categories:

- Physical Defenses: These include objects and technologies that are engineered to discourage, or warn against, or prevent inappropriate action or mitigate the consequences of events (e.g. traffic control devices, fences, safety restraining systems, transit controls/signals, transit monitoring systems, etc.).
- Administrative Defenses: These include procedures and practices that mitigate the likelihood of accident/incident (e.g., safety regulations, standard operating

procedures, personnel proficiency, supervision inspection, training, etc.).

 Behavioral Defenses: These include behavioral interventions through education and public awareness campaigns aimed at reducing risky and reckless behavior of motorists, passengers and pedestrians – factors outside the control of the agency.

Risk Reduction Plan

StarTran's Risk Reduction Plan has two major sections: Training and Communication. Through proper training

TRAINING QUALITY CONTROL

During Workshop 3, participants discussed the safety event in which bus drivers pull out from a stop too quickly, causing passengers to fall.

They rated it as 3C – marginal and occasional – because injuries are usually minor. Drivers are currently trained to wait until passengers are stable, but sometimes they are running late and feeling rushed. The group suggested several possible administrative defenses: bringing in recurring training, including questions

and continuing communication, we reduce risk and work toward our goals to improve safety.

Training

Through thorough training and preparation, protection of StarTran personnel and physical assets is maximized. The following annual training courses are conferred upon operators and maintenance personnel:

- Distracted Driver Training addresses mental, visual, and manual distractions and how to avoid them
- LLLC Defensive Driving describes techniques to operate safely and defensively and communicate effectively with other motorists
- Drug Free Workplace Policy Review outlines policies and procedures for maintaining a drug free workplace and what to look for to help prevent dangerous situations
- Conflict Resolution/De-escalation Training addresses passenger interaction techniques for upset or hostile individual and the basics of Verbal Judo
- **Fire Extinguisher Training** explains the benefits and limitations of fire extinguishers and gives instructions and practical experience on use.
- Blood Borne Pathogens addresses policies and procedures on dealing with blood and bodily fluid spills, personal protective equipment usage and clean-up and disposal of potentially infected material.

These topics are reviewed annually at Safety and Training meetings. Additional trainings such as Active Shooter/Killer, Recognizing and Preventing Human Trafficking, Paratransit Techniques and Communication, Preventing Harassment and Discrimination, Weather Spotting and others are offered periodically.

Communication

Risk reduction information is communicated through a variety of means.

- Immediate information is communicated through a two-way radio system. This
 includes passenger alerts, accident information and hazards communication.
- All employees receive email communication through their city email address.
 Safety information, bulletins and training opportunities are posted by the city regularly.
- Memorandums and notices are posted in the driver's ready room.

- A weekly newsletter is published with pertinent information, including safety advisories.
- A monthly Accident Review Board is convened. Consisting of representatives of labor, management, and the Lincoln Police Department, all accident reports are reviewed, preventable/non-preventable status is determined, and retraining is assigned as appropriate.
- Monthly incident reports are examined by the CSO and Superintendent of Operations.
- The Accident/Incident Dashboard is shared with the Safety Committee at the monthly meeting.
- Bi-annual, one-on-one meetings are conducted by StarTran leadership with each staff member, giving the staff an opportunity to voice concerns, make suggestions, and have a dialog with senior leadership.

Risk Reduction Goals

Toward the goal of a decrease in risk opportunities, StarTran has set Risk Reduction goals to improve overall safety.

Star Tran's annual Risk Reduction Goals per 100,000 revenue miles are listed below.

Assaults:	0.00	Per 100,000 revenue miles
Fatalities:	0.00	Per 100,000 revenue miles
Injuries:	0.10	Per 100,000 revenue miles
Safety Event:	0.10	Per 100,000 revenue miles

Documentation and Reporting

StarTran will incorporate the risk assessments completed within the period between ASP re-certifications. An updated risk matrix will be incorporated into the recertified document.

StarTran will provide updated re-certified versions of the ASP to the City-Wide Safety Committee for their information.

6. Safety Assurance

Safety assurance processes clarify how safety performance is evaluated and how lessons learned will inform and improve the organizational culture. They provide the necessary feedback to ensure that the SMS is functioning effectively and that StarTran is meeting or exceeding its safety objectives.

Compliance Monitoring

Supervisors within the operations and maintenance functions directly monitor compliance with safety procedures. For example, facility walkarounds include an inspection of shop areas, parts storage, the maintenance facility bus wash, and vehicle storage to evaluate safety rules compliance and shop safety practices. Operators complete pre-service and post-service vehicle checks daily, reporting concerns to the Maintenance Supervisor for action. Operations personnel are observed on periodic ride-alongs.

If a supervisor or other employee observes questionable actions that reasonably could lead to a potential hazard, they are encouraged to report the condition and it will be tracked and addressed through the mechanisms described in Chapter 5, Safety Risk Management.

Mitigation Monitoring

During the annual ASP review and update, StarTran executive managers will review records produced during Safety Risk Management activities and discuss the results of the program over the year to evaluate the effectiveness of the agency's Safety Risk Management process. This review process will extend to available safety risk evaluation records, hazard identification and analysis practices, the corrective action plan process, and reviews of the Hazard Identification and Risk Assessment Log.

Investigations

Safety events are investigated either formally or informally to identify causal factors. A five-member accident review board appointed by the Assistant Director of Transit and Union President meets once a month to review any vehicle accidents involving union employees. The board uses the accident report and any employee statements to determine whether the accident was preventable and what safety recommendations it may yield. The Assistant Transit Manager reviews the board's findings and may ask for reconsideration at the next meeting.

Internal Reporting

Many of the hazards reported to StarTran management arrive via internal safety reporting programs. StarTran does not differentiate between internal and external reports for most purposes. Information shared through internal safety reporting programs is reviewed, investigated, and addressed.

In accordance with § 673.29(b), StarTran informs employees of safety actions taken in response to the information they report (Figure 2). This can take the form of a direct conversation with a supervisor, a companywide bulletin, an update to the training program, or another method, as appropriate to the nature of the report.

Figure 2: Employee Reporting Feedback Loop

7. Safety Promotion

Culture

StarTran believes safety promotion is critical to the success of SMS by ensuring that the entire organization fully understands and trusts the SMS policies, procedures, and structure. It involves establishing a culture that recognizes safety as a core value, training employees in safety principles, and allowing open communications of safety issues.

Positive safety culture must be generated from the top-down. The actions, attitudes, and decisions at the policy-making level must demonstrate a genuine commitment to safety. Safety must be recognized as the responsibility of each employee with the ultimate responsibility for safety resting with the StarTran Transit Manager. Employees must trust that they will have management support for decisions made in the interest of safety while recognizing that intentional breaches of safety will not be tolerated.

A positive safety culture at StarTran is defined as one which is:

An Informed Culture

- Employees understand the hazards and risks involved in their areas of operation
- Employees are provided with the necessary knowledge, training and resources
- Employees work continuously to identify and overcome threats to safety

A Just/Reporting Culture

- Employees know and agree on what is acceptable and unacceptable behavior
- Human errors must be understood but negligence and willful violations are not tolerated
- Employees are encouraged to voice safety concerns and to share critical safety information without the threat of punitive action
- When safety concerns are reported, appropriate action is taken

A Learning Culture

- Learning is valued as a lifetime process
- Employees are encouraged to develop and apply their own skills and knowledge to enhance safety
- Employees are updated on safety issues and informed of actions through feedback

Competencies and Training

StarTran maintains and implements a safety management training program to ensure employees and any contract personnel occasionally working for StarTran are trained and competent to perform their SMS duties, per § 673.29(a). This training consists of several steps, including pre-employment screening of job-related skills for certain positions, new employee orientation, on-the-job training (OJT), and an ongoing process of refresher and familiarization training for current employees. Staff training is designed to be consistent with SMS principles. The Safety & Training Specialist will provide a corporate perspective on SMS and the agency's safety culture.

Hiring and New Employee Orientation

StarTran uses pre-employment screening of job-related skills for certain positions in order to ensure new employees begin their employment with a minimum awareness and competency in core job duties and responsibilities. The department supervisors document minimum skills for new employees in job descriptions and postings.

New employee orientation represents StarTran's primary opportunity for delivery of one-on-one or small group training. Training on key safety-related topics including the drug and alcohol program is delivered through new employee orientation programs.

StarTran rules and regulations available to all employees contain information on the employee safety reporting program, which encourages employees to report safety hazards, near misses, concerns, and issues. StarTran also includes discussion of the

employee safety reporting program as a formalized component of new employee orientation.

Operator/Driver Training

Drivers demonstrate skill and performance competency in the type of vehicle to which they are assigned as a part of training requirements. StarTran provides ongoing/recurring training necessary to reinforce policies and procedures as well as to provide a mechanism to brief drivers on new policies, procedures and/or regulations. Retraining is a part of the discipline program for drivers involved in incidents.

Specific training subject areas for StarTran drivers include defensive driving training and crisis management training, which are delivered either by contractors or internally, as well as voluntary CPR and first aid training.

Some training on new policies and procedures is delivered directly to drivers by Supervisors or Dispatchers on an individual basis or through bulletins and handouts.

Entry-Level Driver Training (ELDT)

FMCSA has implemented a new minimum Federal training requirement called the Entry-Level Driver Training (ELDT) to begin February 7, 2022. This requirement impacts anyone applying to obtain a Class A or B CDL for the first time, upgrade an existing CDL class, or add a passenger endorsement for the first time. ELDT specifies two types of training must be in place: theory and behind the wheel. This all must be completed before applicants take their skills test to receive their CDL. StarTran will work to ensure all new operators meet these guidelines and all documentation is present and submitted to the proper governing bodies.

Maintenance Training

The Maintenance Supervisor and senior maintenance staff provide the majority of training to StarTran maintenance personnel in an OJT format. Some training on new policies and procedures may also be delivered directly by Supervisors on an individual basis or through bulletins and handouts. StarTran primarily ensures that

maintenance staff are sufficiently familiar with job responsibilities through preemployment screening and verification that new hires have completed sufficient job-specific training or experiential learning prior to becoming employees.

Management and Supervisor Training

Management-level training is delivered through staff meetings and can include videos covering safety training topics or other safety-focused material. Management personnel participate in outside training courses on topics including the National Incident Management System (NIMS) and Incident Command System (ICS). Supervisors spend five days a year in training.

Training Documentation

The City of Lincoln Human Resources Department maintains complete records of all personnel training and certification activities. StarTran management periodically reviews and assesses employee training files and records to ensure completeness.

A standard checklist provides documentation for the safety components of new employee orientation. Course instructors produce records in either hard copy or digital format, and they include the date training was delivered, the instructor and/or provider of the training, the subject of the training, and a passing/failing grade or an indication of whether the training was successfully completed by each individual.

The Maintenance Superintendent ensures that OJT delivered to maintenance staff and other frontline personnel is documented in a similar manner to classroom-based training. Signoff sheets or similar records placed in individual personnel files at the conclusion of OJT indicate the date training was delivered, the instructor and/or provider of the training, the name of the trainee, the subject of training, and an indication of whether the training was successfully completed by the individual.

Training Program Evaluation

In order to address safety-related job functions of operations and maintenance positions and ensure that training gaps are addressed as necessary, the Safety and Training Specialist, Operations Superintendent and Maintenance Superintendent

periodically conduct informal analyses to determine whether gaps are present and develop new training material accordingly. The goal of these periodic analyses and assessments is to ensure that the agency has identified and provided all necessary skill training related to safe job performance for all job functions, to the level that all employees are competent to perform their safety-related duties.

Training curricula changes implemented by management for safety-related employees include updates to reflect new techniques, technologies, the results of investigations, corrective actions, and regulatory changes. New training courses or materials may also be developed in response to FTA guidance, state oversight activity, or other industry trends and best practices.

Safety Communication

StarTran uses a variety of means to formally communicate safety policies, processes, activities, and tools to all employees. Regular communication from management to agency employees includes hazard and safety risk information of direct relevance to employees' responsibilities.

The agency's Safety Management Policy and other SMS-related processes, activities, and tools relevant to employee job responsibilities are provided to all StarTran employees as part of the Rules and Regulations handbook. Key agency safety-related plans, including the ASP and SSEPP, are retained digitally and in hard copy and are accessible to all management and supervisory employees.

The Safety & Training Specialist, Operations
Superintendent and Maintenance Superintendent post

WHAT IS TRAINING?

During Workshop 3,
participants explored what it
means to call for more
training on a hazard. They
agreed that continuous
reinforcement has already
helped to eliminate some
hazards. This could be as
simple as workplace posters

safety-related bulletins and other messages in areas visible to frontline operations and maintenance employees, including breakrooms and adjacent to time clocks, and occasionally distribute bulletins and memoranda directly to individual employees via their personal mailboxes.

The Safety & Training Specialist will be responsible for ensuring numerical objectives, targets, and indicators are posted along with bulletins or other internal media to report on progress toward achievement of targets and indicators. Individual achievement is also recognized formally or informally. At the end of each year, any bus operator who has had no preventable accidents wins a Safe Driver Award.

Sustaining a Safety Management System

To sustain a safety management system, StarTran will ensure that processes are employed to build an organizational foundation. Actions taken to sustain SMS include:

- Create a measurement-friendly culture: All staff, including department heads, should be actively engaged in creating measurement-friendly culture by promoting performance measurement as a means of continuous improvement.
 Senior managers will also lead by example and utilize performance metrics in decision making processes.
- Build organizational capacity: Investment in developing skilled human resources capacity is essential to sustaining an SMS. Both technical and managerial skills will be needed for data collection and analysis and setting goals. Managing staff and the governing board will commit the financial resources required for organizational capacity and maintaining an SMS on a continuous basis.
- Reliability and transparency of performance results: The SMS will be able to
 produce and report its results, both good and bad. Performance information
 should be transparent and made available to all stakeholders. Messengers
 should be protected to preserve the integrity of the measurement system. The
 focus should be on opportunities for improvement rather than allocating blame.
- **Demonstrate continuous commitment to measurement**: Visible commitment to using metrics is a long-term initiative. StarTran will demonstrate a commitment to performance measurement by establishing a formal process of reporting performance results, such as including transit safety and performance

measurement as a standing agenda item at Transit Advisory Board meetings and
providing relevant information to the MPO.

8. Appendix A

City of Lincoln StarTran Safety Committee Rules and Procedures

City of Lincoln StarTran Safety Committee Rules and Procedures

RULE 1.0 PURPOSE AND ROLE

The StarTran Safety Committee was created as a result of the Bipartisan Infrastructure Law passed in 2022 and updated by publication of the Federal Transit Administration's final rule changes to 49CFR 673 on April 11, 2024. The purpose of this committee is to provide front-line workers more input into safety decision-making.

The committee will be made up of four (4) front-line workers appointed by ATU and four (4) members of StarTran's management team appointed by the Director of Transportation and Utilities ("Director").

The Safety Committee will, at a minimum:

- Approve StarTran's Agency Safety Plan (ASP) and any updates to the ASP before approval by the StarTran Advisory Board.
- Set safety performance targets for the safety risk reduction program using a rolling three (3) year average of the data submitted by the transit agency to the National Transit Database (NTD).
- Identify and recommend risk-based mitigations or strategies necessary to reduce the likelihood and severity of consequences identified through the agency's safety risk assessment; and
- Identify safety deficiencies for the purposes of continuous improvement.

RULE 2.0 MEETINGS

The StarTran Safety Committee will meet on the second Tuesday of the month, for the months of January, March, May, July, September and November of each calendar year in the StarTran conference room. Special meetings may be called by the co-chairs together or the Director. Notice of special meetings shall not be less than 48 hours in advance of such meeting and shall be given by email or such other reasonable means as may be necessary to notify Safety Committee members. The 48 hour notice period may be waived with the written consent of all committee members.

RULE 2.1 AGENDA

A written agenda of the matters to come before the committee will be provided to all Safety Committee members five (5) working days in advance via email or personal delivery and shall serve as notice of the meeting.

RULE 2.2 NOTICE

Items that require action by the Safety Committee will be identified in the agenda.

RULE 2.3 ACTION ITEMS

For action on an agenda item requiring action, five (5) affirmative or negative votes of the full membership of the Safety Committee are required for final action on any matter. "Final action" shall be defined to mean any vote on a main motion which results in a disposition of any agenda item.

RULE 3.0 APPEAL PROCESS

Following Final Action, if any employee ("employee" shall also include more than one employee joining the appeal) of StarTran feels the matter is not resolved and needs further review, such employee may appeal in writing within ten (10) business days to the Director of Transportation and Utilities. A copy of any such appeal shall be delivered to the co-chairs of the Safety Committee.

The Director shall review the appeal and conduct a hearing or investigation as may be determined appropriate by the Director. The Director shall issue a written decision to the appealing employee and the union representative within 45 calendar days of receipt of the written appeal and delivery of supporting materials as may be provided by the Safety Committee and the appealing party or parties. All supporting materials must be delivered to the Director no later than 14 calendar days after the filing of the appeal. The Director may sustain the appeal, deny the appeal, or have the Safety Committee further research and review the matter appealed. If returned to the Safety Committee for further review, the Safety Committee shall then work toward another final action which can also be appealed here under.

Any employee dissatisfied with the decision of the Director to sustain or deny appeal may appeal the Director's decision to the StarTran Advisory Board ('The Board"). The written appeal shall be delivered to the Director electronically or in hard copy. The Director shall then inform the Chair of the StarTran Advisory Board of the appeal and deliver or make available to the members of the Board all materials reviewed by the Director in the appeal herein. Rules for conducting an appeal before the Board are set forth in the StarTran Advisory Board rules and procedures.

RULE 4.0 RULES

Unless otherwise provided by these rules, all votes or decisions of the Committee including but not limited to amendments, additions, deletions, and procedural matters shall be determined by the majority vote of the members present at any meeting. The co-chairs shall ensure that all Committee members present at any meeting are given the opportunity to express their thoughts and opinions.

RULE 4.1 SUSPENSION OR MODIFICATION OF RULES

Rules may be suspended by five (5) affirmative votes of the Board except for appeals or as required by law.

RULE 4.2 AMENDMENT OF RULES

These rules may be amended by five (5) affirmative votes of the Board.

RULE 5.0 OFFICERS AND THEIR DUTIES

The officers of the Committee shall consist of the co-chairs, one selected by ATU members and one selected by StarTran management, who shall be members of the Committee. StarTran's Administrative Aide shall serve as the Committee secretary. The co-chairs shall preside over all regular and special meetings.

RULE 5.1 TERMS OF OFFICE AND ELECTIONS

Co-chairs shall be elected annually for a term of one year. The election shall be held at the regular meeting in September of each year and be effective immediately. All elections pursuant to this paragraph shall be by majority vote of the entire committee. All officers shall serve until their successors assume office. However, in the event that an officer(s) is unable to complete the term, as new officer shall be elected at the next meeting of the committee for the remainder of the term.
