

Health Promotion & Outreach Division

SERVICES & PROGRAMS

The Health Promotion & Outreach Division is working to strengthen the public's health and safety to improve quality of life. Our team of health educators is committed to enriching the lives of all people so that individuals have the knowledge and support they need to assume responsibility for their own health. This is primarily done through three key essential public health services:

- Inform, educate, and empower people about health issues.
- Mobilize community partnerships and action to identify and solve health problems.
- Develop policies and plans that support individual and community health efforts.
