

IMPROVEMENTS ARE COMING TO WEST O STREET

JULY 2015

The City of Lincoln, in partnership with MTZ Construction and Alfred Benesch & Company, will begin construction the week of July 13, 2015 on a concrete pavement repair project along West "O" St. between NW 28th Street and N 3rd Street. Work is expected to be complete by November 2015.

This pavement preservation project will help maintain and improve the driving surface of the existing roadway. Improvements are needed based upon overall conditions, visual inspections and pedestrian curb ramps that do not meet current Federal and local standards.

TRAFFIC DURING CONSTRUCTION

All work will be completed under lane closures. A minimum of one lane will be open to eastbound and westbound traffic at all times. Access to adjacent properties will be maintained and any access restrictions will be coordinated with the property owner. Properties with multiple entrances will have one entrance open at all times, unless otherwise agreed to by the property owner. Access for emergency vehicles will be maintained at all times. Pedestrian access to businesses and residences will be maintained throughout the duration of the project. Alternate pedestrian routes and or detours will be provided during reconstruction of curb ramps. All work is anticipated to take place within existing right-of-way and easements.
