## Volume I – Master Plan Report

Executive Summary .....	ES-1
-------------------------	------

### Section 1 – Introduction and Purpose

1.1	Introduction .....	1-1
1.2	Goals and Objectives .....	1-3
1.3	Public Participation Process .....	1-4
1.3.1	Questionnaire Survey .....	1-4
1.3.2	Open House Events .....	1-6
1.3.3	Citizen Advisory Committee .....	1-7
1.3.4	Property Owner Meetings and Stakeholder Sessions.....	1-7
1.3.5	Website and Newsletter .....	1-8
1.3.6	Watershed Bus Tours .....	1-9

### Section 2 – Data Collection and Development

2.1	Watershed Inventory .....	2-1
2.2	Drainage Structure Field Survey .....	2-2
2.3	Base Mapping/Triangular Irregular Network .....	2-4
2.4	Longitudinal Profile Survey .....	2-4
2.5	Geomorphic Investigation .....	2-4
2.5.1	Geomorphic Background Investigation.....	2-7
2.5.2	Geomorphic Field Investigation .....	2-7

### Section 3 – Hydrologic Model Development

3.1	Introduction .....	3-1
3.2	Hydrology Methodology .....	3-1
3.2.1	Subarea Delineation.....	3-1
3.2.2	Rainfall.....	3-3
3.2.3	Runoff Volume (SCS CN) .....	3-3
3.2.4	Runoff Hydrographs (Lag Time).....	3-11
3.2.5	Routing (Muskingum-Cunge).....	3-13
3.2.6	Watershed Storage.....	3-13
3.2.7	Flow Diversions .....	3-13
3.3	Model Calibration .....	3-16
3.3.1	Historical Storm Event Calibration .....	3-16
3.3.2	Peak Flow Verification .....	3-17
3.4	Stream Gauge Statistical Analysis .....	3-19
3.5	Modeling Results .....	3-19

**Section 4 – Hydraulic Model Development**

4.1 Introduction ..... 4-1  
4.2 HEC-RAS Model Development ..... 4-1  
    4.2.1 Stream Network, Cross Sections, and Reach Lengths ..... 4-2  
    4.2.2 Manning’s n-Values ..... 4-4  
    4.2.3 Roadway Crossings and Dams ..... 4-5  
    4.2.4 Expansion and Contraction Coefficients ..... 4-5  
    4.2.5 Boundary Conditions ..... 4-5  
    4.2.6 Ineffective Flow Areas ..... 4-6  
    4.2.7 Channel Bank Stations ..... 4-6  
4.3 Special Modeling Cases ..... 4-6  
    4.3.1 Stevens Creek Overflow Channel ..... 4-6  
    4.3.2 Split Flow Occurrences ..... 4-6  
4.4 Floodway Determination ..... 4-7  
4.5 Model Verification ..... 4-7

**Section 5 – Floodplain Management Tools**

5.1 Flood Prone Areas ..... 5-1  
    5.1.1 Flood Insurance Certificates ..... 5-1  
    5.1.2 Floodplain Delineation Process ..... 5-2  
    5.1.3 Study Floodplain and Floodway Maps ..... 5-2  
5.2 Floodplain Management Strategy ..... 5-2

**Section 6 – Water Quality and Stream Stability**

6.1 Background ..... 6-1  
6.2 Regulatory Compliance ..... 6-2  
6.3 Evaluation Approach ..... 6-3  
6.4 Biological Assessment ..... 6-4  
    6.4.1 Methodology ..... 6-4  
    6.4.2 Summary and Recommendations ..... 6-6  
6.5 Stream Sustainability Analysis ..... 6-6  
    6.5.1 Methodology ..... 6-7  
    6.5.2 Watershed Management Scenarios ..... 6-11  
    6.5.3 Modeling Results ..... 6-11  
6.6 Evaluation Results ..... 6-20  
    6.6.1 Major Conclusions ..... 6-20  
    6.6.2 Recommendations ..... 6-20  
6.7 Implementation Methods ..... 6-24  
    6.7.1 Method 1 – Regional Structural BMPs ..... 6-24  
    6.7.2 Method 2 – Site-Specific Structural BMPs ..... 6-26  
    6.7.3 Comparison Evaluation ..... 6-28  
    6.7.4 Recommendations ..... 6-29

## Section 7 – Drainage Criteria Manual Review

7.1	Background.....	7-1
7.2	Integrating Stormwater Detention with Structural BMPs .....	7-2
	7.2.1 Extended Dry Detention Basin.....	7-3
	7.2.2 Extended Wet Detention Basin .....	7-8
	7.2.3 Water Quality Control Volume.....	7-14
7.3	Alternative Design Approaches.....	7-19
7.4	Facility Ownership and Maintenance .....	7-20
	7.4.1 Maintenance Requirements .....	7-22
	7.4.2 Maintenance Agreement.....	7-22
	7.4.3 Maintenance Plan.....	7-23
7.5	Conservation Culvert Design.....	7-28

## Section 8 – Geomorphic Evaluation

8.1	Fundamentals of Fluvial Geomorphology .....	8-1
	8.1.1 Major Models.....	8-1
	8.1.2 Temporal and Spatial Implications .....	8-11
	8.1.3 Sediment Transport .....	8-13
8.2	Stevens Creek Evaluation .....	8-14
	8.2.1 Channel Geometry .....	8-15
	8.2.2 Boundary Material.....	8-26
	8.2.3 Hydraulics.....	8-27
	8.2.4 Sediment Transport Competency .....	8-28
8.3	Physical Stability of the Watershed .....	8-28
	8.3.1 Existing Channel Process.....	8-28
	8.3.2 Erosion Hazard .....	8-30
8.4	Methods of Management .....	8-32
	8.4.1 Watershed-Scale Stability .....	8-32
	8.4.2 Local Stability .....	8-32
	8.4.3 Conclusions.....	8-34

## Section 9 – Capital Improvement Projects

9.1	Problem Identification.....	9-1
	9.1.1 Drainage Infrastructure.....	9-1
	9.1.2 Habitable Buildings .....	9-1
	9.1.3 Natural Streams .....	9-2
	9.1.4 Summary .....	9-3
9.2	Recommended Improvements.....	9-3
	9.2.1 Methodology .....	9-3
	9.2.2 Stream Interventions .....	9-5
9.3	Capital Improvement Projects.....	9-60
9.4	Other Areas of Concern .....	9-64

**Section 10 – Implementation**

10.1 Setting Priorities ..... 10-1  
    10.1.1 Evaluation Criteria..... 10-1  
    10.1.2 Other Considerations ..... 10-2  
10.2 Implementation Issues ..... 10-3  
    10.2.1 Maintenance/Funding ..... 10-3  
    10.2.2 Policy and Ordinances ..... 10-3  
    10.2.3 Education Program..... 10-3  
    10.2.4 Coordination Efforts..... 10-4  
10.3 Opportunity Areas..... 10-4

**Section 11 – Digital Deliverables**

11.1 Electronic Files..... 11-1  
11.2 GIS Shapefiles ..... 11-1

**Section 12 - Glossary of Terms and References**

12.1 Glossary of Terms ..... 12-1  
12.2 References ..... 12-9

**Volume II - Appendices**

- Appendix A - Digital Deliverables*
- Appendix B - Public Participation Materials (Summary Documents, Attendance Lists, Minutes, Watershed News)*
- Appendix C - Hydrologic Model Input Data and Results*
- Appendix D - Hydraulic Model Input Data and Results*
- Appendix E - Stream Profiles*
- Appendix F - Biological Assessment Report*
- Appendix G - Example WQCV Calculations*
- Appendix H - Example Maintenance Documents*
- Appendix I - Stream Reach Descriptions*
- Appendix J - Drainage Structure Design Data*
- Appendix K - Opinion of Probable Construction Costs*

# Tables

ES-1	Capital Improvement Project List.....	ES-7
2-1	Project Information Notebooks - Summary of Data .....	2-1
2-2	Geomorphic Field Data .....	2-8
3-1	Rainfall-Duration Depths.....	3-3
3-2	Existing Land Use Percentages .....	3-6
3-3	Curve Numbers for Stevens Creek Watershed Study .....	3-7
3-4	2025 Land Use Percentages.....	3-8
3-5	Breakdown of Surrogate Future Land Use.....	3-8
3-6	Lancaster County Hydrologic Soil Groups .....	3-11
3-7	Sheet Flow and Shallow Concentrated Flow Values .....	3-12
3-8	100-Year Flow Comparisons.....	3-19
3-9	Peak Flow Modeling Results .....	3-20
4-1	HEC-RAS Model Data Sets.....	4-1
4-2	Land Surface Characteristics and Associated Manning’s n-Values <sup>1</sup> .....	4-4
4-3	Channel Descriptions and Associated Manning’s n-Values <sup>1</sup> .....	4-5
4-4	Expansion and Contraction Coefficients <sup>1</sup> .....	4-5
5-1	Properties Offered a Flood Certificate .....	5-2
5-2	Stevens Creek Confluence Level Pool Elevations (NAVD 88) .....	5-3
6-1	Summary of Historical Rainfall Data - USGS Havelock Gauge .....	6-10
6-2	Subarea Land Surface Characteristics .....	6-10
6-3	Peak Flow Rates .....	6-12
6-4	Cumulative Excess Shear Stress.....	6-17
6-5	Method 1: Conceptual Cost Estimate .....	6-26
6-6	Method 2: Conceptual Cost Estimate .....	6-27
6-7	Method 1 - Regional Structural BMPs.....	6-28
6-8	Method 2 - Site-Specific Structural BMPs.....	6-29
7-1	Design Criteria for Stormwater Basins .....	7-3
7-2	Comparison of WQCV Calculation Approaches.....	7-16
7-3	Suggested Maintenance Activities for Extended Dry Detention Basins .....	7-25
7-4	Suggested Maintenance Activities for Extended Wet Detention Basins.....	7-26
7-5	Suggested Maintenance Activities for Constructed Wetlands .....	7-26
7-6	Suggested Maintenance Activities for Bioretention Filters.....	7-27
7-7	Suggested Maintenance Activities for Vegetated Swales.....	7-27
7-8	Suggested Maintenance Activities for Open Channels .....	7-27
9-1	Capital Improvement Project List.....	9-61
9-2	Capital Improvement Project Cost Estimate .....	9-63

# Figures

ES-1	Comprehensive Watershed Master Plan – Status of Basin Plans.....	ES-2

ES-3	CIP Projects .....	ES-6
ES-4	Integrated Detention Pond and Structural BMPs.....	ES-8
ES-5	Watershed Planning Map .....	ES-10
1-1	Watershed Location.....	1-2
1-2	Project Organizational Chart.....	1-3
1-3	Watershed Demographics .....	1-5
1-4	Questionnaire Responses.....	1-5
2-1	Drainage Structure Locations.....	2-5
2-2	LiDAR Data/Thalweg Survey Locations .....	2-6
3-1	Subarea Boundaries .....	3-2
3-2	Recurrence Interval Versus Rainfall Depth.....	3-4
3-3	Existing Land Use Plan .....	3-5
3-4	Future Land Use Plan.....	3-9
3-5	Hydrologic Soil Groups .....	3-10
3-6	Modeled Storage and Rain Gauge Locations.....	3-14
3-7	Flow Diversion Locations .....	3-15
3-8	Stevens Creek – Havelock Street 9-8-89 Calibration Event.....	3-17
3-9	Flow Comparison Locations.....	3-18
4-1	Stream Reach Locations .....	4-3
5-1	Floodplain Map .....	5-4
5-2	Floodplain Map Tile No. 1.....	5-5
5-3	Floodplain Map Tile No. 2.....	5-6
5-4	Floodplain Map Tile No. 3.....	5-7
5-5	Floodplain Map Tile No. 4.....	5-8
5-6	Floodplain Map Tile No. 5.....	5-9
5-7	Floodplain Map Tile No. 6.....	5-10
5-8	Floodplain Map Tile No. 7.....	5-11
5-9	Floodplain Map Tile No. 8.....	5-12
5-10	Floodplain Map Tile No. 9.....	5-13
5-11	Floodplain Map Tile No. 10.....	5-14
5-12	Floodplain Map Tile No. 11.....	5-15
5-13	Floodplain Map Tile No. 12.....	5-16
5-14	Floodplain Map Tile No. 13.....	5-17
5-15	Floodplain Map Tile No. 14.....	5-18
5-16	Floodplain Map Tile No. 15.....	5-19
6-1	Hydrologic Responses to Development (Roesner et al. 2001).....	6-1
6-2	BMP Treatment Train.....	6-3
6-3	Bioassessment Sample Points.....	6-5

6-4	Prototype Watershed.....	6-8
6-5	Reach 1 - Flow Frequency Curve.....	6-13
6-6	Reach 2 - Flow Frequency Curve.....	6-14
6-7	Reach 1 - Flow Duration Frequency Curves.....	6-15
6-8	Reach 2 - Flow Duration Frequency Curves.....	6-16
6-9	Reach 1 - Shear Stress Duration Curves.....	6-18
6-10	Reach 2 - Shear Stress Duration Curves.....	6-19
6-11	Method 1 - Regional Structural BMP Locations.....	6-25
6-12	Integrated Detention Pond and Structural BMP.....	6-27
7-1	Schematic of an Extended Dry Detention Basin.....	7-4
7-2	Outlet Structure Details Extended Dry Detention Basin.....	7-7
7-3	Schematic of an Extended Wet Detention Basin.....	7-9
7-4	Outlet Structure Details Extended Wet Detention Basin.....	7-13
7-5	Lincoln, Nebraska Average Annual Rainfall Volume Capture.....	7-17
7-6	Example WQCVs Drawdown.....	7-19
7-7	Design Alternative No. 1 - Incorporating Structural BMPs and Detention Basins.....	7-21
7-8	Design Alternative No. 2 - Incorporating Structural BMPs and Detention Basins.....	7-21
7-9	Traditional Culvert.....	7-29
7-10	Modified Culvert.....	7-29
8-1	Lane's Stable Channel Balance.....	8-2
8-2	Channel Evolution Model (Simon 1989).....	8-6
8-3	Meander Formation and Migration.....	8-8
8-4	Meander Geometry.....	8-9
8-5	Stages of a River System.....	8-12
8-6	General Channel Profile of a Watershed.....	8-12
8-7	Effect of a Dam Resetting the Stream Formation Sequence.....	8-12
8-8	Effect of Stream Crossings Resetting the Stream Formation Sequences.....	8-13
8-9	Hydrograph and Sedigraph.....	8-14
8-10	Width versus Radius.....	8-16
8-11	Width versus Meander Wavelength.....	8-17
8-12	Radius versus Width by Location.....	8-18
8-13	Wavelength versus Width by Location.....	8-19
8-14	Channel Bed Profile.....	8-21
8-15	Critical Bank Height and Angle for Saturated Conditions, Slopes <5 Feet.....	8-23
8-16	Critical Bank Height and Angle for Slopes >5 Feet.....	8-24
8-17	Main Stem Longitudinal Profile.....	8-25
8-18	Occurrence of Knickpoints in Relation to Shear Stress.....	8-29
8-19	Knickpoint Frequency along Incising and Widening Reach.....	8-30
8-20	Existing Channel Process.....	8-31
8-21	Newbury-Style Grade Control Structures.....	8-33
9-1	Problem Areas.....	9-4
9-2	Stream Reach Locations.....	9-7
9-3	Stevens Creek Intervention #1.....	9-9

9-4 Stevens Creek Intervention #2 ..... 9-11

9-5 Stevens Creek Intervention #3 ..... 9-13

9-6 Stevens Creek Intervention #4 ..... 9-15

9-7 Stevens Creek Intervention #5 ..... 9-17

9-8 Stevens Creek Intervention #6 ..... 9-19

9-9 Stevens Creek Intervention #7 ..... 9-21

9-10 Stevens Creek Intervention #8 ..... 9-23

9-11 Stevens Creek Intervention #9 ..... 9-25

9-12 Stevens Creek Intervention #10 ..... 9-27

9-13 Stevens Creek Intervention #11 ..... 9-29

9-14 Stevens Creek Intervention #12 ..... 9-31

9-15 Stevens Creek Intervention #13 ..... 9-33

9-16 Stevens Creek Intervention #14 ..... 9-35

9-17 Stevens Creek Intervention #15 ..... 9-37

9-18 Stevens Creek Intervention #16 ..... 9-39

9-19 Stevens Creek Intervention #17 ..... 9-41

9-20 Stevens Creek Intervention #18 ..... 9-43

9-21 Stevens Creek Intervention #19 ..... 9-45

9-22 Stevens Creek Intervention #20 ..... 9-47

9-23 Stevens Creek Intervention #21 ..... 9-49

9-24 Stevens Creek Intervention #22 ..... 9-51

9-25 Stevens Creek Intervention #23 ..... 9-53

9-26 Stevens Creek Intervention #24 ..... 9-55

9-27 Stevens Creek Intervention #25 ..... 9-57

9-28 Stevens Creek Intervention #26 ..... 9-59

9-29 CIP Projects ..... 9-62

10-1 Watershed Planning Map ..... 10-5

# Acronyms

BFE	base flood elevation
BMP	best management practice
CAFOs	confined animal feedlot operations
cfs	cubic feet per second
CIP	capital improvement project
CMP	corrugated metal pipe
DFIRM	Digital Flood Insurance Rate Map
EIS	environmental impact statement
EPA	Environmental Protection Agency
FEMA	Federal Emergency Management Agency
FIRM	Flood Insurance Rate Map
FIS	Flood Insurance Study
GIS	geographical information system
GPS	global positioning system
HEC-HMS	Hydrologic Engineering Center-Hydrologic Modeling System
LiDAR	light detection and ranging
NDOR	Nebraska Department of Roads
NPDES	National Pollutant Discharge Elimination System
NRCS	Natural Resources Conservation Service
NRD	Natural Resources District
RCB	reinforced concrete box
RCP	reinforced concrete pipe
STORM	Storage, Treatment, Overflow, and Runoff Model
TIN	triangular irregular network
U of N	University of Nebraska
USGS	United States Geological Survey
WQCV	water quality control volume
WSE	water surface elevation
