# Geriatric assessment resources in southeast Nebraska

A comprehensive geriatric assessment differs from a standard medical evaluation in its concentration on frail elderly people with complex problems, its emphasis on functional status and quality of life, and its frequent use of interdisciplinary teams. Although a comprehensive geriatric assessment may be carried out by a primary care physician in an office, generally it is best performed by personnel from several disciplines in a setting organized for their interaction. (*The Merck Manual of Geriatrics Second Edition 1995*)

**Cost:** Fees are associated with the service. Please call for more information. Please check with your insurance provider regarding necessary pre-authorization and potential out of pocket cost. Some assessments may require a physicians referral for insurance to pay.
