27.18.090 Height and area regulations.

27.18.010 Scope of regulations. The regulations set forth in this chapter, or set forth elsewhere in this title when referred to in this chapter, are the district regulations in the R-C residential conservation district. (Ord. 15095 §1; January 23, 1989).

27.18.020 Purpose. The R-C residential conservation district is a zoning overlay district intended to be applied to selected areas of the R-5, R-6, and R-7 residential districts in order to conserve areas which retain the character of earlier periods of development, to stabilize and improve property values in such areas, to encourage rehabilitation of existing housing, and to promote new construction that is compatible with the character of the area. (Ord. 15095 §2; January 23, 1989).

27.18.030 Designation of residential conservation district. (a) The following shall be the minimum standards for designation of an area as an R-C residential conservation district:

(1) District size shall be at least ninety thousand (90,000) square feet;
(2) Proposed districts shall be within the R-5, R-6 and R-7 residential districts;
(3) Within a proposed district, no more than fifty percent (50%) of the lots of record as of November 2, 1953 shall contain principal structures less than fifty (50) years of age;
(4) An R-C residential conservation district shall not be designated if written protests are made by the record owners of over fifty percent (50%) of the included properties, excluding public right-of-way, at or prior to the public hearing on the designation.

(b) The City Council may designate an area meeting the minimum standards as an R-C residential conservation district after review and consideration of the following:

(1) The degree to which the area retains the general character and appearance of its original period of development;
(2) The extent to which the area evidences on-going maintenance of existing older buildings;
(3) The potential for rehabilitation of existing housing in the area;
(4) The degree to which the area needs redevelopment;
ZONING

(5) The degree to which the area displays continuity, including both sides of facing blocks as much as possible.

Before designating an area as an R-C residential conservation district, the city council shall refer the proposal to the planning commission. The planning commission shall hold a public hearing upon such petition and make a report to the city council. Said report shall contain the findings of the commission regarding the effect of the proposed R-C residential conservation district upon the subject properties and upon the surrounding area and regarding its compliance with the comprehensive plan. After the recommendations and report of the planning commission have been filed, the city council shall, before granting such designation, hold a public hearing as provided in section 27.81.050. (Ord. 15095 §3; January 23, 1989).

27.18.040 Neighborhood design standards. The planning director shall develop written neighborhood design standards and submit them to the planning commission for recommendation, then to city council for approval by resolution. When the neighborhood design standards have been approved, each application for a building permit for new construction of a principal building within areas designated by the city council as R-C residential conservation district shall comply with those standards. (Ord. 15095 §4; January 23, 1989).

27.18.050 Use regulations. Those uses allowed by right, condition, or special permit in the underlying zoning district shall apply in the R-C residential conservation district, subject to the requirements of the underlying district. (Ord. 15095 §5; January 23, 1989).

27.18.060 Accessory uses. Accessory uses permitted in the R-C residential conservation district are accessory buildings and uses customarily incident to any of the permitted uses in the district unless modified by the neighborhood design standards. (Ord. 15095 §6; January 23, 1989).

27.18.070 Parking regulations. All parking within the R-C residential conservation district shall be in conformance with the provisions of chapter 27.67 unless modified by the neighborhood design standards. (Ord. 15095 §7; January 23, 1989).

27.18.080 Signs. Signs within the R-C residential conservation district shall be regulated in conformance with the provisions of chapter 27.69. (Ord. 15095 §8; January 23, 1989).

27.18.090 Height and area regulations. (a) The maximum height and minimum lot requirements within the R-C residential conservation district shall be those contained in the underlying zoning district, except as modified by this chapter and by the neighborhood design standards.

(b) A minimum amount of usable, accessible open space must be provided for each residential building. This requirement shall be as follows:

One hundred (100) square feet for the first dwelling unit;
Fifty (50) square feet for each additional dwelling unit.

(1) The required rear yard may be counted toward the fulfillment of said open space requirement. Required front and side yards may not be counted, except for
unenclosed porches which project into the required front yard a distance not less than six (6) feet and not exceeding ten (10) feet as permitted in Section 27.71.100;

(2) Parking spaces and land occupied by any building or structure may not be counted toward fulfillment of this open space requirement, except for front porches as in (a)(1) above;

(3) Required open space may be provided on a rooftop provided that the roof is designed and surfaced in such a manner that it may be developed with areas of planting, open space, recreation and other uses that are consistent with similar uses in ground level rear yards for dwellings. Such rooftop areas may not be occupied by structures such as vents, exhaust intakes, or other mechanical devices, except where they do not interfere with the usable nature of the open space;

(4) The depth-to-width ratio of any area used to fulfill the open space requirements may not exceed three to one (3-1), if the smallest dimension of the open space is twelve (12) feet or less.

(c) Accessory buildings which are attached to or not located more than six (6) feet from the main structure shall be considered a part of the main structure and shall comply with the height, front, side, and rear yard requirements of the main building. Accessory buildings not a part of the main structure may be located in the required rear yard, but such accessory buildings may not occupy more than forty percent (40%) of the required rear yard and shall not be closer than two (2) feet to any side or rear lot line nor more than fifteen (15) feet in height. Accessory buildings not a part of the main structure, if located not less than sixty (60) feet from the front lot line, may extend into the required side yard though not closer than two (2) feet to the side lot line. A garage which is entered from an alley shall not be located closer than ten (10) feet to the alley line.

(d) Where a lot of record as of November 2, 1953, has less area or width or both less area and width than herein required and its boundary lines along their entire length abutted lands under other ownership on November 2, 1953, and have not since been changed, the lot may be used for a single-family dwelling, two-family dwelling, or for any nondwelling use permitted in this chapter.

(e) The required side yard shall be five (5) feet, regardless of the height of the building, provided it does not have any entrances on portions of the building facing the side lot line. (Ord. 15095 §9; January 23, 1989).

(b) There shall be a required front yard on each street side of a double-frontage lot.

(c) There shall be a required front yard on each street side of a corner lot; provided, however, that the buildable width of a lot of record on November 2, 1953, need not be reduced to less than twenty-eight (28) feet except where necessary to provide a required side yard of not less than five (5) feet in place of one of the required front yards. Where corner lots are separated by a common rear lot line, the minimum

required yard shall be ten (10) feet on the side along the street adjacent to both corner lots.

(d) Balconies may be provided in the required side yard but not closer than seven (7) feet from the side lot line.

(e) Open space requirements for residential use: A minimum amount of usable and accessible open space must be provided for each residential use. This requirement shall be as follows:

- 125 square feet for the first dwelling unit;
- 80 square feet per unit for the next four (4) dwelling units;
- 25 square feet per unit for the next four (4) dwelling units;
- 20 square feet per unit for each additional dwelling unit beyond nine (9).

This open space requirement may be met in the following manner:

1. The required rear yard may be counted; however, the required front and side yards may not be counted toward fulfillment of said open space requirement except as follows:
   - Porches, balconies, patios, and terraces as permitted in this chapter and in sections 27.71.100 and 27.71.110;
   - The required side yard may be counted where the distance between the main building and the side lot line exceeds the required side yard by more than seven (7) feet.

2. Parking spaces, and land occupied by any building or structure may not be counted toward fulfillment of this open space requirement.

3. Required open space may be provided either on a balcony four (4) or more feet in depth or on a rooftop, provided that the roof is designed and surfaced in such a manner that it may be developed with areas of planting, open space, recreation, and other uses that are consistent with similar uses in ground-level side and rear yards for dwellings. Such rooftop areas may not be occupied by structures, such as vents, exhaust intakes, or other mechanical devices, except where they do not interfere with the usable nature of the open space.

4. The depth-to-width ratio of any area used to fulfill the open space requirement may not exceed three to one (3-1), if the smallest dimension of the open space is twelve (12) feet or less.

(f) Accessory buildings which are attached to or not located more than six (6) feet from the main structure shall be considered a part of the main structure and shall comply with the height, front, side, and rear yard requirements of the main building. Accessory buildings not a part of the main structure may be located in the required rear yard but such accessory buildings may not occupy more than forty percent (40%) of the required rear yard and shall not be nearer than two (2) feet to any side or rear lot line, nor more than fifteen (15) feet in height. Accessory buildings not a part of the main structure, if located not less than sixty (60) feet from the front lot line, may extend into the required side yard though not nearer than two (2) feet to the side lot line. A garage which is entered from an alley shall not be located closer than ten (10) feet to the alley line.

(g) Where a lot of record as of November 2, 1953, has less area or width or both less area and width than herein required and its boundary lines along their entire length abutted lands under other ownership on November 2, 1953, and have not since been changed, the lot may be used for a single-family dwelling, two-family dwelling, or for any nondwelling use permitted in this chapter.

(h) Where, on the effective date of this title, a lot exists which meets all of the following conditions, the lot density may be calculated as if the lot contained more than fourteen thousand (14,000) square feet, but less than twenty-one thousand (21,000) square feet as provided in this chapter:

ZONING

ANNOT.: The term "customarily" as used in this statute should not be a mathematical determination to be resolved only by computing percentages, neither should it be resolved by what might be termed the habitual or usual mode of operation. 

State v. Smiley, 192 Neb. 211, 153 N.W.2d 906 (1967).

The practice should be appreciable or perhaps substantial. It should be sufficient to constitute a recognized mode of activity in the field, but it need not be the more prevalent one. Id.

The time at which "customary usage" is to be determined is at the time the litigation arose. Id.

Incidental or accessory use is any use which is dependent upon or pertains to the principle or main use. Id.

*For a building exceeding 45' in height, the sum total of the two required side yards shall not be less than 30', and neither side yard shall be less than 10'.

(b) There shall be a required front yard on each street side of a double-frontage lot.

(c) There shall be a required front yard on each street side of a corner lot; provided, however, that the buildable width of a lot of record on November 2, 1953, need not be reduced to less than twenty-eight feet except where necessary to provide a required side yard of not less than five feet in place of one of the required front yards.

(d) Balconies may be provided in the required side yard but not closer than seven feet to the side lot line.

(e) Open space requirements for residential use: A minimum amount of usable and accessible open space must be provided for each residential use. This requirement shall be as follows:

- 125 square feet for the first dwelling unit;
- 80 square feet per unit for the next four dwelling units;
- 25 square feet per unit for the next four dwelling units;
- 20 square feet per unit for each additional dwelling unit beyond nine.

This open space requirement may be met in the following manner:

1. The required rear yard may be counted; however, the required front and side yards may not be counted toward the fulfillment of said open space requirement, except as follows:

(2) Parking spaces and land occupied by any building or structure may not be counted toward fulfillment of this open space requirement;

(3) Required open space may be provided either on a balcony four (4) or more feet in depth or on a rooftop, provided that the roof is designed and surfaced in such a manner that it may be developed with areas of planting, open space, recreation and other uses that are consistent with similar uses in ground-level and rear yards for dwellings. Such rooftop areas may not be occupied by structures such as vents, exhaust intakes, or other mechanical devices, except where they do not interfere with the usable nature of the open space;

(4) The depth-to-width ratio of any area used to fulfill the open space requirement may not exceed three to one (3-1), if the smallest dimension of the open space is twelve (12) feet or less.

(f) Accessory buildings which are attached to or located not more than six (6) feet from the main structure shall be considered a part of the main structure and shall comply with the height and front, side, and rear yard requirements of the main structure. **West of 9th Street, the maximum height shall be seventy-five (75) feet.

(c) Where any front yard is required in this district, there shall be a required front yard along each street side of a double frontage lot.

(d) Where any front yard is required in this district, there shall be a required front yard on each street side of a corner lot; provided, however, that the buildable width of a lot of record on November 2, 1953, need not be reduced to less than twenty-eight (28) feet except where necessary to provide a required side yard of not less than five (5) feet in place of one of the required front yards.

(e) Where a yard is not otherwise required, a yard shall be required adjacent to any wall of a building which contains windows for dwelling.
units. The yard requirement shall be five (5) feet for structures under thirty-five (35) feet in height, ten (10) feet for structures thirty-five (35) to fifty (50) feet in height, and twenty (20) feet for those structures over fifty (50) feet in height. Depending upon the location of said windows, this yard may be a side yard, a rear yard, or located in or on an interior courtyard. If the required yard abuts an alley, one-half of the alley may be counted as part or all of the required yard. This yard need not start at the ground level but may begin on the top surface of a non-residential building, provided that this surface is usable as open space as defined in (f) below.

(f) Open space requirements for residential use: A minimum amount of usable and accessible open space must be provided for each residential use. This requirement shall be as follows:

- 125 square feet for the first dwelling unit;
- 80 square feet per unit for the next four dwelling units;
- 25 square feet per unit for the next four dwelling units;
- 20 square feet per unit for each additional dwelling unit beyond nine (9).

This open space requirement may be met in the following manner:

1. The required rear yard may be counted; however, the required front and side yards may not be counted toward the fulfillment of said open space requirement, except for porches, terraces, and balconies as permitted in section 27.71.100 and 27.71.110.

2. Parking spaces or land occupied by any building or structure may not be counted toward fulfillment of this open space requirement.

3. Required open space may be provided either on a balcony four (4) or more feet in depth or on a rooftop, provided that the roof is designed and surfaced in such a manner that it may be developed with areas of planting, open space, recreation and other uses that are consistent with similar uses in ground-level side and rear yards for dwellings. Such rooftop areas may not be occupied by structures such as vents, exhaust intakes, or other mechanical devices, except where they do not interfere with the usable nature of the open space.

4. The depth-to-width ratio of any area used to fulfill the open space requirement may not exceed three to one (3-1) if the smallest dimension of the open space is twelve (12) feet or less.

(g) Accessory buildings which are attached to or located not more than ten (10) feet from the main structure shall be considered a part of the main structure and shall comply with the height and front, side, and rear yard requirements of the main structure. Accessory buildings not a part of the main structure may be located in any required rear yard, but such accessory buildings may not occupy more than thirty percent (30%) of the required rear yard, and shall not be nearer than two (2) feet to any side or rear lot line, nor more than fifteen (15) feet in height. Accessory buildings not a part of the main structure, if located not less than sixty (60) feet from the front lot line, may extend into the required side yard though not nearer than two (2) feet to the side lot line. A garage which is entered from an alley shall not be located closer than ten (10) feet to the alley line. (Ord. 13163 §1; June 29, 1981; prior Ord. 12751 §15; November 5, 1979; Ord. 12571 §218; May 8, 1979).

(2) Upon request of the applicant, the City Council may, after report and recommendation of the Planning Commission, decrease the required parking set forth in this chapter and Chapter 27.67 if it is determined that the mix of uses or ownership patterns create situations where the applicability of a particular standard is not feasible.

(3) The Planning Commission shall hold a public hearing upon the requested adjustment at the same time that it hears the application for the use permit and shall make a report to the City Council regarding the effect the proposed use and adjustment has upon the surrounding neighborhood, the community as a whole, and other matters relating to public health, safety, and general welfare. Upon receiving a report from the Planning Commission, the City Council shall take final action upon the application for the use permit and the requested adjustment.

(i) Amendment. The Planning Director is authorized to approve amendments to any use permit granted under this section, including square footage of floor area and storage space in phases of development; provided, that:

27.53.100 Use Permit Section. (a) Minimum requirements. No use permit shall be granted upon any property having a total area of less than seventy acres, nor for any plan unless it is in conformance with all applicable city standards and with all regulations of the applicable sections of this chapter. The Planning Commission shall impose such conditions as are appropriate and necessary to ensure compliance with the Comprehensive Plan and protect the health, safety, and general welfare in the issuance of any use permits. Such conditions may include an increase in the minimum yard requirements and decrease in the maximum height restrictions set forth in this chapter. Lots fronting on private roadways may be permitted. Unless expressly modified by the terms of the use permit, all regulations of the I-4 Planned Industrial Reserve District shall apply.

(b) Environmental performance standards. Any applicant for a use permit under the provisions of this section shall comply with environmental performance standards relating to noise, emission, dust, odor, glare, and heat as shall be approved by resolution of the City Council.

(c) Landscape plan. Each application for a use permit under this section shall include a landscape plan which shall show proposed plantings in conformance with city standards in all required yard areas, open space areas, parking areas, and around proposed buildings. The Planning Director shall develop appropriate written standards for such landscape plans, which standards shall be approved by resolution of the City Council.

(d) Application requirements. Applications for a use permit under this section shall be filed in writing on a form provided by the city with the Planning Department. A preliminary plan shall accompany each application and shall include the following information:

(1) Boundary survey and gross acreage;
(2) Contour lines at intervals not to exceed five feet based on city data. Spot elevations on one hundred foot grid shall be required to fully indicate the topography of flat land.
(3) Street right-of-way;
(4) Utility easements;
(5) Adjacent land use and zoning classifications;
(6) The amount of traffic to be generated and the street facilities required to accommodate said traffic;
(7) Location of structures on property;

(e) Planning commission review. Upon the filing of an application together with all maps, data, and information required by this section, the City Council shall refer the application to the Planning Commission. The Planning Commission shall hold a public hearing upon such application and shall consider the effect of the proposed use upon the surrounding neighborhood, the community as a whole, and other matters relating to public health, safety, and general welfare.

(f) Planning Commission action. After holding at least one public hearing, the Planning Commission shall proceed to give final consideration to the application and may require that certain conditions be fulfilled by the applicant in conjunction with approval of the use permit applied for, and may include the requirement that applicant grant additional right of way in accordance with the Comprehensive Plan. The Planning Commission may require the execution of a written agreement with the city relating to the installation of public improvements by the applicant, together with the execution of performance bonds or provision of other appropriate surety relating thereto. The installation of all public improvements shall be accomplished in compliance with existing city standards as provided by ordinance or by departmental publications approved by resolution of the City Council. In the event the Planning Commission fails to act upon the application within sixty days from the date of referral, the applicant may appeal to the City Council requesting final action. If the City Council determines that the delay of the Planning Commission is unjustified, it shall direct the commission to act upon the application no later than the commission’s next regularly scheduled meeting.

(g) Appeal of Planning Commission action. (1) Any aggrieved person or any person or group officially designated to participate in the administration of this title may appeal any action of the Planning Commission to the City Council by filing notice of appeal with the City Clerk within fourteen days following the action of the Planning Commission.

(3) The City Council may, after public hearing, in conformity with the provi­sions of this title reverse or affirm, wholly or partially, or may modify the action of the Planning Commission appealed from.

(h) Adjustment of yard requirements and height restrictions. Upon request of the applicant, the City Council may, after report and recommendation of the Planning Commission, decrease the minimum yard requirements and increase the maximum height restrictions set forth in Chapter 27.71 of this title consistent with adequate protection of the environment of adjacent land uses. The Planning Commission shall hold a public hearing upon the requested adjustment at the same time that it hears the application for the use permit and shall make a report to the City Council regarding the effect the proposed use and adjustment has upon the surrounding neighborhood, the community as a whole, and other matters relating to public health, safety, and general welfare. Upon receiving a report from the Planning Commission, the City Council shall take final action upon the application for the use permit and the requested adjustment.

(i) Amendment. The Planning Director is authorized to approve amendments to any use permit granted under this section, including square footage of floor area and storage space in phases of development; provided that:

(1) A request for amendment is filed with the Planning Director, together with any of the information specified in paragraph (d) above which is pertinent to the proposed amendment;
(2) Such amendment shall not violate any regulations set forth in this title;
(3) Such amendment may provide for minor increases in total floor area and storage space originally permitted;

Chapter 27.55

FLOOD PLAIN DISTRICT

Sections:
27.55.010 Scope of regulations.
27.55.020 Definitions.
27.55.030 Standards.
27.55.040 Administration.
27.55.050 Permit procedures.
27.55.060 Special permits.
27.55.070 Pre-existing uses.
27.55.080 Penalties for violation.
27.55.090 Amendments.

27.55.010 Scope of regulations. The regulations set forth in this chapter, or set forth elsewhere in this title when referred to in this chapter, are known as the flood plain ordinance. The ordinance shall apply to all lands in the flood plain within the zoning jurisdiction of the city of Lincoln that are subject to a one percent (1%) or greater chance of flooding in any given year, as designated by the federal emergency management agency (FEMA). The official flood insurance rate map (FIRM) and flood boundary and floodway map (FBFM) and any revision thereto are hereby adopted by reference and declared to be a part of this ordinance. (Ord. 14314 1; February 3, 1986; prior Ord. 12571 266; May 8, 1979).

27.55.020 Definitions. For the purpose of this chapter, certain words shall have the following meanings:

1. BASE FLOOD shall mean the flood having a one percent (1%) chance of being equaled or exceeded in any given year.

2. DEVELOPMENT shall mean any man-made change to improved or unimproved real estate, including but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations, or storage of equipment or materials.

3. MANUFACTURED HOME PARK OR SUBDIVISION shall mean a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of this ordinance.

4. EXPANSION TO AN EXISTING MANUFACTURED HOME PARK OR SUBDIVISION shall mean the preparation of additional sites by the construction of facilities for serving the lots on which the manufactured homes are to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

5. FLOOD INSURANCE RATE MAP (FIRM) shall mean an official map of a community, on which FEMA has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

6. FLOOD BOUNDARY and FLOODWAY MAP (FBFM) shall mean an official map of a community, on which FEMA has delineated the areas of 100-year flood and regulatory floodways. The map provides a technical basis for regulatory purposes.

7. FLOOD PLAIN shall mean those lands which are subject to a one percent (1%) or greater chance of flooding in any given year. The
designated flood plain for this chapter shall be based on the areas of 100-year flood, or areas of special flood hazards, as shown on the official flood insurance rate map or flood boundary and floodway map issued by FEMA and shall include zone A, zones A-1 through A-30, and floodway.

10. FLOODPROOFING shall mean any combination of structural and nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

11. FLOODWAY shall mean the channel of a river or other watercourses and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

12. LOWEST FLOOR shall mean the lowest floor of the lowest enclosed area (including basement). An unfinished or flood-resistant enclosure, usable solely for parking of vehicles or building access, in an area other than a basement area is not considered a building's lowest floor; provided that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this ordinance.

13. MANUFACTURED HOME shall mean, for purposes of this chapter, a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when installed on real property. It shall include vehicle homes as defined by Federal Register of this volume. For manufactured homes subsequently purchased or added to existing parks and mobile home trailer parks, trailers, mobile homes and other similar vehicles placed on a site for greater than 180 consecutive days. The term "manufactured home" shall not include a "recreational vehicle."

14. MANUFACTURED HOME PARK or SUBDIVISION shall mean a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

15. MEAN SEA LEVEL shall mean the national geodetic vertical datum (NGVD) of 1929 or other datum to which base flood elevations shown on the FIRM are referenced.

16. NEW CONSTRUCTION shall mean structures for which the start of construction commenced on or after the effective date of this ordinance and shall include any subsequent improvements to such structures.

17. NEW MANUFACTURED HOME PARK OR SUBDIVISION shall mean a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of this ordinance.

18. QUALIFIED ENGINEER shall mean a registered professional engineer who, by reason of his training and experience, is considered knowledgeable in hydrology and hydraulics and their application to the flood insurance study and has demonstrated his competence to the satisfaction of the Director of Building and Safety.

RECREATIONAL VEHICLE shall mean a vehicle which is: (1) built on a single chassis; (2) 400 square feet or less when measured at the largest horizontal projections; (3) designed to be self-propelled or permanently towable by a light duty truck; and (4) designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

19. RIVERINE shall mean relating to, formed by, or resembling a river (including tributaries, streams, brooks, etc.).
16] START OF CONSTRUCTION shall mean either the first placement of permanent construction of a structure on a site, such as the pouring of slabs or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation, or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading, and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not as part of the main structure. For a substantial improvement, the actual start of construction shall mean the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

18] STRUCTURE shall mean, for flood plain management purposes, a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

SUBSTANTIAL DAMAGE shall mean damage of any origin sustained by a structure to its before damaged condition would equal to or exceed fifty percent of the market value of the structure before the damage occurred.

19] SUBSTANTIAL IMPROVEMENT shall mean any removal, reconstruction, rehabilitation, addition, or other improvement, either total or partial, whether or not permanent, that results in an increased value to the structure, either (1) before the improvement or (2) if the structure had been damaged and is being restored to its condition prior to the occurrence of the damage. For the purpose of this definition, substantial improvement is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building exceeds the external dimensions of the structure. Substantial improvement shall include structures which have incurred substantial damage, regardless of the actual repair work performed. The term flood shall not, however, include either (1) any project for improvement of a structure to satisfy with correct existing violations of state or local health, sanitary or safety code specifications which have been identified by the local code enforcement official and which are initially the minimum necessary to assure safe living conditions; or (ii) any alteration of a historic structure, provided that the alteration will not preclude the structure's continued designation of a historic structure structure listed in the National Register of Historic Places of a State Register of Historic Places. (Ord. 15544; May 14, 1990: prior Ord. 14642 2; April 6, 1987; Ord. 14314 2; February 3, 1986; Ord. 12571 269; May 8, 1979).

21.55.030 Standards. The following shall be the standards to be followed in connection with the flood plain district:

(a) General standards:

(1) Within the designated flood plain, all new construction and substantial improvements shall be anchored to prevent flotation, collapse, or lateral movement of the structure; constructed with materials and utility equipment resistant to flood damage; and constructed by methods and practices that minimize flood damage. Electrical, heating, ventilation, plumbing, and air-conditioning equipment and other service facilities shall be elevated at least one (1) foot above the base flood elevation or designed so as to prevent water from entering or accumulating within the components during conditions of flooding. A registered professional engineer or architect shall certify that these provisions are satisfied.
(2) The location, grade, and floodproofing of all new and replacement water and sanitary sewer systems which are to be extended into or through any portion of the flood plain to serve the proposed development shall first be approved by the city prior to the extension of such utilities into the flood plain area.

(3) New and replacement community sewage systems and individual sewage disposal systems shall be designed in accordance with the standards set forth in chapter 24.36 of the Lincoln municipal code in order to minimize impairment to them or contamination from them during flooding.

(4) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

(5) The storage or processing of materials that are in time of flooding buoyant, flammable, explosive, or could be injurious to human, animal or plant life is prohibited.

(6) Storage of other material or equipment may be allowed if not subject to major damage by floods and firmly anchored to prevent flotation or if readily removable from the area within the time available after the issuance of flood warning by appropriate authorities.

(7) Filling, grading, and excavation may be allowed in the designated flood plain under the following conditions:

(i) In the designated flood plain outside the floodway such work shall not unduly increase the flood heights, alter the waterflow, obstruct the watercourse, cause tributary flooding, or aggravate flood problems.

(ii) Fill shall be protected against erosion and sediment by such measures as rip-rap, vegetative cover, bulkheading, or sedimentation basins as approved by the [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety].

(iii) Any fill to be deposited in the flood plain must be shown by the applicant not to be a detriment to the general public as well as the surrounding land owners.

(iv) Fill materials shall be of a selected type, preferably clean dirt, gravel, or rock no greater than two (2) inches in diameter. The use of decomposing materials, such as wood and other degradable, shall be prohibited. Fill shall be placed in six (6) inch compacted layers. Fill selection and placement shall recognize the effects of saturation from flood waters on slope stability, uniform and differential settlement, and seepage potentials.

(v) Prior to placement of any fill or embankment materials, the area upon which fill is to be placed shall be cleared of debris, stumps, brush, down timber, logs, and other objects. All materials and debris from this clearing shall be removed from the proposed fill and disposed of at approved locations outside the flood plain.

(vi) Fill slopes for granular materials shall be no steeper than one (1) vertical on two (2) horizontal unless substantiating data justifying steeper slopes are submitted to the [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety] and approved.

(vii) Excavation in the flood plain shall be done so that the land surface is maintained in such a manner that surface waters do not collect and pond unless specifically approved by the [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety], [Director of Building and Safety].

(b) Residential construction. All new construction and substantial improvements of residential structures within the designated flood plain shall have the lowest floor, including basement, elevated at least one (1) foot above the base flood level. Garages and storage buildings used exclusively for the storage of motor vehicles, and storage of other items...
readily removable in the event of a flood warning may have their lowest floor below flood elevation, provided the building structure is capable of withstanding hydrostatic and hydrodynamic forces caused by the 100-year flood and, further, provided that no utilities are installed in the building except elevated or floodproofed electrical fixtures. If the building is converted to another use, it must be brought into full compliance with the requirements of this title governing such uses.

(c) Nonresidential construction. All new construction and substantial improvements of commercial, industrial, and other nonresidential structures within the designated flood plain shall either have the lowest floor, including basement, elevated at least one (1) foot above the base flood level or, together with attendant utility and sanitary facilities, be floodproofed so that below the base flood level plus one (1) foot the structure is watertight in accordance with the performance standards set forth in the city's building code. A registered professional engineer or architect shall develop or review structural design, specifications, and plans for the construction, and shall certify that the design and methods of construction meet the watertight performance standards. The certification shall be provided to the city as set forth in section 27.95.040 of this chapter.

(d) For all new construction and substantial improvements, fully enclosed areas below the lowest floor that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria:

1. A minimum of two (2) openings having a total net area of not less than one (1) square inch for every square foot of enclosed area subject to flooding shall be provided;
2. The bottom of all openings shall be no higher than one (1) foot above grade; and
3. Openings may be equipped with screens, louvers, or other coverings or devices; provided, that they permit the automatic entry and exit of floodwaters.

(e) Manufactured home parks and subdivisions. All manufactured homes shall be located in a manufactured home park or a manufactured home subdivision in accordance with sections 27.63.120 and 27.63.125 of this title. There shall be no manufactured homes allowed by the city within the designated flood plain unless the following conditions are met:

1. Manufactured home parks and manufactured home subdivisions, including new manufactured home parks or subdivisions,
   i. All manufactured homes to be placed or substantially improved on each individual lot in proposed manufactured home parks or subdivisions shall be elevated on a permanent foundation such that their lowest floor is at least one (1) foot above the base flood elevation and be securely anchored to an adequately anchored foundation system in accordance with applicable city regulations;
   ii. Adequate surface drainage and access for a hauler are provided;
   iii. In the instance of elevation on pilings, lots are large enough to permit steps; piling foundations are placed in stable soil no more than ten (10) feet apart; and reinforcement is provided for pilings more than six (6) feet above the ground level; and
   iv. The grade of land for manufactured home parks or subdivisions which are situated within the designated flood plain shall be raised at least one (1) foot above the base flood elevation.
(2) Manufactured homes, including those located in or outside of a manufactured home park or subdivision and existing manufactured homes that have incurred substantial damage as the result of a flood.

(i) They must be elevated at least one (1) foot above the base flood elevation or anchored to the elevated foundation to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top and frame ties to ground anchors;

(ii) Over-the-top ties must be provided at each of the four corners of the manufactured home, with two (2) additional ties per side at intermediate locations and manufactured homes less than fifty (50) feet requiring one (1) additional tie per side;

(iii) Frame ties must be provided at each corner of the manufactured home with five (5) additional ties per side at intermediate points; and manufactured homes less than fifty (50) feet long requiring four (4) additional ties per side;

(iv) All components of the anchoring system must be capable of carrying a force of four thousand eight hundred (4,800) pounds; and

(v) Any additions to the manufactured home must be similarly anchored.

(3) Recreational vehicles.

(ii) They shall be on the site for fewer than 180 consecutive days.

(iii) They shall only be fully licensed and ready for highway use (on its wheels or jacking system), is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions, or

(iv) Meet the requirements of manufactured homes.

(f) Floodways.

(1) Prohibit encroachments, including fill, new construction, substantial improvements, and other development within the floodway unless certification by a qualified engineer is provided demonstrating that encroachments shall not result in any increase in flood levels during occurrence of the base flood discharge.

(2) If the above provision is satisfied, all new construction and substantial improvements shall comply with all other applicable provisions contained in section 27.55.030.

(3) Prohibit the placement of any manufactured home parks and manufactured home subdivisions and the construction of new structures for human habitation within the floodway. (Ord. 15544; May 14, 1990; pri. Ord. 14600 1; June 6, 1983; Ord. 13425, as amended by Ord. 14642 3; April 6, 1987; Ord. 14314 3; February 3, 1986; Ord. 13738 1; December 19, 1983; Ord. 12701 7; October 2, 1979; Ord. 12571 270; May 8, 1979).

27.55.040 Administration. A development permit shall be required in conformance with the provisions of this chapter. All new construction of residential and nonresidential structures or land within the designated flood plain shall hereafter be in full compliance with the terms of this chapter and other applicable regulations. All existing residential and nonresidential structures that are not in compliance with the terms of this chapter shall be required to conform to these terms before substantial improvements can be made. It shall be the duty of the Administrator for Building and Safety to enforce this chapter. His duties shall include, but not be limited to:

(a) Review all development permits to assure that the permit requirements for this chapter have been satisfied;

1068 May 14, 1990
(b) Review proposed development to assure that all necessary permits have been obtained from those agencies from which prior approval is required by federal or state law, including section 404 of the federal water pollution control act amendments of 1972, 33 U.S.C. 1334;

(c) Notify affected adjacent communities and the Nebraska natural resources commission in riverine situations prior to any alteration or relocation of a watercourse, and submit copies of such notifications to FEMA, and assure that the flood-carrying capacity within the altered or relocated portion of any watercourse is maintained;

(d) Require a registered professional engineer or surveyor to verify the actual elevation in relation to mean sea level of the lowest floor, including basement, of all new or substantially improved structures and to which the new or substantially improved structures have been floodproofed. The certification of the lowest floor shall be submitted to superintendent for codes administration at the point of construction when the lowest floor elevation may be established and prior to the erection of the walls of any buildings. Such information shall be recorded and maintained by the assistant director for codes administration and Director of Building and Safety;

(e) Where floodproofing is utilized for a particular structure, obtain certification from a registered professional engineer or architect that the floodproofing methods are adequate in accordance with appropriate provisions of the city's building code;

(f) Where interpretation is needed as to the exact location of boundaries of the designated flood plain; for example, where there appears to be a conflict between a mapped boundary and actual field conditions, obtain the necessary interpretation from appropriate city engineering staff of the department of public works;

(g) When base flood elevation data have not been provided on the official map, obtain, review, and reasonably utilize any base flood elevation and floodway data available from a federal, state, or other source, as criteria for requiring that new construction, substantial improvements, or other developments in the flood plain meet the standards of this chapter. (Ord. 14542 4; April 6, 1987; prior Ord. 14314 4; February 3, 1986; Ord. 12701 8; October 1, 1979: Ord. 12571 271; May 8, 1979).

27.55.060 Permit procedures. Application for a development permit shall be made to the superintendent for codes administration on forms furnished by him and may include, but not be limited to, the plans drawn to scale showing the nature, location, dimensions, and elevations of the area in question, existing or proposed structures, fill, storage of materials, drainage facilities, and the location of the foregoing. Specifically, the following information is required:

27.57.120 Designation of landmarks and landmark districts. A site, structure, or area may be designated as a landmark or landmark district if it is of historical, cultural, architectural, or archeological importance as evidenced by meeting one or more of the following standards for designation:

(a) Associated with events, person, or persons who have made a significant contribution to the history, heritage, or culture of the city of Lincoln, the county of Lancaster, the state of Nebraska, or the United States;

(b) Represents a distinctive architectural style or innovation, or is the work of a craftsman whose individual work is significant in the development of the city of Lincoln, the county of Lancaster, the state of Nebraska, or the United States; or

(c) Represents archeological value in that it yields or may be likely to yield information pertaining to prehistory or history.

Any person, group of persons, or association may request the designation of a landmark or landmark district by submitting a petition for such designation to the planning department upon a form furnished by the planning department. The preservation commission, in addition, may on its own motion submit a petition for designation. The planning director shall transmit all petitions to the preservation commission.

Each petition forwarded to the preservation commission by the planning director shall be considered by the preservation commission at a public hearing with a public record kept. Notice of the time, place, and purpose of such public hearing shall be published by the planning department in a daily newspaper having general circulation in the city of Lincoln and shall be mailed to the owners of all property included in the proposed designation not less than eight (8) days prior to the date of the hearing, using for this purpose the name and addresses of the last known owners as indicated by the real property tax records of Lancaster county. The preservation commission may also give such other notice as may be deemed desirable and practicable.

Whenever possible, the preservation commission shall secure the written consent of the owner or owners before proceeding to secure
designation as a landmark. The preservation commission shall apply the "standards for designation" in its decision.

Within ninety (90) days of the receipt of the petition by the planning department, the preservation commission shall approve, disapprove, or modify the petition and shall notify the petitioner of its action. Petitions which are approved or approved as modified shall then be transmitted to the planning commission. Along with the petition, the preservation commission shall include a justification for the designation as a landmark or landmark district and its recommendations for guidelines for preservation of the landmark or landmark district.

The planning commission shall consider the petition at a public hearing with a public record kept. Notice of the hearing including posting of property shall be made according to Lincoln municipal code section 27.81.050. Such posting shall include the property contained in the original petition and the modified petition, if any, unless the applicant and the preservation commission agree otherwise. The planning commission shall consider the petition in light of the "standards for designation" and the degree of conformity with the city's comprehensive plan. Within sixty (60) days, the planning commission shall recommend approval, disapproval, modification, or continuance of the petition and shall notify the petitioner of its actions. All petitions except for those held for continued consideration shall then be transmitted to the city council.

Upon receipt of a petition, the city council may designate a landmark or landmark district by ordinance. The city council shall consider the "standards for designation" as well as the recommendations of the planning director, the preservation commission, and planning commission, and shall further give consideration to the economic consequences to the city and to the affected owners. The designation shall be by majority vote, except that if any owner of property to be designated as a landmark does not consent to such designation, the vote shall be by two-thirds of the council members. A landmark district shall not be designated if written protests are made by owners of at least fifty-one percent (51%) of the included property, excluding public right-of-way, at or prior to public hearing on the designating ordinance. The sufficiency of such protests shall be determined by the city council.

Each designating ordinance shall include a description and statement of the significance of the landmark or landmark district to justify its designation and a description of the particular features that should be preserved, a guideline for preservation of the landmark or landmark district including particular restrictions as to construction, alteration, repair, or demolition of the landmark or property within the landmark district, and the legal description of the landmark or landmark district.

Within ten (10) days after the effective date of the ordinance designating property as a landmark or a landmark district, the planning director shall send to the owner of record of such property so designated or each property within the designated landmark district, by registered or certified mail, a copy of the designating ordinance and a letter outlining the basis for such designation and the obligations and restrictions which result from such designation. Immediately after the effective date of the ordinance designating property as a landmark or landmark district, the city clerk shall file certified copies of the designating ordinance with the register of deeds and with the codes administration. (Ord. 13219 §1; October 12, 1981; prior Ord. 12910 §12; April 28, 1980).

27.57.130 Requirement of certificate for certain work. No person shall carry out or cause to be carried out on a landmark or in a landmark district any change in the appearance of a landmark or landmark district for
which a building permit or demolition permit is required, as specified in the Lincoln building code for the city, or any change restricted by the particular designating ordinance without a certificate issued by the preservation commission or the planning director as described below. Ordinary maintenance and repair not otherwise subject to a building permit regulation or restricted by the designating ordinance may be carried out without a certificate issued by the preservation commission. (Ord. 13468 § 1; September 27, 1962: prior Ord. 12910 § 13; April 28, 1980).

27.57.140 Procedures for certificate. The application for such certificate shall be filed with the codes administration and shall be accompanied by plans for the proposed work to be done and such other information as the codes administration director shall require. The codes administration shall review the application and plans for compliance with the existing building code ordinances and regulations. The application and plans shall be referred to the planning department.

The planning director may issue a certificate of "no material effect" if the application is for work which is not restricted by the designating ordinance and if the work contemplated in the application will have no effect on any architectural features of the landmark or landmark district as detailed in the particular designating ordinance and will be in harmony therewith.

Other applications shall be transmitted by the planning department to the preservation commission along with any recommendations by the codes administration and the planning department. Within sixty (60) days of receipt of the application by the codes administration, the preservation commission shall hold a public hearing on the applications received by the preservation commission. Notice of the time, place, and purpose of such hearing shall be published by the planning department in a daily newspaper having a general circulation in the city of Lincoln and shall be mailed to the certificate applicant not less than eight (8) days prior to the date of hearing. The preservation commission may also give such other notice as may be deemed desirable and necessary, including posting of the property affected.

During the public hearing, the preservation commission shall review the application and plans in light of the guideline for preservation of the property contained in the particular preservation designation ordinance for that landmark or landmark district. (Ord. 12910 § 14; April 28, 1980).

27.57.150 Certificate approval or denial. Within thirty (30) days of the hearing, the preservation commission shall approve or deny the application for the certificate for certain work on the landmark or in a landmark district.

The preservation commission:
(a) May issue a certificate of "appropriateness" if, after focusing upon aesthetic, historical, and architectural values, it finds that the proposed work would not unduly hinder the protection, enhancement, perpetuation, and use of the landmark or landmark district;
(b) May issue a certificate of "exception on the ground of insufficient return or hardship" if it finds that the landmark or property within the landmark district cannot yield a reasonable return if the proposed work is not permitted, that the plight of the applicant is due to unique circumstances, and that the hardship is the result of the application of the ordinance and is not the result of any act or omission by the applicant; or
(c) May refuse to issue a certificate, if it finds that the application does not meet any of the above criteria.

The preservation commission's decision must be accompanied by written findings of fact. No change shall be made in the application for any
building permit after issuance of a certificate by the preservation commission or the planning director without resubmittal to the preservation commission or the planning director and approval in the same manner as provided above. (Ord. 14082 §1; April 15, 1985: prior Ord. 12910 §15; April 28, 1980).

27.57.160 Procedure following certificate denial. If no certificate is issued, the applicant and the preservation commission shall enter into negotiations to develop a plan whereby modifications in the application would enable the preservation commission to issue a certificate under the criteria listed above and compatible with the guideline for preservation in the particular designation ordinance. If the proposed work involves demolition of all or a significant portion of a landmark or property within a landmark district or involves construction upon open areas of a landmark or within a landmark district and no acceptable plan is negotiated and approved by the applicant within three (3) months of the preservation commission's decision not to issue a certificate, the city may proceed by eminent domain proceedings to acquire the landmark or the affected property within the landmark district, but if the city does not initiate proceedings within ninety (90) days, the planning director shall issue a certificate of "allowance," permitting the applicant to proceed with the work as proposed in the application. If the proposed work on a landmark or in a landmark district is other than the above and no acceptable plan is negotiated and approved by the applicant within three (3) months of the preservation commission's decision not to issue a certificate, the planning director shall issue a certificate of "allowance," permitting the applicant to proceed with the work as proposed in the application. (Ord. 14082 §2; April 15, 1985: prior Ord. 12910 §16; April 28, 1980).

27.57.170 Hazardous structures. The planning director shall issue a certificate of "allowance on the ground of hazardous conditions" for razing a structure or other work if the codes administration has determined that the landmark or structure within the landmark district poses an immediate hazard to human health and safety. However, no owner shall by deliberate acts or deliberate neglect allow a landmark or property within a landmark district to become hazardous to human health and safety with the intent of then obtaining such permit. (Ord. 14082 §3; April 15, 1985: prior Ord. 12910 §17; April 28, 1980).

27.58.030 Use regulations. Any use permitted in the underlying zoning district in which the proposed use is located shall be allowed in the airport environs district 1 and airport environs district 2 except as prohibited within the provisions of this chapter and, provided that additional requirements set forth in this chapter are met. References to allowable uses as provided within this chapter are conditioned upon the said use being in compliance with allowable uses within the underlying zoning district. (Ord. 13414 §4; June 14, 1982).

27.58.040 Prohibited uses; airport environs district 1. (Ord. 13414 §5; June 14, 1982).

27.58.050 Permitted uses in relation to noise exposure levels. A use of a building or premises for the following purposes may be allowed in the airport environs district 1 if it lies within the specified noise exposure levels shown below, but outside of airport environs district 2, conditioned upon compliance with section 27.58.060 of this chapter.

(a) Mobile home courts, schools, libraries, churches, health care facilities, auditoriums, concert halls, housing for the elderly, and music shells, not to exceed Ldn 65 line.

However, at such time as said property shall be subdivided or platted, any platted buildable lots intersected by an Ldn line shall be deemed to be wholly within the highest Ldn line. (Ord. 13414 §6; June 14, 1982).

27.58.060 Conditional residential uses. A building or premises may be used for residential purposes except mobile home courts, health care facilities, and housing for the elderly, in areas between Ldn 65 line and Ldn 70
line, except within airport environs district 2, in conformance with the requirements of section 27.58.050 of this title and the conditions prescribed herein:

(a) Prior to applying for a building permit, an applicant shall prepare and submit to the planning director for his review and approval a site plan for the proposed building or buildings which shall be designed to minimize the impact of noise. This may include, but need not be limited to:

(1) Placing as much distance as possible between the noise source and noise-sensitive activities;
(2) Placing noise-compatible activities, such as parking lots and open space, between the noise source and the sensitive activities;
(3) Using buildings as noise barriers;
(4) Orienting buildings so that nonhabitable space, such as utility rooms, laundry rooms and garages, are located between the noise source and the habitable space;
(5) Utilizing the site's natural shape and contours or constructing noise barriers between noise sources and noise-sensitive areas. Such noise barriers may include, but need not be limited to, berms made of sloping mounds of earth, walls and fences constructed of a variety of material, dense plantings of trees and shrubs, e.g., 100-foot depth, and any of these combinations.

(b) The site plan submitted to the planning director shall be accompanied by the following information:

(1) An accurately drawn plan showing location of existing and proposed structures on the property, open space, parking areas, location of existing trees, proposed landscape plans, sidewalks, floor plan identifying bedrooms, kitchens, living rooms, garages, etc., lot lines and building setback lines;

(7) Name, address and telephone number of applicant;
(8) Other relevant information, if any, relating to noise attenuation.

(c) Within twenty (20) days from the receipt of a site plan with the required information, the planning director shall notify the applicant and the superintendent for codes administration whether or not the site plan has been approved or disapproved. If the site plan is disapproved, the planning director shall specify the reasons for such disapproval. A site plan shall be approved if it reflects a reasonably effective method of minimizing the impact of the noise to which the proposed building or buildings would be subjected.

(d) If the site plan is approved by the planning director, a building permit may be issued by the superintendent for codes administration provided that the building plan shows a design that incorporates acoustical features described below in addition to all other applicable requirements of the Lincoln building code as now existing or hereinafter amended:

(1) All exterior doors shall be either:
   (i) solid-core or metal-clad construction of at least 1 3/4 inches thick, or
   (ii) separately equipped with wood or metal storm door.
(2) Storm or multiple-glazed windows shall be provided for all habitable space.
(3) Through-the-wall/door mailboxes, window or dome skylights, jalousie windows, or other direct openings from the interior to the

(4) Mechanical ventilation shall be provided of a type and design to provide adequate environmental comfort with all doors and windows closed during all seasons. Window and through-the-wall ventilation units shall not be used.

(5) Workmanship on doors and windows must be such that they are as close-fitting as possible or weather-stripping seals shall be incorporated on all edges to eliminate gaps.

(a) In the event that the planning director disapproves the site plan, the applicant may, within ten (10) days after notification of such disapproval, appeal the decision of the planning director to the city council. The city council shall, by resolution, affirm, reverse, or modify the decision of the planning director. (Ord. 13414 §7; June 14, 1982).

27.58.070 Prohibited uses, airport environs district 2. All residential use is prohibited within airport environs district 2, except pre-existing uses as provided in section 27.58.090. 27.58.080 Avigation and noise easements; covenant, notice and acknowledgment. (a) All uses allowed within airport environs district 2 except as provided in section 27.58.090 shall be conditioned upon an acknowledgment by the property owner of the airport noise and overflight impact by the grant of an avigation and noise easement to the airport authority of the city of Lincoln, Nebraska, providing for disclosure of the impact to future purchasers, as a condition of subdivision, community unit plan, use permit, or building permit. Avigation easements submitted pursuant to the terms of this chapter shall conform to the provisions contained in the model avigation and noise easement, a copy of which shall remain on file in the office of the executive director of the Lincoln airport authority and the city clerk of the city of Lincoln.

Covenant, notice, and acknowledgment that property is located in airport environs district 1 to be submitted pursuant to the terms of this chapter shall conform to the provisions contained in the model covenant, a copy of which shall remain on file in the office of the executive director of the Lincoln airport authority and the city clerk of the city of Lincoln. (Ord. 13414 §9; June 14, 1982).

27.58.090 Pre-existing uses. Any existing use which was lawfully established at the time of the effective date of this chapter may be continued although such use does not conform to the provisions hereof. However, the requirements set forth in this chapter shall be applicable to the portion of the use subject to enlargement, extension, conversion, reconstruction, or structural alteration, and not be retroactive to the entire existing structure. Nothing shall prohibit the reconstruction of a building legally in use at the time of the adoption of this chapter. A request for enlargement, extension, conversion, reconstruction, or structural alteration of a pre-existing use which does not conform to the provisions of this chapter shall be processed through special permit procedures set forth in chapter 27.63. No
27.58.100 Enforcement and exemption. (a) Prior to the issuance of a building permit or other certificate, the superintendent of codes administration shall receive either the executed avigation and noise easement for property in airport environs district 2 or the executed covenant, notice, and acknowledgment for property in airport environs district 1 which shall then be forwarded to the airport authority or shall have received evidence that the executed easement or covenant was previously furnished to the airport authority. All easements and covenants shall be forwarded to the airport authority, which shall then be filed with the register of deeds at authority's expense.

(b) Uses in connection with the operation of the Lincoln municipal airport, and properties owned or leased by the city of Lincoln, the airport authority of the city of Lincoln, military units, or other governmental agencies are hereby declared compatible and shall be exempted from the requirements of this chapter. 27.59.020 Location and boundaries. The vicinity of the airport, located in sections 4, 5, 6, 7, 8, 9, 17 and 18, township 10 north, and sections 31 and 32, township 11 north, range 6 east of the sixth principal meridian, Lancaster County, Nebraska, specifically being the area lying within the outer limits of a series of points forming a line which is a horizontal distance of three miles from the airport boundary or the corporate limits of the city, whichever is the lesser distance from the airport boundary line, as shown on the attached airport zoning map, is hereby declared an airport hazard area and is hereby zoned as follows:
The hazard area consists of approach zones, turning zones, and transition zones.
(a) The outer boundary of the hazard area is composed of a series of connected tangents and simple curves which also constitute the outer boundaries of the approach and turning zones.
(b) The inner boundary of the hazard area is a boundary line consisting of a series of intersecting tangents, five hundred (500) feet from and parallel to the centerlines of the runways and connecting the inner boundaries of adjacent approach zones at the ends of the runways. (Ord. 12571 §281; May 8, 1979).

27.59.030 Zone descriptions. (a) An approach zone is located at each end of each existing or proposed runway for the landing or taking off of airplanes. Such approach zones begin two hundred (200) feet beyond the ends of the respective runways, and at such beginning are one thousand (1,000) feet in width, five hundred (500) feet on each side of the respective centerline, and extend and expand uniformly centered along the extended centerline of the respective runways to the outer boundary of the approach and turning zones at a rate of thirty (30) feet of width for each one hundred (100) feet of horizontal length for each runway.

The inner area of each approach zone is that portion of the approach zone beginning two hundred (200) feet beyond the end of the respective or proposed runway and extending to the intersection of the controlling glide angle with a plane one hundred fifty (150) feet above the highest elevations of the ends of the respective runways, at a rate of one foot vertically for each fifty (50) feet horizontally.

The outer area of each approach zone is the area between the inner area of the approach zone and the outer limit of the approach and turning zones.

(b) The transition zones are the areas bounded by the inner boundary of the hazard area, the sides of contiguous inner areas of approach zones and the outer limits of the transition zones; said outer limits of the transition zones being the intersections, at elevations of one hundred fifty (150) feet above the highest elevation at the ends or edges of the closest runway, or proposed runway, of a series of contiguous planes originating from bases established by the inner boundary of the hazard area and the edges of adjacent inner areas of approach zones; the planes rising from their respective bases at the rate of one foot vertically to seven (7) feet horizontally to the lines of intersection previously referred to.

(c) The turning zones comprise all portions of the zoned area not contained in the approach zones and transition zones. The outer limits of the turning zones are a series of points forming a line which is a horizontal distance of three (3) statute miles from the airport boundary line or the corporate limits of the city, whichever is the lesser distance from the airport, as shown on the attached airport zoning map. (Ord. 12571 §282; May 8, 1979).

27.59.040 Height restrictions. No building or structure, smokestack, chimney, tower, or other structure or appurtenance thereof of any kind or character shall hereafter be erected, constructed, repaired, or established except as otherwise provided in section 27.59.050:

(a) In inner areas of approach zones to a height above the planes forming the inner area of the approach zones;

(b) In the outer area of approach zones and in turning zones to a height in excess of one hundred fifty (150) feet above the elevation at the closest point on the nearest runway, or to a height in excess of seventy-five (75) feet above the elevation of the natural ground at the location of the structure; except a maximum height of two hundred seventy-five (275) feet shall be permitted in the following described area:

Beginning at a point one hundred and forty-two (142) feet west of the west line of Tenth Street and one hundred and fifty (150) feet south of the south line of "R" Street; thence south to the centerline of "Q" Street; thence east along the centerline of "Q" Street.
to its intersection with the centerline of the north-south alley between 9th and 10th and "P" and "Q" Streets; thence south along said line to the centerline of the east-west alley between 9th and 10th and "P" and "Q" Streets; thence west along said line to a point one hundred (100) feet west of the west line of 9th Street; thence south to the centerline of "P" Street; thence west along the centerline of "P" Street to its intersection with the centerline of the north-south alley between 8th and 9th and "O" and "P" Streets; thence south along said line to the centerline of "O" Street; thence west along the centerline of "O" Street to a point one hundred and fifty (150) feet west of the west line of 9th Street; thence south to the centerline of the east-west alley between 8th and 9th and "N" and "O" Streets; thence east along said line to the centerline of the north-south alley between 9th and 10th and "N" and "O" Streets; thence south along said line to the centerline of "K" Street; thence east along the centerline of "K" Street to its intersection with the centerline of the north-south alley between 10th and 11th and "L" and "K" Streets; thence south along said line to a point one hundred and fifty (150) feet south of the south line of "K" Street; thence east to the centerline of 11th Street; thence north along the centerline of 11th Street to the centerline of "K" Street; thence east along the centerline of "K" Street to the centerline of 12th Street; thence north along the centerline of 12th Street to the centerline of "L" Street; thence east along the centerline of "L" Street to the centerline of 13th Street; thence north along the centerline of 13th Street to the centerline of "M" Street; thence east along the centerline of "M" Street to the centerline of 14th Street; thence north along the centerline of 14th Street to the centerline of "N" Street; thence east along the centerline of "N" Street to the centerline of 15th Street; thence north along the centerline of 15th Street to the centerline of "O" Street; thence east along the centerline of "O" Street to a point one hundred fifty (150) feet east of the east line of 15th Street; thence north to the centerline of the east-west alley between 15th and 16th and "Q" and "R" Streets; thence west along said line to a point one hundred and fifty (150) feet west of the west line of 15th Street; thence north to a point ninety-five (95) feet south of the south line of "R" Street; thence west to the centerline of 14th Street; thence south along the centerline of the east-west alley between 13th and 14th and "Q" and "R" Streets; thence west along the said line to the point of beginning, and more specifically set forth upon a map which is attached hereto and made a part of this title, which map is designated as the airport zoning map.

(c) In the transition zones to a height above the planes forming the transition slopes;

(d) Within the inner boundary of the hazard area and in the existing or proposed runways to a height above the existing or proposed finished
27.59.050 Airport zoning map. The boundaries, approach zones, transition zones, and turning zones and all areas thereof as indicated on the location sketch and airport zoning map which accompanies and is hereby made a part of this ordinance, a copy of which shall at all times be on file in the office of the city clerk. (Ord. 12571 §285; May 8, 1979).

27.59.060 Permit required; procedure. (a) It is thereafter unlawful to erect, construct, reconstruct, repair, or establish any building, tower, smokestack, chimney, or other structure or appurtenances thereto of any kind or character within the boundary of the zoned hazard area of said airport without first obtaining a height permit from the building official.

(b) In the outer area of approach zones and within the turning zones, no height permit shall be required generally for construction which is no higher than seventy-five (75) feet above the elevation of the natural ground at the point of construction, except in specifically "shaded" areas indicated on the airport zoning map. Structures or buildings proposed to be constructed within or in close proximity to such "shaded" areas on said map shall require certification as to elevation if in the opinion of the building official such structure or building may exceed the allowable height of that particular "shaded" portion of the map.

(c) Application for a height permit as required under the provisions of this chapter shall be made upon a form which is available in the office of the building official. The application shall indicate the location, ground elevation with reference to the elevation at the closest point on a runway, and the height of the proposed structure. Said elevation shall be certified by a land surveyor, registered by the state of Nebraska, which certificate must accompany said application. (Ord. 12571 §284; May 8, 1979).

27.59.070 Airport hazards. (a) The building official shall examine or cause to be examined any transmission line, pole, tree, wires, or other structures or natural growth, not included in section 27.59.060, reported to him as an airport hazard within the hazard area, and if such is found to be an airport hazard as defined in section 27.59.010, it shall be the duty of the building official to give the owner of the property where such hazard exists written notice thereof, and to take such measures as are necessary and authorized by law to eliminate or alleviate said hazard. For the purpose of aiding the building official to determine whether the existence of any such reported transmission line, pole, tree, wires, or other structures or natural growth constitute an airport hazard, the building official may in each case request a written report from the state department of aeronautics under the provisions of Neb. Rev. Stat. §§ 3-106 and 3-113 (reissue 1973) to advise whether or not an airport hazard, as defined in this chapter, exists.

(b) Notwithstanding any other provisions of this title, no use may be made of land within any zone established by this ordinance in such a manner as to create electrical interference with radio communication between the airport and aircraft, make it difficult for fliers to distinguish between airport lights and others, result in glare in the eyes of fliers using the airport, impair visibility in the vicinity of the airport, or otherwise endanger the landing, take-off, or maneuvering of aircraft. (Ord. 12571 §286; May 8, 1979).
AIRPORT ZONING

27.59.080 Nonconforming height. Within the zoned hazard area as hereinbefore defined, the lawful height of a building, structure, or premises existing at the time of the effective date of this chapter may be continued although such height does not conform to the provisions hereof. Within the zoned area no nonconforming building, structure, smokestack, chimney, or appurtenance thereof of any kind or character shall hereafter be replaced, substantially reconstructed, repaired, or altered to a height which constitutes a greater hazard to air navigation than existed before the effective date of this chapter, nor above the heights permitted by this chapter if such structures are torn down, destroyed, burned, deteriorated, or decayed to an extent of sixty percent (60%) or more, or abandoned for a period of twelve months or more. (Ord. 12571 §287; May 8, 1979).

The PUD planned unit development district is intended to permit private or public development or redevelopment of areas throughout the city which shall be substantially in accordance with goals and objectives of the comprehensive plan for the City of Lincoln. The proposed development shall provide a desirable environment and shall be harmonious with the general surrounding uses while permitting flexibility in overall development.

27.60.010 General purpose. The purpose of this chapter is to provide a mechanism for the approval of planned developments so as to permit private and public development or redevelopment of areas throughout the city in the form of an overlay zone intended to be used in combination with one or more of the city’s existing zoning districts. Planned unit development districts are intended to promote the public convenience and necessity; protect the health, safety, and welfare, and are to be used when it is necessary or appropriate to:

(a) Permit flexibility in the regulation of land development;
(b) Encourage innovation in land use and variety in design, layout, and type of structures constructed;
(c) Achieve economy and efficiency in the use of land, natural resources, energy, and the provision of public services and utilities;
(d) Encourage the preservation and provision of useful open space;
(e) Provide improved housing, employment, or shopping opportunities particularly suited to the needs of an area. (Ord. 13896 §1; July 23, 1984).

27.60.020 Use regulations. (a) General planned unit development. The owner or owners of any tract of land which meets the minimum acreage requirements set forth in subsection 27.60.020(a)(1) below may apply for a general planned unit development designation in any zoning district except the AG agriculture, the AGR agricultural residential, or the I-4 industrial reserve districts. Use regulations of the zoning district within which the general planned unit development is proposed shall apply except as specifically modified by the approval of different or additional uses by the city council.
through the adoption of a development plan as hereinafter set forth. The development plan may propose, and the city council may approve, any permitted, conditional, or special use permitted in the R-1 residential district through the R-8 residential district, or the B-1 local business district, or any permitted use, but not any permitted special use, permitted in the I-1 industrial district, and, unless specifically modified by the city council as hereinafter set forth, the height and area, parking, and accessory use regulations applicable to such uses shall be those district regulations for districts within which such uses are permitted. If the planned unit development is located in a residential zoning district or districts, the average lot area per family within the general planned unit development shall not be less than the average lot area per family required for a community unit plan in such residential zoning district or districts. If the planned unit development is located in other than a residential zoning district, the average lot area per family shall not be less than that provided for in subsections 27.60.020(b)(2) and (b)(3) of the Zoning Code. The maximum residential density of a planned unit development shall be determined in accordance with the community unit plan design standards adopted by resolution of the City Council. Planned unit developments which comply with housing for the handicapped, housing for the low income, and energy efficient housing standards adopted by resolution of the City Council may receive dwelling bonuses not to exceed a total of twenty percent (20%). Those uses which may be approved as a part of a general planned unit development that would otherwise be permitted shall be compatible with adjacent land uses. The following conditions shall apply to a general planned unit development:

1) Minimum district size. Three (3) acres;

2) Use regulations. For those uses not otherwise permitted in the zoning districts for which the general planned unit development is proposed, the following shall apply:

3) In residential districts, not more than ten percent (10%) of the total land area in the proposed district shall be devoted to commercial or office space uses, and no one business or non-residential use shall occupy more than five thousand (5,000) square feet of floor area; provided, however, that if planned unit developments of 150 acres or more, including existing public right-of-way up to the centerline thereof which abuts the land included within the planned development, a business or non-residential use may occupy up to 15,000 square feet of floor area, so long as the aggregate amount of floor area exceeding 5,000 square feet for such businesses or non-residential uses shall not exceed twenty percent (20%) of the total floor area of the planned unit development devoted to non-residential and business uses.

Total land area for uses not otherwise permitted in the underlying zone shall include the actual building site, accessory parking, open space, and other land area directly serving or related to the land use. Industrial or manufacturing land uses shall not occupy more than ten percent (10%) of the total land area in the proposed district; provided, that in no case shall the combination of nonresidential land uses exceed fifteen percent (15%) of the total land area of the proposed district.
(ii) In commercial districts, not more than forty percent (40%) of the total land area (as defined above) in the proposed district shall be utilized for residential or industrial land uses that would not otherwise be permitted. The maximum density at which residential development may take place shall not exceed that which would be allowed for an equal area developed as a community unit plan in an R-5 residential district.

(iii) In industrial districts, not more than ten percent (10%) of the land area may be used for residential or commercial land uses that would not otherwise be permitted. The maximum density at which residential development may take place shall not exceed that which would be allowed for an equal area developed as a community unit plan in an R-5 residential district.

(iv) The city council shall require such landscaping, screening, traffic access, and setbacks as are necessary to protect and enhance neighboring areas within or adjacent to the planned unit development;

(v) Transfer of zoning. Where there is more than one (1) underlying zoning district within the boundaries of a tract proposed as a general planned unit development, the council may approve the transfer of permitted uses of the underlying zoning, in equal proportion of total land area, to any part of the proposed tract where such transfer will promote the intent and purpose of this section.

(vi) Area, height, and parking requirements. The development plan shall specify parking, area, and height restrictions for the project as a whole or for subareas or components of the project as appropriate. The development plan shall specifically identify development proposals which are not in conformity with applicable standards and provide evidence supporting deviations from such standards. The city council may impose alternate or additional standards or restrictions to achieve the intent of this ordinance. In making its determination regarding such standards or restrictions, the city council may consider the character and scale of the proposed development as it relates to other uses and structures both within the district and outside the district, the general character and scale of similar development within the area of the proposal, and consistency with other adopted plans or standards.

(b) Corporate office park planned unit development. The owner or owners of any tract of land within the "future urban area" boundary as designated in the comprehensive plan and within two (2) miles of any community or regional multi-use center, may submit to the city council a plan for the use and development of the land for a corporate office park planned unit development. In addition to the conditions contained in other chapters of this title, the following conditions shall apply to the corporate office park planned unit development:

1. The distance between corporate office park planned unit developments, measured from lot line to lot line, shall be not less than one thousand (1,000) feet.

2. Minimum size. Ten (10) acres;

3. Maximum total building floor area ratio (FAR). The maximum total building floor area ratio for all uses in the corporate office park planned unit development shall not exceed twenty-eight percent (28%) of the total land area included in the corporate office park planned unit development.
(4) Maximum total building floor area. No corporate office park
planned unit development shall contain more than two hundred thousand
(200,000) square feet of the six hundred thousand (600,000) square feet of
office space allocated to corporate office parks in the Comprehensive
Plan. The City Council may approve on a one-to-one (1:1) ratio the
transfer of all or part of the unused office space from one (1) approved
B-5 community multi-use center to a corporate office park planned unit
development located within two (2) miles of said community multi-use
center. The request to transfer the unused office space from the B-5
community multi-use center shall be accompanied by a request from the owner
of the affected B-5 community multi-use center to amend the comprehensive
plan to transfer unused designated office space from the B-5 community
multi-use center to the corporate office park planned unit development.
The ordinance approving the transfer of such unused office space to the
corporate office park planned unit development shall be conditioned upon
approval of the comprehensive plan amendment. If applicable, the ordinance
shall also be conditioned upon the owner of the B-5 community multi-use
center submitting a request to the planning director to amend an existing
use permit for the affected B-5 community multi-use center to reduce the
amount of approved office space to the amount designated in the
comprehensive plan as amended.
(5) Minimum tenant space. Except for buildings whose total floor area is one hundred percent (100%) occupied by recreational facilities, motels and hotels, and child care centers, at least fifty percent (50%) of the total floor area of any building constructed within a corporate office park planned unit development shall at a minimum be occupied by the administrative offices of a single association, corporation, or similar organization. The balance of space in each building may be occupied by accessory uses or other permitted uses.

(6) Permitted uses. The corporate office park planned unit development shall be used for the administrative offices of associations, corporations or other similar organizations, general purpose office uses not frequently or regularly used or visited by the general public or offices for manufacturer’s agents, provided no manufacturing, handling, shipping, or exterior display of merchandise shall be permitted. No other uses shall be permitted.

(7) Accessory uses. Permitted accessory uses shall be incidental to the permitted uses and shall be limited to:

(i) Parks, playgrounds, and community buildings, owned and operated by a public agency;
(ii) Banks, savings and loan associations, credit unions, and finance companies;
(iii) Barber shops, beauty parlors, and shoeshine shops;
(iv) Child care centers;
(v) Restaurants;
(vi) Motels and hotels; and
(vii) Recreational facilities.

Except for motels and hotels and child care centers, accessory uses shall not exceed fifteen percent (15%) of the total building floor area contained within the corporate office park planned unit development.

Except for recreational facilities, motels and hotels, and child care centers, the total area occupied by an accessory use shall be located within a building whose total floor area is at least fifty percent (50%) occupied by the administrative offices of a single association, corporation, or similar organization.

(8) Design standards. The corporate office park planned unit development shall comply with design standards for corporate office park planned unit developments established by resolution of the City Council.

(9) Parking. The corporate office park planned unit development shall provide one (1) parking space for every three hundred (300) square feet of floor area. Parking is prohibited within the setback required by subsection 27.60.020(b)(11) below. Parking lots shall be constructed in accordance with section 27.67.100 of the Lincoln Municipal Code.

(10) Street trees. Street trees shall be provided on private property and shall comply with the design standards for street tree plantings as established by resolution of the City Council.

(11) Height and area regulations. The corporate office park planned unit development shall have a required setback of fifty (50) feet along the entire length of the perimeter of the park. The maximum building height shall be eighty (80) feet. However, if the building exceeds thirty (30) feet in height, the minimum setback for the building only from any property line which abuts a residentially zoned property shall be increased by two (2) feet for each one (1) foot of building height over thirty (30) feet.
A property line which abuts an arterial street shall not be considered to abut residentially zoned property for purposes of this section.

(c) Public facilities. The development plan for general and corporate office park planned unit developments shall specify the standards and installation schedule of necessary public facilities as required. The development plan shall address the impact and needs of the proposed development on existing and proposed street and utility systems. The city council may impose conditions, restrictions, or standards as appropriate to achieve the intent of this ordinance, dedication of necessary rights-of-way or easements. In making its determination regarding such conditions, restrictions, or standards, the council may consider the adequacy of existing or adjacent facilities, the timely provision of adequate facilities, the impact of the proposed development on existing and/or planned facilities, and the overall cost to the community.

(d) Signs. (1) The following standards shall apply to general planned unit developments:

(1) In addition to an on-premise wall sign not exceeding two (2) square feet of copy area, nonilluminated and nonreflecting, to identify home occupations, block parents, or to provide similar information, the residential portion of a general planned unit development may provide a wall sign or ground sign not to exceed six (6) square feet of copy area, nonilluminated and nonreflecting, to identify the development.

(ii) Where a commercial or industrial use is proposed that would not otherwise be permitted in the underlying district or by reason of a zoning transfer authorized by section 27.60.020(a)(2)(v), such uses shall be limited to a wall sign not to exceed one (1) square foot of copy area for every one hundred (100) square feet of floor area; provided, that a ground sign, not exceeding eight (8) feet in height, may be utilized in conjunction with those uses abutting an arterial street. Such ground sign may be used in lieu of the permitted wall sign or in combination with permitted wall signs where the total copy area does not exceed one (1) square foot of copy area for every one hundred (100) square feet of floor area. All such signs may be illuminated except where they contain advertising for a specific product. In all other instances, signs for commercial uses shall be governed by sections 27.69.044 and 27.69.045, except no sign shall exceed the height of the nearest building or twenty-five (25) feet, whichever is less. In all other instances, signs for industrial uses shall be governed by section 27.69.080.

(iii) The city council may approve permitted signs in the required yards and may permit area identification ground signs within the general planned unit development. The area identification signs may include tenant and business directories.

(2) Corporate office park planned unit developments shall be governed by section 27.69.085 of the Lincoln municipal code.

(e) Perimeter treatment. Where any portion of the total land area of a land use is proposed to be adjacent to the perimeter and such land use is not permitted in the adjacent district, the applicant must demonstrate how the proposal will mitigate any negative impacts. The city council shall impose such other standards and requirements for perimeter treatment to protect adjoining properties from adverse effects and to achieve an appropriate transition of land uses and densities. (Ord. 15072; July 23, 1990: prior Ord. 15164; May 8, 1989; Ord. 15154; April 17, 1989; Ord. 14676 1; June 1, 1987: Ord. 13886, as amended by Ord. 14020 1; January 7, 1985).
27.60.030 Pre-application; procedures and requirements. (a) The owner or owners of any tract of land proposed to be developed as a general or corporate office park planned unit development shall file a pre-application for such planned unit development designation with the planning director. The pre-application shall be in writing and shall include:

(1) A letter of intent generally describing in narrative form the proposed development and its location, a brief discussion of the consistency or inconsistency of the proposed development with the comprehensive plan, and how the development will potentially impact the land surrounding the tracts for the proposed development and the community generally;

(2) Sketch plans and land use arrangements showing proposed building types, uses and densities, traffic, and pedestrian circulation and access;

(3) Preliminary proposals regarding water supply, sewerage, surface drainage, and street improvements;

For purposes of this chapter, landscaped open space ratio shall mean the percent of an area devoted to and maintained for the growing of trees, shrubbery, lawns, and other plant materials, and lakes, streams, and other natural features. Said calculations to be made in conformance with the design standards for corporate office park planned unit developments.

(5) A request to waive the preliminary plan and reasons supporting the waiver should the developer desire to proceed directly to the final plan.

The planning director shall distribute copies of the application and all accompanying materials to other city departments and governmental agencies which are directly concerned or potentially affected by the proposed planned unit development. Within fifteen (15) days from the filing of the pre-application, the planning director and representatives of those city departments and governmental agencies described above shall meet to review with the applicant the proposed planned unit development and make recommendations thereon. Within fifteen (15) days after such meeting, the city departments and governmental agencies described above shall provide written recommendations to the planning director who shall, within fifteen (15) days thereafter, prepare a written report to the applicant. Such report shall specify the planning director’s recommendations regarding the conformity of the proposal to the comprehensive plan and shall recommend either approval, approval with revisions, or denial, as the case may be, and approval or denial of the request to waive the preliminary plan review.

(b) The planning director is authorized to approve a waiver of the preliminary plan provided the proposal is found to meet the following criteria:

(1) The proposal is in substantial conformance to the comprehensive plan;

(2) The existing or planned utilities and streets are adequate to serve the proposed development;

(3) The proposal is in substantial conformance with the adopted design standards of the City of Lincoln.

In addition to finding that the proposal meets the above criteria, the planning director shall consider the following in reviewing a request for a waiver of the preliminary plan:

(4) The size and phasing of the project;

(5) The impact of the proposal on the surrounding neighborhood;
PLANNED UNIT DEVELOPMENT

(6) The degree of deviation from the allowed uses in the underlying zoning districts.

(c) Upon receipt of the planning director's report, an applicant shall thereafter have one year within which to:

(1) File a preliminary plan for approval of a planned unit development, or

(2) File a final plan if the planning director has granted a waiver of the preliminary plan. (Ord. 15164 §5; May 8, 1989; prior Ord. 14584 §1; January 20, 1987: Ord. 13896 §3; July 23, 1984).

Single trees which are three (3) inches in caliper or larger measured five (5) feet above the ground must be shown. However, if five (5) or more trees are located so that each is within ten (10) feet of the edge of another tree, they will be considered a tree mass and the outline of the tree mass may be shown, with a list of the common names of the trees which are within the tree mass. If the above-stated procedure is followed, the individual location of each tree within the tree mass is not necessary. An indication shall be made on the map showing which trees or tree masses are to remain and which trees or tree masses are to be removed.

(h) Environmental impact statement and market analysis. If any application for a planned unit development under the provisions of this chapter substantially deviates from the comprehensive plan in terms of location or size, as determined by the planning director, the applicant shall submit an environmental impact statement and a market analysis, which shall serve as a guide to the city council and planning commission for evaluation of such application in terms of need, desirability, supportability, and its implications for the overall growth of the community.

(i) All deviations shall be fully set forth and reasons given for said deviations.

(j) Phased development plans. Each application for a planned unit development district shall include a phasing plan. Phasing is the development time schedule which specifies the order and timing of improvements and construction for specific portions of the project and the project as a whole.

Where an application proposes uses which are not contained in the use regulations of the underlying zoning district, the planned unit development shall contain phasing which ensures compatibility of the development with surrounding properties by constructing uses permitted in the underlying zoning district in not less than equal proportion to those uses not otherwise permitted.

(k) Additional information for corporate office park planned unit developments. Each application for a corporate office park planned unit development shall include in addition to the above required information:

1. A recreational plan for corporate office park planned unit developments in conformance with city design standards.

3. Calculation of the building floor area ratio in conformance with city design standards.

27.60.040 Preliminary plan; procedure. Unless the preliminary plan review is waived, a preliminary plan shall be filed within one (1) year of the planning director's letter. Upon filing of a preliminary plan, together with all maps, data, and information required, the application shall be presented to the planning commission. The planning commission shall hold a public hearing on such application and provide notice thereof in accordance with section 27.81.050 of this code, and shall thereafter make a report to the City Council regarding the effect of the proposed planned unit development upon the surrounding neighborhood, the community as a whole, and other matters relating to public health, safety, and general welfare. The report of the planning commission to the city council shall include reasons for recommending approval or denial of any application, and, if approval is recommended, shall find that the proposed planned unit development meets the following conditions:
ZONING

(a) That the land surrounding the tracts for the proposed planned unit development will not be adversely affected;
(b) That the proposed planned unit development is consistent with the intent and purpose of this title to promote the public health, safety, and general welfare;
(c) That the buildings and land in the proposed planned unit development shall be used only for those purposes permitted by section 27.60.020 of this chapter.

The city council shall take no final action upon any application for a planned unit development under this preliminary plan until a report from the planning commission has been filed with the city clerk; provided, that in the event that there is a delay of more than one hundred twenty (120) days from the planning commission's initial public hearing date on the part of the planning commission in reporting its recommendation to the city council, the applicant may appeal to the City Council requesting final action. If the city council determines that the delay of the planning commission is unjustified, it shall direct the commission to submit a report no later than immediately after the commission’s next regularly scheduled meeting.

Upon receipt of a report from the planning commission, the City Council shall proceed to give final consideration to the preliminary plan and require that certain conditions be fulfilled by the applicant in conjunction with approval of the preliminary plan development.

Approval of a preliminary plan shall be by resolution after public hearing, in accordance with the requirements of section 27.81.050 of this code. (Ord. 14584 §4, January 20, 1987; prior Ord. 13896 §4, July 23, 1984).

27.60.050 Council consideration and final action. (Repealed by Ord. 14584 §5, January 20, 1987; prior Ord. 13896 §5, July 23, 1984).

27.60.060 Final plan; form. The final plan application for a general or corporate office park planned unit development shall be in the same form as a preliminary plan, including the following:
(a) A certified, accurate boundary survey with sufficient linear, angular, and curve data to determine the bearing and length of all boundary lines of the planned unit development. Where the tract of land abuts on an existing plat, the distances, angles, and bearing of any common boundary line shall be shown, and any differences in measurement noted. The total calculated acres within the boundaries of the planned unit development shall be shown;
(b) Buildings to be included in first phase construction shall include tenant occupancy, where known. A clear demonstration shall be made that proposed residential uses will be protected from adverse effects, such as traffic, air pollution, noise, and glare;
(c) Cross-section for paving of parking lots, sidewalks, streets, private roadways, and driveways;
(d) A landscape plan in conformance with city standards in all required yard areas, open space areas, malls, parking areas, and around proposed buildings. (Ord. 15164 §7, May 8, 1989; prior Ord. 14584 §6, January 20, 1987).

27.60.066 Final plan; procedure. (a) Upon the City Council’s approval of a preliminary plan or waiver of the preliminary plan by the planning director, an applicant shall have one (1) year within which to file an application for a final plan. Any
change of the underlying zoning district shall accompany the application. Should the applicant choose to subdivide the land in the planned unit development, a preliminary plat and the final plan for a planned unit development may be submitted at the same time and reviewed together.

Upon the filing of a final plan, together with all maps, data, and information required, the City Council shall refer the application to the planning commission. The planning commission shall hold a public hearing on such application and provide notice thereof in accordance with section 27.81.050 of this code, and shall thereafter make a report to the City Council regarding compliance with the approved preliminary plan.

The City Council shall take no final action upon any application for a planned unit development under this chapter until a report from the planning commission has been filed with the city clerk; provided, that in the event there is a delay of more than one hundred twenty (120) days from the date of referral on the part of the planning commission in reporting its recommendation to the City Council, the applicant may appeal to the City Council requesting final action. If the City Council determines that the delay of the planning commission is unjustified, it shall direct the commission to submit a report no later than immediately after the commission’s next regularly scheduled meeting.

Upon receipt of a report from the planning commission, the City Council shall proceed to give final consideration to the final plan and require that certain conditions be fulfilled by the applicant in conjunction with approval of the planned unit development, and may include the requirement that applicant grant additional right-of-way in accordance with the comprehensive plan. The council may require the execution of a written agreement with the city relating to the installation of public improvements by the applicant, together with the execution of performance bonds or provision of other appropriate surety. The installation of all public improvements shall be accomplished in compliance with existing city ordinances and design standards approved by resolution.

Should the final plan conform to the approved preliminary plan, the City Council shall approve the final plan. Approval of a planned unit development shall be by ordinance after public hearing, in accordance with the requirements of section 27.81.050 of this code. Following the city council’s approval, the final planned unit development shall be drawn on tracing cloth or mylar and submitted to the planning department. The planning director shall certify the plan as approved by the City Council. The planning director shall assemble three (3) packets including the approved drawings, the developer’s narrative description, and the ordinance approving the planned unit development. One (1) copy shall be kept on file in the offices of the city clerk, department of building and safety, and planning department.

Should the City Council find the final plan does not substantially comply with the preliminary plan, the applicant shall submit a revised preliminary plan as required in section 26.60.040.

(b) Ninety percent (90%) of the development time schedule of the initial phase of development shall be completed prior to issuance of building permits for future phases, and phasing shall not be permitted out of the sequence as approved by the city council. No building permit or certificates of occupancy or compliance shall be issued for construction of buildings in conflict with the approved development schedule or phasing requirements. The approved development schedule of the planned unit development may be extended for no more than two (2) years by the City Council without a hearing before the planning commission.
ZONING

(c) If an application for a planned unit development located within a flood plain is granted approval by the city, it shall not be necessary for the applicant to make application for a special permit to be approved by the City Council, as required by Resolution Nos. A-55150, A-56382, and A-57540. It shall be presumed that the applicant has received all such approval as may be required by the foregoing resolutions by virtue of the city granting approval to the planned unit development. (Ord. 14584 §7; January 20, 1967).

27.60.060 Planned unit development; amendments. After the City Council has approved a planned unit development, including the specific plot plan, the planning director is authorized to approve amendments in the planned unit development provided that:

(a) A request for amendment is filed with the planning director and, if appropriate, accompanied by a plot plan drawn to an accurate scale and showing all pertinent information;
(b) There is no increase in the number of structures authorized or in the number of dwelling units nor shall it provide for any increase in total floor area and storage space originally authorized by the city council;
(c) No public land will be accepted as a result of amendment;
(d) The amendment shall not be contrary to the general purposes of this chapter as set forth in section 27.60.010;
(e) Such amendment shall not violate any regulation set forth in this title;
(f) No reduction is to be made to the applicable setback or yard requirements;
(g) Any amendment not in conformance with this paragraph shall be submitted to the City Council in the same manner as a formal application for a planned unit development. (Ord. 13896 §6; July 23, 1984).

27.60.070 Abandonment or failure to proceed. (a) If the owner intends to abandon an approved planned unit development prior to commencement of construction thereunder, said owner shall so notify the planning director and the city council in writing. Upon receipt of such notice of an intention of abandonment by the owner, the planning commission shall consider the impact and appropriateness of repealing the planned unit development designation and shall forward its recommendations thereon to the City Council which may, by ordinance, repeal the planned unit development designation, which repeal shall have the effect of causing the area of the planned unit development to revert to the zoning district classification or classifications which existed immediately prior to the approval of the planned unit development. In the event that construction or other improvements have been commenced prior to receipt of the intention of abandonment, the city council, upon a recommendation of the planning commission, shall attach such conditions to the repeal of the planned unit development designation as may be deemed necessary or appropriate to ensure that such construction or improvements are removed or, alternatively, are completed in such a manner as to be compatible with the uses permitted within the underlying zoning district or districts of the area.
(b) If building official finds at any time that the owner has failed to complete the planned unit development or any phase thereof within the time limits as specified in the approved plans, or in the absence of such time limits, within three (3) years following the approval of a planned unit development, or if the owner has failed to substantially
PLANNED UNIT DEVELOPMENT

commence construction of the planned unit development within two (2) years of the approval of the district and has not applied for and received an extension to the above time limits from the City Council, or has failed to comply with any of the terms, conditions, and requirements of the planned unit development approval, the building official shall request the planning director to set a date for a hearing before the planning commission, of which the owner shall be notified in writing, for the owner to show cause why the approval of the planned unit development should not be repealed or other appropriate action taken. If the planning commission determines that no good cause has been shown why the planned unit development approval should not be repealed or other appropriate action taken, it shall forward its recommendation to the city council which may, after public hearing in accordance with the provisions of section 27.81.050 of the Lincoln Municipal Code, repeal the ordinance which approved such planned unit development, or take such other action as may be deemed necessary to obtain compliance. (Ord. 13896 §7; July 23, 1984).

27.61.010 Continuation of nonconforming use. Subject to the provisions of this chapter, the lawful use of a building or premises existing immediately prior to the effective date of this title may be continued although such use does not conform to the provisions hereof.

If no structural alterations are made, a nonconforming use may be changed to another nonconforming use of the same or of a more restrictive category. For the purposes of this chapter, each of the following categories of use shall be considered to be "more restrictive" than those it precedes:

(a) Single- and two-family residential;
(b) Multiple-family residential;
(c) Office buildings;
(d) Retail sales and service;
(e) General commercial;
(f) Light industrial;
(g) Heavy industrial;
(h) Uses only by special permit in the I-1 Industrial district.

Whenever a nonconforming use has been changed to a more restrictive use or to a conforming use, such use shall not thereafter be changed to a less restrictive use.

Subject to the requirements of sections 27.61.040 and 27.61.080, below, a nonconforming use not involving a building may be continued even though such use does not conform to the provisions hereof if no changes are made in regard to size or location of water lines, sewer lines or private roads. (Ord. 12571 §295; May 8, 1979).

27.61.020 Use becoming nonconforming by change in law or boundaries. Whenever the use of a building or premises becomes a nonconforming use through a change in the zoning ordinance or district boundaries, such use may be continued and if no structural alterations are made, it may be changed to another nonconforming use of the same or of a more restrictive category, subject to the provisions of this chapter. Whenever a nonconforming use has been changed to a more restrictive use or to a conforming use, such use shall not thereafter be changed to a less restrictive nonconforming use. (Ord. 12571 §296; May 8, 1979).

27.61.030 Discontinuance of nonconforming use. In the event that a nonconforming use of any building or premises is discontinued or its normal operation stopped for a period of two years, the use of the same shall thereafter conform to the uses permitted in the district in which it is located. (Ord. 12571 §297; May 8, 1979).
27.61.040 Extension or enlargement. Any nonconforming building or premises devoted to a use not permitted by this title in the district in which the building or premises is located shall not be enlarged, extended, converted, reconstructed, or structurally altered unless such use is changed to a use permitted in the district in which the building or premises is located or unless authorized under the provisions of section 27.63.280 or required to do so by law or order. (Ord. 12571 §298; May 8, 1979).

27.61.050 Restoration after damage. When the use of a building is nonconforming as defined in this chapter and such a building is damaged by a fire, explosion, act of God, or the public enemy to the extent of more than sixty percent (60%) of its fair market value, it shall not be restored except in conformity with the regulations of the district in which the building is located, or in conformance with the provisions of chapter 27.75 or section 27.63.280. (Ord. 12571 §299; May 8, 1979).

27.61.060 Sign regulations. Signs for nonconforming uses and nonconforming signs shall be regulated in conformance with the provisions of chapter 27.66. (Ord. 12571 §300; May 8, 1979).

27.61.070 Open storage. Where land within the R-1, R-2, R-3, and R-4 districts contain no main buildings as distinguished from accessory buildings and fences, and where said land was used solely for open storage immediately prior to the effective date of this title, use of such land for open storage shall be discontinued within two years. Where land is used for a nonconforming or nonstandard use in conformance with the provisions of this chapter and where such land contains a main building or structure in addition to open storage, said open storage shall be brought in conformance with the area, front yard, side yard, rear yard, height, unobstructed open space, and parking requirements for the district in which it is located within the period of one year from the effective date of this title. (Ord. 12571 §301; May 8, 1979).

27.61.080 Effect on uses which is illegal under prior law. Nothing in this title shall be interpreted as authorization for, or approval of, the continuance of the use of a building or premises in violation of zoning regulations in effect immediately prior to the effective date of this title. (Ord. 12571 §302; May 8, 1979).

27.61.090 Continuation of nonstandard uses. Nonstandard uses existing immediately prior to the effective date of this title may be continued, although such uses do not conform to the provisions hereof. Nonstandard structures and buildings may be enlarged, extended, or reconstructed, as follows:

(a) Enlargements, extensions, or reconstructions may be made as required by law or ordinance or ordered by the superintendent for codes administration to secure the safety of the structure;

(b) Enlargement, extension, or reconstruction of buildings or structures may otherwise be made if such changes comply with the minimum requirements as to front yard, side yard, rear yard, height, and unobstructed open space for the district in which they are located. 27.63.010 Procedures. Applications for a special permit under this chapter shall be filed in writing with the Planning Department on a form provided by the city. Upon filing of the application, the City Council shall refer the application to the Planning Commission. The Planning Commission may authorize, by special permit after public hearing, any of the following buildings or uses designated in this chapter as permitted special uses. Such permitted special uses shall be restricted to the particular district or districts listed under the applicable provisions below. Said special permit shall require conformance with all regulations of the applicable sections of this chapter. The Planning Commission shall impose such conditions as are appropriate and necessary to ensure compliance with the comprehensive plan and protect the health, safety, and general welfare in the issuance of any such special permits. Where specifically authorized under the applicable provisions below for any of the buildings or uses designated in this chapter as permitted special uses, the City Council may decrease the minimum regulations of the district in which the permitted special use is located or modify the...
SPECIAL PERMITS

Specific conditions for approval of the special permit provided the public welfare and interest of the city and surrounding area are protected and the general interest and spirit of these regulations are preserved. Unless expressly modified by the terms of the special permit, all regulations of the district in which the permitted special use is located shall apply. Copies of a plot plan of the lot and proposed uses drawn to an accurate scale and showing all pertinent information shall accompany a request for a special permit. (Ord. 15329 §5; August 7, 1989; prior Ord. 12571 §304; May 8, 1979).

27.63.020 Action of Planning Commission. Before the issuance of any special permit for any of the buildings or uses enumerated in this chapter, the Planning Commission shall hold a public hearing upon such application and shall consider the effect of the proposed use upon the surrounding neighborhood, the Comprehensive Plan of the City of Lincoln, the community as a whole, and other matters relating to the public health, safety, and general welfare. If the applicant requests the City Council to make a permitted decrease in the minimum regulations of the district in which the permitted special use is located or to modify the specific conditions for approval of the special permit, the Planning Commission shall hold a public hearing upon such adjustment or modification at the same time that it hears the application for the special permit and shall make a report to the City Council regarding the effect the proposed use and adjustment has upon the surrounding neighborhood, safety, community as a whole, and other matters relating to public health, safety, and general welfare. Upon receiving a report from the Planning Commission, the City Council, after public hearing, shall take final action upon the application for the special permit and the adjustment. In the event the Planning Commission fails to act upon the application within sixty days from the date the application is referred to the Planning Commission, the applicant may appeal to the City Council requesting final action. If the City Council determines that the delay of the Planning Commission is unjustified, it shall direct the commission to act no later than the commission’s next regularly scheduled meeting. (Ord. 15239 §6; August 7, 1989; prior Ord. 12571 §305; May 8, 1979).

The purpose of this chapter is to permit and to encourage the creative design of new living areas, as distinguished from subdivisions of standard lot sizes and standard street systems, and in order to permit such creative design in buildings, open space, and their interrelationship while protecting the health, safety, and general welfare of existing and future residents of surrounding neighborhoods. (Ord. 12571 §344; May 8, 1979).

27.65.020 General requirements. The owner or owners of any tract of land in the R-1, R-2, R-3, R-4, R-5, or R-6 zoning district which is one (1) acre or more in area; in the AG zoning district which is seventy-five (75) acres or more in area; or in the AGR zoning district which is ten (10) acres or more in area, including and up to the centerline of existing public rights-of-way abutting the tract of land may submit to the city council a plan for the use and development thereof for residential purposes or for the repair and alteration of any existing residential development; provided, however, that the city council shall apply the standards contained in this chapter and in chapter 27.63 in considering all applications for community unit plans.

(a) A community unit plan may be permitted on a tract of land which is less than ten (10) acres but more than five (5) acres in area. The maximum permitted density on such a tract shall be calculated as follows:

The maximum number of dwelling units permitted by the underlying district will be computed and this maximum will be reduced by ten percent (10%) to accommodate the small size of the tract.

(b) A community unit plan may be permitted on a tract of land which is not more than five (5) acres but more than one (1) acre in area. The maximum permitted density shall be calculated as follows:

The maximum number of dwelling units permitted by the underlying district will be computed and this maximum will be reduced by twenty percent (20%) to accommodate the small size of the tract.
(c) A community unit plan may be permitted on a tract of land which is less than ten (10) acres but more than one (1) acre in area where such tract is bounded on at least two (2) sides by one (1) or more existing community unit plans. The maximum density of such a tract shall be calculated as in section 27.65.080.

(d) A community unit plan may be permitted on a tract of land which is ten (10) or more acres in area. The maximum permitted density of such a tract shall be calculated as in section 27.65.080.

(e) Notwithstanding the provisions of (a) through (d) above, where permitted in the AG agriculture district, any community unit plan shall contain a minimum area of seventy-five (75) acres, and in the AGR agricultural residential district, a minimum area of ten (10) acres.

(f) A community unit plan which complies with the energy conservation standards adopted by the city council and on file with the city clerk may receive a dwelling unit bonus in accordance with the standards adopted by resolution of the city council.

(g) Additional dwelling units may be granted by the city council for each dwelling unit subsidized by the state or federal government for low-income families or as a dwelling unit bonus for the provision of barrier-free units; however, the number of additional dwelling units shall not exceed those provided in the standards adopted by resolution of the city council.

(h) A community unit plan located in the AG or AGR zoning districts which will protect the open space areas as designated in the future land use maps of the Lincoln city-Lancaster County comprehensive plan may receive a dwelling unit bonus in accordance with the standards adopted by resolution of the city council. A similar dwelling unit bonus may be made for protection of environmentally sensitive areas not shown in the plan. However, any such request shall be accompanied by a showing by the applicant of the need and means for protection of a portion of the property.

(i) The dwelling unit bonuses permitted under this section shall not exceed a total of twenty percent (20%) in any community unit plan. (Ord. 12571 §345; May 8, 1979).

27.65.025 Permitted density; not transferrable to AG or AGR zoning districts. The permitted dwelling unit densities of land zoned R-1, R-2, R-3, R-4, R-5, R-6, R-7, R-8, O-1, O-2, O-3, B-1, B-2, B-3, B-4, and B-5 shall not be transferred for the purpose of construction and occupancy of dwelling units to land located in the AG or AGR zoning districts. (Ord. 12768 §1; November 19, 1979).

27.65.030 Procedures. An application and plot plan and plans for development of a community unit plan under this chapter shall be filed in writing with the department of building and safety. Upon the filing of an application, together with all information required by this chapter, the city council will refer the application to the planning commission. The planning commission shall hold a public hearing upon such application and make a report to the city council regarding the effect of the proposed use upon the surrounding neighborhood, the community as a whole, and other matters relating to the public health, safety, and general welfare. The city council shall take no final action upon any application for a community unit plan filed under this chapter until a report from the planning commission has been filed with the city clerk; provided, that in the event there is a delay in excess of sixty (60) days from the date of referral on the part of the planning commission in reporting its recommendations to the city council, the applicant may appeal to the city council requesting final action. If the city council determines that the delay of the planning commission is unjustified, it shall
COMMUNITY UNIT PLAN

direct the commission to submit a report no later than immediately after the commission's next regularly scheduled meeting.

The report of the planning commission to the city council shall include reasons for recommending approval or denial of any application and if approval is recommended, shall further include specific evidence and facts showing that the proposed community unit plan meets the following conditions:

(a) That the land surrounding the tracts for the proposed community unit plan will not be adversely affected;

(b) That the proposed community unit plan is consistent with the intent and purpose of this title to promote the public health, safety, and general welfare;

(c) That the buildings and land in the proposed community unit plan shall be used only for single-family dwellings, two-family dwellings, townhouses, or multiple dwellings and accessory uses and any other uses permitted in the zoning district in which the land is located;

(d) That the average lot area per family within the proposed community unit plan will not be less than the lot area per family required in the zoning district or districts in which the tracts of the proposed community unit plan is located, except as otherwise provided in this chapter.

(e) If an application for the community unit plan located within a flood plain is granted approval by the city, it shall not be necessary for the applicant to make an application for a special permit to be approved by the city council as required by resolution nos. A-55150, A-56382, and A-57540. It shall be presumed that the applicant has received all such approvals as may be required by the foregoing resolutions by virtue of the city granting approval to the community unit plan. (Ord. 13079 §1; January 12, 1981: prior Ord. 12571 §346; May 8, 1979).

27.65.040 Council consideration of final action. Upon receipt of a report from the planning commission, the city council shall proceed to give final consideration to the application and require that certain conditions be fulfilled by the applicant in conjunction with the approval of the community unit plan applied for. Approval of a community unit plan shall be by a special permit in conformance with chapter 27.63. (Ord. 12571 §347; May 8, 1979).

27.65.050 Requirements after approval. Upon approval of the community unit plan by the city council, the developer shall cause to be prepared and submitted to the planning department a revised and reproducible final plot plan with all required amendments and revisions. Thereafter, building permits and certificates of occupancy shall be issued only upon strict compliance with the community unit plan as approved, or as amended, regardless of any regulations to the contrary with regard to the height and location of buildings, yard requirements, open space requirements, type of dwelling unit, accessory uses and the fronting of lots upon public streets set forth elsewhere in this title and applying to the zoning district or districts in which the community unit plan is located. (Ord. 12571 §348; May 8, 1979).

27.65.060 Community unit plan amendments. After the city council has approved a community unit plan, including the specific plot plan, the planning director is authorized to approve amendments in the community unit plan provided that:

(a) A request for amendment is filed with the planning director, and, if appropriate, accompanied by a plot plan drawn to an accurate scale and showing all pertinent information;
(b) There is no increase in the number of dwelling units;
(c) No public land will be accepted as a result of the amendment;
(d) The amendment shall not be contrary to the general purposes of this chapter as set forth in section 27.65.010;
(e) Such amendment shall not violate any regulations set forth in this title;
(f) No reduction is made to the applicable setback or yard requirements;
(g) Any amendment not in conformance with this paragraph shall be submitted to the city council in the same manner as an original community unit plan. (Ord. 13528 §6; January 3, 1983; prior Ord. 12571 §349; May 8, 1979).

unit plan. Where the tract of land abuts on an existing plat, the distances, angles, and bearing of any common lines shall be shown and any differences in measurement noted. The total calculated acres within the boundaries of the community unit plan shall be shown;

(a) The following data shall be shown on each sheet of the community unit plan:
   (1) The name of the community unit plan;

   (6) The proposed method of providing sanitary sewer service to the area;
      (i) If a public or community sewage system is established, the size and location of all proposed sanitary sewers, the proposed manhole locations, any necessary extension to the existing public system or to the proposed community sewage treatment facility, and the location of the proposed community sewage treatment facility;
      (ii) If the use of individual sewage disposal systems is permitted, pursuant to section 26.27.040 of the Lincoln municipal code, plans for the proposed disposal system and its location on each lot must be shown. If a septic tank system is proposed, soil and percolation data and plans which show the location of one main subsurface disposal field for each lot which is proposed to be served by a septic tank system shall be shown.
   (7) The proposed method of providing an adequate potable water supply;
      (i) If a public, or community water system, or rural water district is used, the location and size of all proposed water mains, the proposed hydrant locations, and any necessary extension of the proposed system to existing water mains or to a proposed community well, the location of the proposed community well, and the type of water treatment to be used;
      (ii) If a community water system other than a rural water district is proposed, data on the quantity and quality of the water shall be obtained from a test well within the immediate vicinity of the proposed water supply well. If an individual water well system for each lot is proposed, data on the quantity and quality of the water shall be obtained from test wells which shall be drilled on the ratio of one to each ten (10) acres on a grid system. The results of these preliminary tests shall in no way be construed to guarantee the quantity or quality of water to individual lots in the proposed
community unit plan and the data obtained from these tests shall not be used to imply that an adequate quantity or acceptable quality of water is available in the proposed community unit plan.

(8) A drainage study prepared in accordance with the current storm sewer design standards of the city on file with the city clerk. The following items must be included in the drainage study:

(i) A map showing the drainage area and resulting runoff from any land lying outside the limits of the community unit plan which discharges storm water runoff into or through the community unit plan;

Single trees which are three (3) inches in caliper or larger measured five (5) feet above the ground must be shown. However, if five (5) or more trees are located so that each is within approximately ten (10) feet of the edge of another tree, they will be considered a tree mass and the outline of the tree mass may be shown with a list of the common names of the trees which are within the tree mass. Also, cross-sections may be required showing existing and proposed ground lines and buildings. Information as to where fill will be obtained and the amount of the fill shall be included if all or part of the property is located within the flood plain as defined in chapter 27.35. (1) Six hundred (600) square feet for the first ten thousand (10,000) square feet of floor area;

(2) An additional six hundred (600) square feet for each additional twenty thousand (20,000) square feet of floor area.

(f) Joint parking. Uses that have nonconcurrent parking demand may join their parking facilities so as to reduce aggregate parking requirements as follows:

Uses that have nonconcurrent parking demand may join their parking facilities; however, the use having the largest floor area shall provide 4.5 parking spaces for every one thousand (1,000) square feet of floor area, and all other uses included in the joint parking arrangement shall provide two parking spaces per one thousand (1,000) square feet of their floor area; provided, however, that the number of additional spaces that would be required in the absence of this paragraph need not be provided physically, but sufficient land shall be reserved in the event that future uses may not have nonconcurrent parking demand. (2) O-3, B-1, B-2, B-3, B-4, H-2, H-3, and H-4 zoning districts. The uses shall be located in the following zoning districts: O-3, B-1, B-2, B-3, B-4, H-2, H-3, and H-4, and may include uses in adjacent O-2 districts and adjacent churches and chapels outside the above districts. The aggregate parking requirement shall be computed on the basis of providing the parking required for that use or those uses having nonconcurrent parking demand that have the largest parking demands as determined by the parking matrix (Fig. 1, p. 1131) and any additional conditions in this chapter; provided, however, that the number of additional spaces that would be required in the absence of this paragraph need not be provided physically, but sufficient land shall be reserved in the event that future uses may not have nonconcurrent parking demand. For the purpose of determining the adequacy of the joint parking arrangement, all such joint parking use shall be authorized by a written agreement between the city and all parties to such use.

(3) O-1 district. The uses shall be located in the O-1 district
and may include adjacent churches or chapels located outside the O-1 district. Uses that have nonconcurrent parking demand may join their parking facilities. The aggregate parking requirement shall be computed on the basis of providing the parking required for that use or those uses having concurrent parking demands that have the largest parking demands as determined by the parking matrix and any additional conditions in this chapter; provided, however, that the number of additional spaces that would be required in the absence of this paragraph need not be provided physically, but sufficient land shall be reserved in the event the future uses may not have nonconcurrent parking demand. For the purpose of determining the adequacy of the joint parking arrangement, all such joint parking use shall be authorized by a written agreement between the city and all parties to such use. (Ord. 14185, as amended by Ord. 14276, November 25, 1985: prior Ord. 13610 §1; June 6, 1983: Ord. 13546 §11; February 28, 1983: Ord. 13302 §9; February 1, 1982: Ord. 13291 §1; January 4, 1982: Ord. 12751 §24; November 5, 1979: Ord. 12679 §5; September 4, 1979: Ord. 12571 §356; May 8, 1979).

There will also be no parking requirements in the area located between the centerline of "N" Street and the centerline of "P" Street from one hundred fifty (150) feet east of 17th Street to the eastern boundary of B-4 district.

(b) In the area one hundred fifty (150) feet east of 17th Street which is in the B-4 district, not specifically excepted in section (a) above:

(1) Industrial and manufacturing uses: Two (2) spaces per three (3) employees on the largest shift, or one space per one thousand (1,000) square feet of floor area; provided, however, that if the number of spaces required by the building ratio is greater than that required by the employee ratio, the additional parking spaces need not be provided physically, but sufficient space shall be reserved for future physical development.

(2) Restaurants: One parking space per three hundred (300) square feet of floor area;

(3) Other business and office uses: One parking space per six hundred (600) square feet;

(4) Residential uses: One parking space per dwelling unit.

(a) Two-family dwellings: Two parking spaces per unit;

(b) Multiple family dwelling: Two parking spaces per multiple family dwelling;

27.67.065 Special conditions; community unit plan and O-3 zoning district. In a community unit plan and in the O-3 zoning district, the following parking regulations shall apply:

(a) Two-family and multiple dwellings: Two parking spaces per dwelling unit, however, the city council may reduce the community unit plan parking requirement to no less than one and one-half (1.5) parking spaces per dwelling unit when the application includes information justifying the reduction;
(b) The location of required parking as set forth elsewhere in this chapter may be adjusted by the city council;

(c) All other parking requirements in the O-3 zoning district or in the district or districts in which a community unit plan is located shall apply. (Ord. 13526 §§; January 3, 1983; prior Ord. 12878 §3; March 31, 1980).

27.67.070 Special conditions; R-6, R-7, and R-8 zoning districts. In the R-6, R-7, and R-8 zoning districts, parking is permitted in the required side yard, provided that there shall be no parking within seven (7) feet of any side lot line and parking is permitted in the area behind all buildings within the required side yard up to any side lot line. (b) A personal vehicle, including a passenger car, recreational vehicle, trailer, boat, van, or pickup truck, may be parked outside of an enclosed structure in the side yard or rear yard but not within two (2) feet of a property line;

(c) A recreational vehicle, trailer, or boat may be parked outside of an enclosed structure in the required front yard on a concrete driveway or its equivalent under the following conditions:

1. Space is unavailable in the rear yard or outside the side yard and there is no reasonable access to either the rear yard or side yard. A corner lot is always deemed to have reasonable access to the rear yard; a fence is not deemed to prevent reasonable access.

2. Enclosed parking is not possible in conformance with the requirements of the district; such enclosure is not a requirement for parking a recreational vehicle, trailer, or boat;

3. The recreational vehicle, trailer, or boat is parked perpendicular to the front curb;

4. The recreational vehicle, trailer, or boat may be parked not less than two (2) feet from the front property line, and not less than two (2) feet from the side lot line.

5. No part of the recreational vehicle, trailer, or boat may extend over the public sidewalk or the public right-of-way.

6. Parking is permitted only for storage and any recreational vehicle, trailer, or boat shall not be:

1. used for dwelling purposes for more than fourteen (14) days in any calendar year; cooking is not permitted at any time;

2. permanently connected to sewer lines, water lines, or electricity. A recreational vehicle may be connected to electricity temporarily for charging batteries;

3. used for storage of goods, materials, or equipment other than those items considered to be a part of the unit or essential for its immediate use.

7. Notwithstanding the provisions of this section, the recreational vehicle, trailer, or boat may be parked anywhere on the premises during loading or unloading, and the use of electricity or water is permitted when necessary to prepare a recreational vehicle for use.

8. The recreational vehicle, trailer, or boat shall be owned by the resident on the property where the recreational vehicle, trailer, or
PARKING 27.67.090-27.67.100

boat is parked for storage. (Ord. 14215 §2; September 9, 1985; prior Ord. 12571 §360; May 8, 1979).

27.67.090 Special conditions; nonconforming uses. If a nonconforming use is changed to a more restrictive nonconforming use or to a conforming use, it shall comply with all of the parking requirements of this chapter for such use. (Ord. 12571 §361; May 8, 1979).

27.67.100 Special conditions; parking lots. (a) Parking lots consisting of six (6) or more parking spaces located in any zoning district except for nonpermanent lots that are allowed for no more than a period of two years, and lots for the purpose of sale, resale, or servicing of vehicles shall be constructed in accordance with the following requirements:

(1) Design standards: The city of Lincoln shall adopt design standards to be approved by resolution of the city council for surfacing, drainage, barriers, screening, lighting, landscaping, and layout of the parking lots and place the same on file with the city clerk. All parking lots authorized by this chapter shall be constructed pursuant to and in conformance with the design standards adopted by the city and on file with the city clerk.

(2) Barriers: An adequate barrier shall be provided along the outer edge of the parking lot as required by section 10.28.290 and section 10.28.300 of the Lincoln municipal code. Barriers shall be located to prevent the parking of vehicles in the required front yard when prohibited by this title, and to provide protection to any landscaping or screen planting. Barriers shall be in conformance with chapter 14.44 of the Lincoln municipal code and any applicable standards adopted by resolution of the city council.

(3) Entrances and exits: The location and design of all entrances and exits shall be subject to the approval of the city.

(4) Lighting: If lighting is used to illuminate parking lots, it shall be so arranged as to reflect lighting away from the adjacent properties and public street. Direct rays of light from the light source shall be shielded from an adjacent residential district or residential land use. Lighting in parking lots shall be in conformance with the lighting standards adopted by the city. Lincoln municipal airport parking lots shall be excluded from the provisions of this paragraph.

(5) Signs: Only one sign, not to exceed three (3) square feet in area and not located on public right-of-way, is permitted at each entrance and/or exit designating that entrance or exit and may state conditions of use of the parking lot. No other signs except as otherwise permitted in the zoning district shall be permitted except (i) one-way driveway signs which shall be the same size and located in the same manner as entrance or exit signs; and (ii) signs for parking spaces for the handicapped conforming to adopted design standards.

(b) Nonconforming parking lots: All parking lots lawfully existing on the effective date of this ordinance may be continued, although such parking lots do not conform to the provisions hereof. Such lots shall be maintained in conformance with title 8 of the Lincoln municipal code. Such nonconforming parking lot may not be enlarged or extended, except as provided herein. In the event that such parking lots are discontinued or the normal operation thereof is stopped for a period of two (2) years, any resumption of the use of said parking lot shall thereafter conform to all of the requirements of this ordinance.

(c) Waiver of surfacing requirement: Upon application to the city council, the owner of a parking lot may be relieved of the surfacing requirement of this section if the council finds that:

(1) The parking lot is (i) to be used in conjunction with a non-profit, religious, educational, or philanthropic institution; (ii) in excess of
the parking required by the provisions of this title and not pay parking; or (iii) used for employee parking and located wholly within an industrial district; and

(2) Alternate materials or techniques shall be utilized which provide reasonable control of dust, runoffs, and safe circulation; and

(3) (i) The location of the parking lot is a sufficient distance from surrounding uses that it will not adversely affect the surrounding uses; or

(ii) The frequency of use of the parking lot is so low that compliance with the surfacing requirement of this section would cause undue economic hardship upon the owner as compared with minimal impact upon surrounding land uses.

Notwithstanding that a waiver is granted, if it is later found that dust or noise, created by the use of a parking lot exceeds the maximum levels set forth in title 8 of the Lincoln municipal code, then such waiver may, after notice and hearing by the city council, be revoked. Thereafter, the use of such parking lot shall cease unless surfaced in accordance with the adopted design standards.

(d) The following provisions shall apply to extension and enlargement of nonconforming parking lots:

(1) If an existing nonconforming parking lot having less than twenty (20) spaces is expanded fifty percent (50%) or more in area, the extension shall be surfaced in conformance with the appropriate design standards.

(2) If an existing nonconforming parking lot with twenty (20) spaces or more is expanded twenty-five percent (25%) or more in area, the extension shall be surfaced in conformance with the appropriate design standards.

(e) In the event that the main use of a lot for a nonstandard or nonconforming parking lot is changed in whole or in part to another use, any continued use or resumption of the use of said lot for parking shall thereafter conform to all the requirements of this ordinance. (Ord. 14254 §1; October 21, 1985; prior Ord. 14084 §1; April 15, 1985; Ord. 14007 §1; December 10, 1984; Ord. 12946 §1; February 19, 1980; Ord. 12571 §362; May 8, 1979).

27.69.010 Scope of Regulations. The sign regulations for this title are as set forth in this chapter. Any additional conditions imposed by Title 22 of the Lincoln Municipal Code, the State of Nebraska, or federal government, and other applicable ordinances or regulations also apply. In the event of any conflict, the most restrictive ordinance, regulation, or other requirement shall apply. (Ord. 12571 §363; May 8, 1979).

27.69.020 Definitions. For the purpose of this chapter, certain terms and words are hereby defined.

(a) AREA OF SIGN shall mean the area of the largest single face of the sign within a perimeter which forms the outside shape including any frame which forms an integral part of the display, but excluding necessary supports or uprights on which the sign may be placed. If the sign consists of more than one section or module, all areas will be totaled. Signs mounted or painted on a wall shall be calculated by using a simple geometric figure around the advertising message and shall include any framing or decoration, the primary purpose of which is to highlight the sign.

(b) DIRECTIONAL SIGN shall mean any sign which serves solely to designate the location or direction of any area or place. This definition shall also include any sign approved by the director of transportation in connection with major street construction projects.

(c) FACADE shall mean any face of a building which faces a street, private roadway, parking lot, or pedestrian walkway.

(d) FLAG shall mean a sign constructed of a nonrigid piece of fabric attached to a pole structure on one vertical side only.

(e) FLASHING SIGN shall mean any sign which contains an intermittent or flashing light source, or which includes the illusion of intermittent or flashing light by means of animation, or an externally-mounted intermittent light source.

(f) GROUND SIGN shall mean a sign with less than ten feet clearance supported by one or more uprights, poles, or braces in or upon the ground other than a pole sign, as defined in this chapter.

(g) HEIGHT OF A SIGN shall mean the distance between the lowest grade level within two feet of either side of a sign, and the highest part of the sign or its support; except that if the property was lower than the adjacent roadway, then the height of the sign is to be calculated from the street grade at a ninety degree angle from the sign.

(h) ILLUMINATED SIGN shall mean any sign which is directly lighted by any electrical light source, internal or external. This definition shall not include signs which are illuminated by street lights or other light sources owned by any public agency or light sources which are specifically operated for the purpose of lighting the area in which the sign is located rather than the sign itself.

(i) MARQUEE (canopy or wall) shall mean a protective shelter or overhang which projects from the face of a building.

(j) MARQUEE SIGN shall mean a sign attached to the face or on top or below a marquee parallel to the building face. The area of marquee signs shall be counted toward the total allowable wall sign area of the parallel face to which the marquee is attached.

(k) PEDESTRIAN MARQUEE SIGN shall mean a sign oriented to the view of pedestrians which is attached to or constructed under the marquee or on the end of the marquee perpendicular to the parallel face to which the marquee is attached, but shall not project above the marquee.
SIGNS

(l) MOBILE SIGN shall mean a sign designed and constructed to be transported by its own wheels. When placed, a mobile sign must be supported by at least four integral metal supports which raise the wheels off the ground. Such sign shall not exceed ten feet in height.

(m) ON-PREMISE SIGN shall mean any sign which serves to advertise and/or identify a product, service, or activity conducted on the premise on which the sign is located, or identifies said premises or a use thereof.

(n) OFF-PREMISE SIGN shall mean any sign which serves to advertise a product, service, or activity not conducted on the premises on which the sign is located or within 300 lineal feet thereof.

(o) POLE SIGN shall mean a sign wholly supported by a sign structure in the ground with any part of the sign area having a minimum of ten foot clearance above grade.

(p) PROJECTING SIGN shall mean a sign other than a wall sign which is attached to and projects from a structure, building face or marquee.

(q) PROJECTION shall mean the distance by which a sign extends beyond a building or structure.

(s) ROOF SIGN shall mean any sign or part erected upon, against, or directly above a roof or on top of or above the parapet or cornice wall of a building. Roof sign shall include facsimile wall signs on an add-on, unnecessary ornamental attachment not used for shelter or protection of persons or property, such as cupolas.

(i) ROTATING SIGN shall mean any sign or portion of a sign which moves in a revolving or similar manner, but not including multi-prism indexing signs.

(u) SEASONAL OR HOLIDAY SIGNS shall mean signs used for special occasions, such as religious and national holidays, and installed for a limited period of time not to exceed sixty days.

(v) SIGN shall mean any structure, fixture, graphics, illustration, statue, or other device visible from off the premises designed or intended to advertise, to identify, to attract attention to, or to convey information regarding any goods, product, service, business, location, institution, activity, person, solicitation, issue, or campaign, with the exception of merchandise window displays, flags of any nation, state, or political subdivision, and sculpture. No wall sign shall project vertically or horizontally beyond the building face from which the sign is attached. A wall sign may extend into right-of-way.

(y) WINDOW SIGN shall mean a sign installed inside a window which can be viewed from outside the premises and is six feet or less from the window or is located within a window display area formed by walls or doors that block the view into the main building. (Ord. 13067 §7; January 5, 1981; prior Ord. 12571 §383; May 8, 1979).

27.71.115 Canopies in front yard. In B-1, H-1, H-2, H-3, and B-3 zoning districts, canopies may project into a required front yard; provided, that a five foot setback shall be maintained from the property line, and such canopies shall not cover more than six square feet of ground area per each foot of frontage, and no portion of the canopy shall be lower than nine feet above grade.

In B-2 zoning districts, canopies may only project into the required front yard when the size and location of such canopies are approved as part of the use permit. (Ord. 14581 §2; January 12, 1987; prior Ord. 14225 §1; September 30, 1985; Ord. 12571 §383a; May 8, 1979).

27.71.120 Temporary buildings and fences. Temporary buildings that are used in conjunction with construction work only may be permitted in any district during the period that the building is being constructed, but such temporary building shall be removed upon completion of the construction work. Temporary fences used in conjunction with construction work only are permitted under the following conditions:

(a) Not to exceed ninety-six (96) inches in height;

(b) Only permitted to protect construction work and materials;

(c) May be permitted on any part of a lot but not encompasses any greater area than necessary to provide protection to the construction work or materials and encompassing only that part of a lot necessary to allow construction activity and access around the structures;
ADDITIONAL HEIGHT AND AREA

(d) Shall be removed upon completion of the construction work or the availability of other protection within the lot. On lots or areas in which more than one building will be under construction, the area enclosed by the fence shall be reduced as construction proceeds.

(e) Such temporary fence shall not obstruct the visibility of the construction site nor prevent access to the site by emergency vehicles.

(f) No fence shall be erected within that triangular area required for sight distance of vehicles entering or exiting the property or entering an adjacent intersection in conformance with the “design standards” and “guidelines and regulations for driveway design” of the city. (Ord. 13221 §1; October 12, 1981: prior Ord. 12571 §384; May 8, 1979).

27.71.130 More than one main building on business, commercial, or industrial tract. Where a lot or tract is used for a business, commercial, or industrial purpose, more than one main building may be located upon the lot or tract, but only when such buildings conform to all open space requirements around the lot for the district in which the lot or tract is located. (Ord. 12571 §385; May 8, 1979).

27.71.140 Two or more buildings for two-family dwellings, multiple-family, institutional or hotel purposes. In the event that a lot is to be occupied by a group of two or more buildings to be used as a unit for any combination of two-family dwellings, multiple-family dwelling, institutional, or hotel purposes, there may be more than one main building on the lot; provided, however, that the open space between buildings shall have a minimum dimension of twenty feet for one-story buildings, thirty feet for two-story buildings, and forty feet for three-story buildings. (Ord. 13326 §1; March 1, 1982: prior Ord. 12571 §386; May 8, 1979).

27.71.150 Multiple dwelling considered as one building. For the purpose of the side yard regulations, a two-family dwelling or a multiple dwelling shall be considered as one building occupying one lot. (Ord. 12571 §387; May 8, 1979).

27.71.160 Public utilities. Notwithstanding the regulations of the various districts, public utilities structures may be erected where necessary in any district on any lot of one acre or more in area. Poles and towers used for the support of wires and appurtenant equipment for supplying public utility services shall not be considered as structures or buildings under this title. When located adjacent to any residential district, such structures shall be screened in conformance with the standards adopted by resolution of the City Council. (Ord. 12571 §389; May 8, 1979).

27.71.170 Adjustment of front yard requirements. The front yards located within the same zoning district may be adjusted in the hereinafter-stated circumstances. This section shall not apply to the R-3, O-3, B-2, B-5, H-4, and I-4 zoning districts.

(a) Where any forty percent or more of the frontage in the same zoning district is developed with two or more main buildings that have (with a variation of five feet or less) a front yard greater in depth than herein required, new buildings shall not be erected closer to the street than the greater of the front yards established by the existing main building nearest the street line.
ZONING

(b) Where any forty percent or more of the frontage in the same zoning district is developed with two or more buildings that have a front yard of less depth than herein required, then:

(1) Where a building is to be erected on a parcel of land that is within 100 feet of existing main buildings on both sides, the minimum front yard shall be a line drawn between the two closest front corners of the adjacent main building on each side; or

(2) Where a building is to be erected on a parcel of land that is within 100 feet of an existing main building on one side only, such building may be erected as close to the street as the existing adjacent main building. (Ord. 13588 §21; May 9, 1983: prior Ord. 13363 §1; 1982: Ord. 13084 §1; January 26, 1981: Ord. 12979 §1; August 25, 1980: Ord. 12571 §390; May 8, 1979).

27.71.180 Side and rear yard requirements. The requirements of side or rear yards on lots that are required to provide three or more front yards or their equivalent may be modified in the following circumstances:

(a) A lot in a dwelling district need provide only a side yard on an interior lot line when the required yard on the adjacent property is also a side yard. A rear yard shall be required on an interior lot line when the required yard on adjacent property is a rear yard.

(b) A lot in a business, commercial, or industrial district need provide only a side yard on an interior lot line unless the lot is occupied by a dwelling other than a hotel or motel, or the adjacent property is in a dwelling district, in which case the rules of subsection (a) of this section shall apply. (Ord. 12571 §391; May 8, 1979).

27.71.190 Building line district. On those streets and highways shown on the "Lincoln Building Line District Map," dated November 1, 1985, which is adopted as a part hereof and incorporated by reference herein, and as the same may be from time to time amended, no structure, sign, parking, or required vehicle stacking shall be located, constructed, or erected within an area designated as a building line district, except as permitted under Section 27.71.200. At intersections that are designated as being within a building line district, the district shall extend for a distance of 650 feet from the centerline of the intersecting street or to the next lot line beyond 650 feet, but not to exceed 700 feet. The street centerlines referred to in this section and on the "Lincoln Building Line District Map" refer to the street centerlines as they existed on the effective date of this title. (Ord. 15129 §1; March 20, 1989: prior Ord. 14386 §1; May 19, 1986: Ord. 13556 §1; March 7, 1983: Ord. 12947 §3; June 30, 1980: Ord. 12571 §392; May 8, 1979).

27.71.200 Uses within building line districts; adjustments. (a) The City Council may authorize by resolution the location or placement of accessory buildings and structures, not including main buildings or accessory buildings which are part of a main building, within a building line district; provided that such location or placement otherwise meets the requirements of all applicable ordinances, codes, and design standards. Where such uses are not otherwise permitted in the required yard by the applicable district regulations, such uses may not be located within a building line district but the city council, by resolution, may allow such uses to encroach into the required yard, measured from the yard line, a distance equal to the width of the building line district, but in no event beyond the required yard. The applicant for such building or structure
shall agree in writing that it shall be moved at the sole cost of the applicant whenever necessary for public use.

(b) Parking spaces, other than required parking, and signs may be located within a building line district and shall not require authorization by the city council if the applicable district regulations otherwise permit the location of such uses in the required yard. Where such uses are not otherwise permitted in the required yard by the applicable district but may encroach into the required yard, measured from the yard line, a distance equal to the width of the building line district, but in no event beyond the required yard. Such parking spaces or signs shall comply with all other applicable ordinances, codes, and design standards relating thereto. Signs authorized by this section shall be removed at the sole cost of the property owner whenever necessary for public use. In the case of parking authorized by this section, the property owner shall agree to reimburse the city for the costs of removal of the parking which exceed the costs the city would normally incur in the widening of such street without the existence of such parking spaces.

(c) The city council may modify the building line district along the frontage in a block to permit reasonable use of individual property; provided, however, that such a modification shall be granted only when the city council finds that the modification will not interfere with reasonably anticipated future right-of-way requirements. Any such modification shall first be submitted to the planning commission for its recommendation and report and, prior to action by the planning commission, all property owners of the frontage in the block for which the modification is requested shall be notified of such request by United States mail. This notice shall be in addition to, and not in lieu of, the notice requirements of chapter 27.81 of this code.

(d) For purposes of this section, the yard line and the required yard shall be measured from the building line district line rather than the lot line or property line. (Ord. 15129; March 20, 1989; prior Ord. 14885 2; May 19, 1986; Ord. 14253 1; October 21, 1985; Ord. 13556 2; March 7, 1983; Ord. 12720 1; October 22, 1979; Ord. 12571 393; May 8, 1979).

27.71.210 Enlargement and alteration of lots. (a) Any lot or premises which does not meet the area, width, or frontage requirements, or any combination thereof, of the district in which it is situated, may be enlarged without affecting the purposes for which it may be used; provided, that such enlargement does not result in the creation of an additional lot which does not conform to the applicable requirements of this code.

(b) In the AG or AR zoning district, the common lot lines of two (2) or more adjoining lots, both or all of which do not meet the area, width, or frontage requirements, or any combination thereof, of the district in which such lots are situated, may be altered without affecting the purposes for which such lots may be used, provided:

(1) That such alteration does not result in the creation of a lot which does not meet the minimum standards for water and sanitary sewage disposal systems as required by applicable state, county, and city regulations; and

(2) That such alteration meets all requirements of the city land subdivision ordinance.

1164-1 July 9, 1990
(c) In those instances where a governmental agency acquires land for the purposes of road right-of-way from lots which were legally existing on the effective date of this title, the acquisition of said right-of-way shall not affect the status of said lot as a buildable lot with respect to minimum lot area, width, or frontage requirements of this title provided:

1. That all new construction, enlargements, extensions, or conversions of any buildings, structures, or uses including open land uses shall comply with all applicable provisions of this title.

2. That such lots located in AG and AGA districts contain a minimum of one acre and have an average lot width of not less than 150 feet.

3. That such lots located in an "R" residential district contain a lot area of not less than 4,000 square feet and an average lot width of not less than 40 feet. (Ord. 15615; July 9, 1990; prior Ord. 13324; March 1, 1982; Ord. 13100; March 2, 1981).

27.71.220 Replacing non-standard accessory building on narrow lot. In the R-1, R-2, R-4, R-5, R-6, R-7, and R-8 zoning districts, a new or replacement accessory building may be erected on the site of an existing detached accessory building constructed on or before November 2, 1953, on a lot of record with an average lot width of less than fifty (50) feet although the site does not meet the required minimum setback from a side, rear, or side and rear lot line(s), provided:

(a) Such new or replacement accessory building does not extend beyond the exterior perimeter of the existing accessory building; and

(b) Such new or replacement accessory building shall otherwise comply with all applicable city ordinances. (Ord. 13527; January 3, 1983).

27.71.230 Minimum separation between buildings and pedestrian way easement. The minimum separation between a building and a pedestrian way easement shall be ten (10) feet. (Ord. 13957; September 17, 1984).

27.71.240 Yard accessories in required yards. Poles, posts, and other customary yard accessories, ornaments, and furniture may be located in any yard subject to requirements limiting obstruction of visibility and height limitations. (Ord. 14448; July 26, 1986).

27.75.010 Creation; membership. The Board of Zoning Appeals is hereby continued, and members of the board on the effective date of this title shall continue to serve for the remainder of their appointed terms. The members of said board shall be appointed by the Mayor with the consent of the City Council, and such members must be approved by the County Board of Commissioners before the board may be the City-county Board. There shall be five members of the board, and not less than one nor more than two shall be members of the Planning Commission. Two members of the board shall have experience in the fields of real estate, law, planning, or related fields. Appointments shall be made for a term of five years, and one term shall expire each year. Vacancies shall be filled by appointment for the unexpired term only. Members may be removed by the affirmative vote of four members of the City Council after being given a written statement of the charges, and a hearing, which shall be a public hearing if the member so requests. (Ord. 12571 §394; May 8, 1979).

27.75.020 Meetings. The members of the Board of Zoning Appeals shall meet at least once each month at such time and place as they may fix by resolution. They shall select one of their number as chairman, who shall serve one year and until a successor has been selected. Special meetings may be called at any time by the chairman. A majority of the board shall constitute a quorum for the transaction of business, and three affirmative votes shall be required for final action on any matter acted upon by the board. The board shall cause a proper record to be kept of its proceedings. (Ord. 12571 §395; May 8, 1979).

27.75.030 Appeal procedure. (a) Appeals to the Board of Zoning Appeals may be taken by any person aggrieved or by any office, department or bureau of the City of Lincoln affected by any decision of the director of building and safety. The decision of the director of building and safety shall be made in writing and the appeal shall be taken within sixty days from such written decision by filing with the director of building and safety a notice of appeal specifying the grounds thereof. The director of building and safety shall forthwith transmit to the Board of Zoning Appeals all the papers constituting the record upon which the action appealed from is taken.

(b) Upon receipt of the appeal by the board, the board shall fix a reasonable time for the hearing thereon within thirty days. Notice shall be given as provided in chapter 27.81.
ZONING

(c) If, due to the absence of one or more of the members of the board, any proposition put to a vote shall fail to receive three or more votes either for or against, said proposition shall be deemed to have received neither approval nor disapproval. (Ord. 12571 §396; May 8, 1979).

Chapter 27.75 continues on Page 1167
27.75.040 Jurisdiction. The jurisdiction of the board of zoning appeals shall be limited to the following:

(a) Powers relative to errors. To hear appeals where it is alleged there is an error in any order, decision or determination made by an administrative official in the enforcement of this title;

(b) Powers relative to variances. To hear and decide upon petitions for variances and, subject to such standards, principles, and procedures provided in this title, to vary the strict application of the height, area, parking, density or sign requirements to the extent necessary to permit the owner a reasonable use of the land in those specified instances where there are peculiar, exceptional and unusual circumstances in connection with a specific parcel of land, which circumstances are not generally found within the locality or neighborhood concerned.

(c) Powers relative to exceptions. Upon petition, the board is hereby empowered to make the following zoning exceptions:

1. To permit the reconstruction of a nonconforming building which has been destroyed, or partially destroyed by fire or act of God where the board shall find some compelling public necessity requiring the continuance of the nonconforming use;

2. To interpret the provisions of the title where the street layout actually on the ground varies from street layout as shown on the map fixing the several districts, which map is attached to and made a part of the title;

3. To reduce the parking requirements in the commercial, business or industrial districts wherever the character of the use of building is such as to make unnecessary the full provisions of parking facilities as required. In permitting a reduction, the board may restrict the use of the building to uses requiring a similar reduced number of parking facilities. The granting of a reduction in parking requirements shall not serve as a convenience to the petitioner but shall recognize the varying demands for on-street parking by different uses which cannot reasonably be determined in detail in the zoning ordinance.

(d) Powers relative to airport zoning. The board shall have the power designated to it by sections 27.59.110 and 27.59.120. (Ord. 14549; April 20, 1969; prior Ord. 13440 1; September 7, 1942; Ord. 12571 397; May 8, 1979).

Amend: Use variances are customarily concerned with "hardship" while area variances are customarily concerned with "practical difficulty." Almst Central Board v. City of Lincoln, 179 Neb. 198, 147 N.W.2d 800 (1966).

Proper criteria on review of application for variance include: (1) whether strict compliance would preclude a permitted use of property;

2. whether grant of variance would do substantial justice to both property owner and neighbors;

3. whether relief can be granted in such a fashion that the spirit of the ordinance will be observed and the public safety and welfare secured.

Id.

University of Nebraska housing code and economic realities applying to fraternity house operation are not practical difficulties sufficient to sustain an application for a variance.

27.75.050 Decisions of board; scope and factors considered. In exercising the above-mentioned jurisdiction, the board may in conformity with the provisions of this title reverse or affirm, wholly or partially, or modify the order, requirement, decision, or determination appealed from and may make such decisions as ought to be made. In considering all appeals and petitions within its jurisdiction under this title, the board shall, before making any finding in a specific case, first determine that the proposed change will not constitute a change in the district map and will not
impair an adequate supply of light and air to adjacent property, or increase the congestion in public streets, or increase the public danger of fire and safety, or materially diminish or impair established property values within the surrounding area, or in any other respect impair the public health, safety, comfort, morals, and welfare of the city of Lincoln. In making a determination, the board may request information and recommendations from any department of the city of Lincoln. Every decision by the board shall be accompanied by a written finding of fact based on testimony and other evidence, specifying the reason for granting or denying the variation. In the event that the proposed variance or exception is denied by the board of zoning appeals, no new request shall be made for the same or a substantially similar variance or exception within one (1) year of said denial thereof. (Ord. 12571 §398; May 8, 1979).

27.75.060 Decision of board transmitted to city clerk. Decisions of the board of zoning appeals, accompanied by the written findings of fact, shall be transmitted to the city clerk by the board within one week after such actions have been taken. Any decision approving an appeal shall be by resolution of the board, a certified copy of which shall be filed with the register of deeds by the petitioner at the expense of the petitioner within sixty (60) days after such approval, or such approval shall be null and void. (Ord. 12571 §399; May 8, 1979).

CERTIFICATES OF OCCUPANCY AND CERTIFICATES OF COMPLIANCE

Sections:

27.77.010 Required for changed or new occupancy.
27.77.020 Certificate of occupancy; required for building permit.
27.77.030 Certificate of occupancy; required for nonconforming uses.
27.77.040 Record of certificates of occupancy to be kept.
27.77.050 Special permits; certificate of compliance.

27.77.010 Required for changed or new occupancy. Subsequent to the effective date of this title, no change in the use or occupancy of land, nor any change of use, occupancy, or occupancy classification under the building code of any existing building or portion thereof shall be made, nor shall any new building be used or occupied, except as hereinafter specifically provided, until a certificate of occupancy has been issued by the building official. Every certificate of occupancy shall state that the new use, occupancy, or occupancy classification complies:

(a) With the provisions of this title or with the terms, conditions, and requirements of the special permit authorizing such building or use, as the case may be; and

(b) With the provisions of the building code.

Such certificate shall include, where applicable:

(1) the building permit number;

(2) address and legal description;

(3) the name of the owner;

(4) a description of the building or portion thereof, or of the premises or portion thereof for which the certificate is issued;

(5) the name of the building official issuing the same. (Ord. 12571 §400; May 8, 1979).

27.77.020 Certificate of occupancy; required for building permit. No permit for the erection, structural alteration, conversion, enlargement or reconstruction of any building or use of land shall be issued before the application has been submitted, reviewed and a finding made that the proposed uses will meet the requirements of the zoning ordinance for a certificate of occupancy; and no building or premises shall be used or occupied until such certificate is issued. (Ord. 12571 §401; May 8, 1979).

27.77.030 Certificate of occupancy; required for nonconforming uses. A certificate of occupancy shall be required of all lawful nonconforming uses of land or buildings created by adoption of or amendment to this title. Application for such certificates of occupancy for nonconforming uses shall be filed with the building official by the owner or lessees of the land or building occupied by such nonconforming use within two (2) years from the date that such nonconforming use is created. It shall be the duty of the building official to issue a certificate of occupancy for a lawful nonconforming use. Failure of the building official to issue such certificate of occupancy for nonconforming use may be considered evidence that such nonconforming use did not lawfully exist at the effective date of this title or any amendment thereto creating such a nonconforming use. (Ord. 12571 §402; May 8, 1979).

27.77.040 Record of certificates of occupancy to be kept. A record of all certificates of occupancy shall be kept on file in the office of the building official, and copies shall be furnished on request to any person having
a proprietary or tenancy interest in land or buildings affected by such certificate of occupancy. (Ord. 12571 §400; May 8, 1979).

27.77.050 Special permits; certificate of compliance. Upon completion of construction of any improvements as authorized or required by the city council for any buildings or uses for which a special permit was granted, the permittee may apply for inspection and partial certification, and upon completion of construction of all such improvements, the permittee shall apply to the building official for a certificate of compliance, which certificate shall not be issued until the building official has inspected the premises covered by the special permit and has found that all terms, conditions, and requirements of the special permit have been complied with.

If the building official finds at any time that the terms, conditions, and requirements of a special permit have not been complied with, or that any phase thereof has not been completed within the time required under said special permit or any administrative amendment thereto, the building official shall report this fact to the city council which may, after a hearing of which the permittee shall be notified, revoke such special permit for failure to comply with such terms, conditions, and requirements, or take such other action as it may deem necessary to obtain compliance.

Any amendment to a special permit approved subsequent to the issuance of a certificate of compliance for such special permit shall require application by the permittee for a new certificate of compliance which shall not be issued until the building official has ascertained that any terms, conditions, and requirements of the amendment to the special permit have been complied with.

For purposes of this section, the term "special permit" shall include authorizations under chapters 27.31, 27.37, 27.53, 27.65, 27.63, and 27.69. (Ord. 12571 §404; May 8, 1979).
