
SUMMARY OF PLANNING COSTS AND PHASING

26.1 GENERAL

The improvements outlined in this Master Plan were developed for planning purposes only. Design assumptions and specific criteria should be further investigated and defined when specific project implementation begins. Although the final design features may depart from those described herein, these facilities are representative of the facilities required by the City of Lincoln and can be used for long range planning.

The costs presented for the identified improvements are based on assumptions outlined in Chapter 7, adopted from the current City CIP, or developed based on recent bid tabulations. The costs shown are for planning purposes only and should be confirmed based on more detailed engineering and design as projects are developed.

26.2 SUMMARY OF ESTIMATED IMPROVEMENT COSTS

26.2.1 Collection System

A number of improvements have been identified for the collection system as outlined in Chapters 10 through 22. The pipeline alignments identified herein were based on existing GIS data including contours and streams, and were developed for planning purposes only. A summary of the collection system capital costs is outlined in Table 26.1. Shown graphically in Figure 26.1 are the planning level costs for the improvements based on 2006 dollars as well as costs based on an annual inflation rate of 3-percent.

26.2.2 Wastewater Treatment Facilities

Several improvements have been identified for the Theresa Street and NE wastewater treatment facilities as outlined in Chapter 24. A summary of these costs is outlined in Table 26.2. Shown graphically in Figure 26.2 are the planning level costs for the improvements based on 2006 dollars as well as costs based on an annual inflation rate of 3-percent.

26.3 OVERVIEW

Table 26.3 shows the Tier I planning period costs for the current 2006 City CIP and costs used for this Master Plan Update. The current City CIP costs were used for the Master Plan Update for years 2007 to 2018.

Shown in Figure 26.3 is the summation of the planning level costs for the collection system and treatment facilities improvements identified in this Master Plan Update.
