

11th Street Corridor — Street Improvements

CONSTRUCTION OVERVIEW

Lincoln on the Move is investing in improvements to 11th Street from South to “K” streets. These improvements include a mill and overlay of the existing surface and base repairs where required. Additional work with other funding sources will include upgrades on the existing curb ramps to comply with the Federal Americans with Disabilities (ADA) requirements and priority sidewalk repairs.

ACCESS DURING CONSTRUCTION

Construction will be completed in phased segments beginning at the south end of the project and moving north. The majority of construction will be completed with local traffic maintained. However, short-term full closure to through traffic will be required during certain construction operations such as mill and overlay and concrete base repairs. Access to individual properties will be maintained. The traveling public is encouraged to find alternative routes and to use the WAZE app for assistance.
