

OPEN HOUSE #3

P STREET
9th St. to 11th St.

Business and property owners within these areas are invited to complete a survey online to share important information with the project team about their business or property to consider during the construction phase.

PLAN IMPROVEMENTS

P STREET COMPLETION

The Downtown Corridors project plans to implement the remaining two blocks of the P Street streetscape between 9th and 11th Streets. The streetscape design features will build upon the existing P Street conditions with pedestrian nodes, seating, rain-gardens, and specialty lighting. Parking will be provided on the north (angled) and south (parallel) sides of the street in alignment with the existing P Street parking conditions.

The proposed plan would provide two-way vehicular traffic between 9th and 10th Streets. Two-way traffic currently exists between 10th and 11th adjacent to the Embassy Suites and west of 9th Street in the Haymarket.

PROPOSED STREETScape ENHANCEMENTS

- Two-way conversion between 9th and 10th
- Expanded pedestrian realm and green space
- Reduced lane crossings with pedestrian nodes
- Implement existing P Street amenities, paving, and specialty lighting
- Rain-garden implementation at pedestrian nodes

PROPOSED PLAN
