

Flushable? Think Twice!

Wipes Clog Pipes

Personal wipes, baby wipes, cleaning wipes... they all work great! But you should **never** flush these items down the toilet. Even wipes advertised to be "flushable" are **not**.

Wipes do not break down in the water like toilet paper does and the material can cause clogs and stoppages. Only the three P's should go down the toilet... **PEE, POO** and **TOILET PAPER**.
