

Stormwater Post Construction Best Management Practices Guidance Manual

City of Lincoln, Nebraska

2020 Edition

Stormwater Post Construction Best Management Practices Guidance Manual

Transportation and Utilities Department,
Watershed Management Division,
City of Lincoln, Nebraska

Prepared in conjunction with
Applied Ecological Services, Inc.
1904 Elm Street
Eudora, KS 66025
Original Publication: March 2006

TABLE OF CONTENTS

1. INTRODUCTION.....	6
1.1 Re-Defining a Philosophy	6
1.2 Alternative Stormwater Management.....	7
1.3 BMP Applications.....	9
1.4 Examples of BMP Applications	9
1.4.1 Parcel-Level Applications	9
1.4.2 Block and Neighborhood-Level Applications	12
1.4.3 District-Level Applications.....	13
2. BMP SELECTION.....	14
2.1 Factors Affecting Stormwater Management.....	15
2.2 Stormwater Treatment BMP Selection Matrix.....	17
3. BMP DESCRIPTIONS	19
3.1 Bioretention.....	21
3.2 Retention Pond	27
3.3 Extended Detention Basin	32
3.4 Vegetative Buffer	37
3.5 Grassed Swale	42
3.6 Green Roof	46
3.7 Infiltration Basin	52
3.8 Infiltration Planter.....	57
3.9 Infiltration Trench	61
3.10 Native Vegetation	66
3.11 Permeable Pavement	70
3.12 Rain Barrels and Cisterns.....	74
3.13 Rain Garden	79
3.14 Soil Conditioning.....	83

3.15 Stormwater Treatment Train.....	87
3.16 Underground BMP	90
3.17 Urban Forests.....	94
3.18 Vegetated Bioswale.....	98
3.19 Constructed Wetlands	103
3.20 Hydro-Dynamic Separator	108
4. LOW IMPACT DEVELOPMENT	112
4.1 Seven Benefits of Low Impact Development	112
4.2 Low Impact Development (LID) Practices for Stormwater Management	113
4.3 Applying an Ecological Systems Approach in Urban Landscapes.....	123
4.4 Impacts of Development Type on Runoff Volume and Infiltration Performance....	126
4.5 Using Native Plants to Improve Water Quality	146
4.6 Prairie Restorations: What to Expect and Why	149
5. REFERENCES.....	153
Attachment A: Example BMP Selection Matrix.....	155

Preface

The purpose of these guidelines is to provide a “toolbox” of BMP’s for improving water quality and reducing flood and impacts in Lincoln due to urbanization. Most of these guidelines were compiled specifically for Lincoln and were designed to work in our area with our soil types. Many of the BMP’s can be used in individually or in combination, to reduce stormwater pollutants and maintain the natural hydrologic function of an area. The City of Lincoln Drainage Criteria Manual provides additional information about several of the BMP’s listed in this guide in Chapter 8 - Stormwater Best Management Practices. The BMP’s listed in this guideline as well as those in the Drainage Criteria Manual have specific application and placement requirements. These guidelines are not a substitute or amendment to any existing City standards for the construction streets or stormwater drainage. Current design standards for streets and stormwater design must be considered when choosing BMP’s for a specific area.
