The glaring difference between how my Australian and UK colleagues approach a driver during a stop, and how American officers are forced to do it, is driven entirely by the ubiquity of firearms in the US (especially in vehicles). The public sees this aggressiveness as unfair.

I've noticed the same difference as @barnesgc With close to 100,000 guns stolen from cars each year, imagine how many guns are in US cars generally. No wonder American officers have to approach more cautiously than in other countries. As he says, the public see the difference.
The Five Traditional Functions of Crime Analysis

- **Intelligence Analysis** (intell analysis is the study of organized criminal activity for the purpose of assisting investigative personnel in the linking of people, events, property)

- **Criminal Investigative Analysis** (Criminal Investigation Analysis involves the study of serial criminal, victims, or crime scenes to develop patterns that will assist in solving serial activity)

- **Tactical Analysis** (involves the examination of crime incident characteristics such as how, when, and where such activity has occurred for the purpose of developing patterns and trends, identifying investigative leads or suspects, and clearing cases.)

- **Strategic Analysis** (involves the study of crime and law enforcement information integrated with sociodemographic and spatial factors to determine long-term patterns of activity and to assist in problem solving)

- **Administrative Analysis** (involves the presentation of interesting findings of crime research and analysis to inform audiences within law enforcement administration, city government or council, and citizens.)
Crime Analysis/Intel Unit
The P’s of Crime Analysis

People: ID, analyze top offenders, victims, networks/groups.

Places: ID, analyze and respond to hot spots.

Patterns: ID, analyze and respond to active patterns/series, daily searching, rapid ID.

Problems: ID, analyze and respond to long term/chronic problems, monthly, periodic problem analysis, external trends.

Predictive/Forecasting: Developing tools and analytical processes, actionable, prior behavior, prior seasons/years/months.

Preventive: Monitoring historical events to include people/places/patterns/problems to enable corrective actions.

Crime Analysis & Intelligence Unit - Lincoln Police Department
The following report is an analysis of four separate Incident Report types within the Lincoln Police Department, to include Suicide, Attempt Suicide, Death and Narcotics Overdose (IR 27444). Each of the Incident Report types were reviewed for 2019 and year-to-date 2020, all with a common nexus to “overdose”. Overdose includes narcotics, prescription pills, and over-the-counter pills, but excludes alcohol. The subjective review process may have minor inconsistencies* in how the Incident Report type is ultimately determined to be an overdose.

The narcotic overdose cases are broken down by race and age demographics in the two tables below. Not noted in the tables is sex demographics, however, since 2015, males account for approximately 59% and females for 41% of all narcotic overdose cases.

4 of last 8 stolen = Toyota Prius
Lincoln Weapon/Shooting Offenses
(Criminal Investigative Analysis)
(Tactical Analysis)
2020 - Total of 72 shots fired year to date – up from 64 last month. All classified as either Weapons, Vandalisms & Assaults/Non-Fatal.

7 of the 64 are non-fatal shootings & 6 are homicides.

The 7 non-fatal shootings are all classified as Assaults and therefore those two categories are combined into one.

There have been zero robberies year to date involving shots fired, but that category has been added since going back an analyzing 2019.

Weapons up from 29 to 34
Vandalism stayed the same
Total shots fired up from 46 to 51
Assaults/Non-Fatal up from 13 to 15
Fatal up one from 5 to 6
Total – Up 8 from 64 to 72
STOLEN GUNS as of September 16, 2020

Strategic Analysis

The following is stolen gun data year-to-date, Jan 1 - Sep 16, 2020, obtained via Incident Reports, and also citations issued for violation of Municipal Code “Firearms in Unattended Motor Vehicle”, 9.36.110.

2020 Incident Reports:

- 77 Stolen guns (up 12 from last month, which is a 18.46% increase)
- 63 Incidents (One person had 5 guns stolen, which equals ONE Incident)
- 26 (33.8%) of the 77 stolen have been recovered
- 29 stolen from autos
- 13 stolen from burglaries
- 22 stolen from buildings
- 7 lost/stolen

Violation of Municipal Code, 9.36.110

- 10 Citations Issued for Firearms in Unattended Motor Vehicle (Up 1 from last month)

Gun Registrations Entered

- 5,198 through August 2020

Handgun Permits Approved

- 2018 = 3,037
- 2019 = 2,950
- 2020 = 4,205 YTD
