

Before you dive into your neighborhood's statistics, there are some things you need to know:

□ Navigation

The file for each neighborhood includes several bookmarked sections. To use the bookmarks for convenient access, select the page icon with the blue ribbon in the upper left of your document window.

□ The Sources

- The **2010 Census Profile** is compiled using data collected during the 2010 US Census door-to-door survey.
- The **ACS** (or American Community Survey) **Housing** and **Population Summaries** were compiled using data collected during 2005 – 2009 by the US Census Bureau using statistical sampling techniques.
- The **Community Profile** and the **Housing Profile** include hard statistics from the 2000 US Census. The accompanying 2010 and 2015 forecasts were generated by specialized geographic information system (GIS) software from a company named Esri.
- The **Executive Summary** pulls information from all of the sources listed above and provides an overview.

□ Accuracy

When a data source uses forecasts or statistical analysis to generate data, a margin of error is always introduced. As a general rule of thumb, the closer the number crunchers can stay to the actual collected data and the fewer levels of analysis, the more reliable the statistic. Read the data notes at the bottom of each page to better understand how that batch of statistics was created.

Also, the ACS Summaries include a “Reliability” column which evaluates the particular statistic on that line as being of low, medium, or high reliability.

□ Other Statistics, Other Areas

This set of statistical resources is provided as a courtesy to Lincoln's neighborhood associations. If you want to pursue different statistics or statistics for other areas of Lincoln, that may be possible but please be aware that it will involve paying for the service. Contact urbandev@lincoln.ne.gov to inquire further.

Population

1990 Population	136
2000 Population	650
2010 Population	692
2015 Population	726
1990-2000 Annual Rate	16.93%
2000-2010 Annual Rate	0.61%
2010-2015 Annual Rate	0.97%
2010 Male Population	50.6%
2010 Female Population	49.4%
2010 Median Age	35.2

In the identified area, the current year population is 692. In 2000, the Census count in the area was 650. The rate of change since 2000 was 0.61 percent annually. The five-year projection for the population in the area is 726, representing a change of 0.97 percent annually from 2010 to 2015. Currently, the population is 50.6 percent male and 49.4 percent female.

Population by Employment

Currently, 98.1 percent of the civilian labor force in the identified area is employed and 1.8 percent are unemployed. In comparison, 89.2 percent of the U.S. civilian labor force is employed, and 10.8 percent are unemployed. In five years the rate of employment in the area will be 98.4 percent of the civilian labor force, and unemployment will be 1.6 percent. The percentage of the U.S. civilian labor force that will be employed in five years is 91.2 percent, and 8.8 percent will be unemployed. In 2000, 82.4 percent of the population aged 16 years or older in the area participated in the labor force, and 0.2 percent were in the Armed Forces.

In the current year, the occupational distribution of the employed population is:

- 80.8 percent in white collar jobs (compared to 61.6 percent of the U.S. employment)
- 9.6 percent in service jobs (compared to 17.3 percent of U.S. employment)
- 9.6 percent in blue collar jobs (compared to 21.1 percent of U.S. employment)

In 2000, 93.7 percent of the area population drove alone to work, and 2.9 percent worked at home. The average travel time to work in 2000 was 18.3 minutes in the area, compared to the U.S. average of 25.5 minutes.

Population by Education

In the current year, the educational attainment of the population aged 25 years or older in the area was distributed as follows:

- 0.7 percent had not earned a high school diploma (14.8 percent in the U.S.)
- 10.7 percent were high school graduates only (29.6 percent in the U.S.)
- 7.5 percent had completed an Associate degree (7.7 percent in the U.S.)
- 36.7 percent had a Bachelor's degree (17.7 percent in the U.S.)
- 20.0 percent had earned a Master's/Professional/Doctorate Degree (10.4 percent in the U.S.)

Per Capita Income

1990 Per Capita Income	\$14,912
2000 Per Capita Income	\$30,940
2010 Per Capita Income	\$38,761
2015 Per Capita Income	\$41,197
1990-2000 Annual Rate	7.57%
2000-2010 Annual Rate	2.22%
2010-2015 Annual Rate	1.22%

Households

1990 Households	34
2000 Households	200
2010 Total Households	218
2015 Total Households	231
1990-2000 Annual Rate	19.44%
2000-2010 Annual Rate	0.86%
2010-2015 Annual Rate	1.17%
2010 Average Household Size	3.17

The household count in this area has changed from 200 in 2000 to 218 in the current year, a change of 0.84 percent annually. The five-year projection of households is 231, a change of 1.13 percent annually from the current year total. Average household size is currently 3.17, compared to 3.25 in the year 2000. The number of families in the current year is 184 in the specified area.

Data Note: Income is expressed in current dollars

Households by Income

Current median household income is \$101,925 in the area, compared to \$54,442 for all U.S. households. Median household income is projected to be \$109,803 in five years. In 2000, median household income was \$85,258, compared to \$45,000 in 1990.

Current average household income is \$116,707 in this area, compared to \$70,173 for all U.S. households. Average household income is projected to be \$122,482 in five years. In 2000, average household income was \$99,416, compared to \$48,390 in 1990.

Current per capita income is \$38,761 in the area, compared to the U.S. per capita income of \$26,739. The per capita income is projected to be \$41,197 in five years. In 2000, the per capita income was \$30,940, compared to \$14,912 in 1990.

Median Household Income

1990 Median Household Income	\$45,000
2000 Median Household Income	\$85,258
2010 Median Household Income	\$101,925
2015 Median Household Income	\$109,803
1990-2000 Annual Rate	6.60%
2000-2010 Annual Rate	1.76%
2010-2015 Annual Rate	1.50%

Average Household Income

1990 Average Household Income	\$48,390
2000 Average Household Income	\$99,416
2010 Average Household Income	\$116,707
2015 Average Household Income	\$122,482
1990-2000 Annual Rate	7.47%
2000-2010 Annual Rate	1.58%
2010-2015 Annual Rate	0.97%

2010 Housing

1990 Total Housing Units	36
2000 Total Housing Units	201
2010 Total Housing Units	222
2015 Total Housing Units	237
1990 Owner Occupied Housing Units	32
1990 Renter Occupied Housing Units	2
1990 Vacant Housing Units	4
2000 Owner Occupied Housing Units	177
2000 Renter Occupied Housing Units	23
2000 Vacant Housing Units	5
2010 Owner Occupied Housing Units	190
2010 Renter Occupied Housing Units	28
2010 Vacant Housing Units	4
2015 Owner Occupied Housing Units	202
2015 Renter Occupied Housing Units	29
2015 Vacant Housing Units	6

Currently, 85.5 percent of the 222 housing units in the area are owner occupied; 12.7 percent, renter occupied; and 1.8 are vacant. In 2000, there were 201 housing units - 86.3 percent owner occupied, 11.2 percent renter occupied, and 2.4 percent vacant. The rate of change in housing units since 2000 is 0.98 percent. Median home value in the area is \$206,250, compared to a median home value of \$157,913 for the U.S. In five years, median value is projected to change by 2.12 percent annually to \$229,054. From 2000 to the current year, median home value change by 1.00 percent annually.

Data Note: Income is expressed in current dollars

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography. Average family size excludes nonrelatives.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2006 and 2007 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Average Household Income for HHr 65+	N/A		N/A	

Data Note: N/A means not available. Population by Ratio of Income to Poverty Level represents persons for whom poverty status is determined. Household income represents income in 2009, adjusted for inflation.

2005-2009 ACS Estimate: The American Community Survey (ACS) replaces census sample data. Esri is releasing the 2005-2009 ACS estimates, five-year period data collected monthly from January 1, 2005 through December 31, 2009. Although the ACS includes many of the subjects previously covered by the decennial census sample, there are significant differences between the two surveys including fundamental differences in survey design and residency rules.

Margin of error (MOE): The MOE is a measure of the variability of the estimate due to sampling error. MOEs enable the data user to measure the range of uncertainty for each estimate with 90 percent confidence. The range of uncertainty is called the confidence interval, and it is calculated by taking the estimate +/- the MOE. For example, if the ACS reports an estimate of 100 with an MOE of +/- 20, then you can be 90 percent certain the value for the whole population falls between 80 and 120.

Reliability: These symbols represent threshold values that Esri has established from the Coefficients of Variation (CV) to designate the usability of the estimates. The CV measures the amount of sampling error relative to the size of the estimate, expressed as a percentage.

-  High Reliability: Small CVs (less than or equal to 12 percent) are flagged green to indicate that the sampling error is small relative to the estimate and the estimate is reasonably reliable.
-  Medium Reliability: Estimates with CVs between 12 and 40 are flagged yellow—use with caution.
-  Low Reliability: Large CVs (over 40 percent) are flagged red to indicate that the sampling error is large relative to the estimate. The estimate is considered very unreliable.

Data Note: N/A means not available.

2005-2009 ACS Estimate: The American Community Survey (ACS) replaces census sample data. Esri is releasing the 2005-2009 ACS estimates, five-year period data collected monthly from January 1, 2005 through December 31, 2009. Although the ACS includes many of the subjects previously covered by the decennial census sample, there are significant differences between the two surveys including fundamental differences in survey design and residency rules.

Margin of error (MOE): The MOE is a measure of the variability of the estimate due to sampling error. MOEs enable the data user to measure the range of uncertainty for each estimate with 90 percent confidence. The range of uncertainty is called the confidence interval, and it is calculated by taking the estimate +/- the MOE. For example, if the ACS reports an estimate of 100 with an MOE of +/- 20, then you can be 90 percent certain the value for the whole population falls between 80 and 120.

Reliability: These symbols represent threshold values that Esri has established from the Coefficients of Variation (CV) to designate the usability of the estimates. The CV measures the amount of sampling error relative to the size of the estimate, expressed as a percentage.

- High Reliability: Small CVs (less than or equal to 12 percent) are flagged green to indicate that the sampling error is small relative to the estimate and the estimate is reasonably reliable.
- Medium Reliability: Estimates with CVs between 12 and 40 are flagged yellow—use with caution.
- Low Reliability: Large CVs (over 40 percent) are flagged red to indicate that the sampling error is large relative to the estimate. The estimate is considered very unreliable.
