Subject: City Council meeting follow up

Dear Lincoln City Council Members,

Thank you for the opportunity to present the "Clear and Present Danger to Lincoln - Under the Mayor Gaylor Baird Administration" document and comments at the recent city council meeting on Monday, April 15, 2021. I am grateful for your time and attention and acknowledge and appreciate the tremendous effort each of you expends as conscientious council members to represent the best interests of the citizens of Lincoln, Nebraska.

I provided you with printed copies of the above-referenced document. I also now want you to be able to have a copy of this same presentation in .pdf format. There was a bit of a mixup in my understanding whether a laptop or other presentation device would be available and set up for the presentation. In any event, you can view and download the same document in .pdf format. And, I would also like that this electronic version in .pdf format to be part of the official record, if that is possible or appropriate.

You can access, read, review and download that .pdf here:

<https://www.dropbox.com/s/d8k6ghlfve91sjf/Presentation 4 12 2021.pdf?dl=0>

As I tried to make clear, these dangerous fires near and around encampments in the West "O" area of Lincoln are dangerous, repetitive, and surely can be anticipated to occur again; given the inattention of the city administration to take any responsible action.

And, I would like to point out, that in addition to the danger to the citizens of Lincoln, and to those who occupy the tent encampments, the current approach (for at least two years now) of the Mayor's administration in dealing with this places the firemen and firewomen of the Lincoln Fire and Rescue Department in severe danger of injury and death. That should not happen and must be corrected.

Unfortunately, my wife's family has suffered the loss of a dear family member (a NYC fireman) in a preventable catastrophe last year, because the obvious and fairly easy-to-effect safety policies and procedures were ignored. We have several other members of fire departments in our family and are personally aware of their daily commitment. So, while we are personally aware of the consequences of inattention to these matters, you, the leaders of Lincoln, Nebraska have the immediate opportunity to do what is right to prevent dangerous injury and loss of life for those who serve us as firemen and firewomen and all of the citizenry.

I do intend to follow up with Tammy Ward, who represents our district, and give her more detail than I was able to present in the five-minute open mic session this past Monday.

And, I reiterate that you should contact the insurer and re-insurance carriers for the City of Lincoln and make them aware of this matter, so that there is adequate coverage when these fires occur, get out of control, and hurt a lot of people and destroy property.

Again, thank you. I know you care, and now with the knowledge of this dangerous situation, we look forward to your positive collective action.

Kind regards,

David

David Hahn

Subject: Entire prepared CC Council Statement for 4.12.21 that I did not have time to deliver

Council Members and Friends-

On Dec 31 of 2019, the W.H.O. China Office was informed of cases of pneumonia of "unknown etiology" ...

By Jan 3rd, there were a total of 44 patients, 11 of which were severely ill.

A whopping pandemic in the making, for sure.

On January 7, 2020, an alleged novel contagion was identified as the causative agent of this MASSIVE outbreak.

On January 10, 2020, the alleged genome of the alleged contagion was announced.

(Break. If you understand basic logic and science, you know this was nowhere near the time required to isolate and prove a novel cause over and against all other possible and normal causes.

Pneumonia doesn't even require anything more than pollution, smoking, obesity, and/or a toxic diet and lifestyle, to manifest.

Why would anyone even suggest, or look, for a novel cause?? ...unless there was an agenda in place. But then, no looking is even required. Just make it up. And that's exactly what they did...way ahead of time.)

On July 13th, 2020 July The CDC releases a document (entitled, ' CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel For Emergency Use Only Instructions for Use' (1)) about the PCR test wherein it is stated that:

"no quantified virus isolates of the 2019-nCoV are currently available"

Never mind that the test was never approved for anything but emergency use only, which means it is purely experimental and can't be imposed on anyone.

On Oct 9th of 2020, a letter to the Editor of the BMJ from a retired GP in Wales (Janet Menage) is published asking what this (the quote above about the PCR) means, and if it is this is the "best science."

That same day, another letter to the Editor of the BMJ is published from a Public Policy Director in Washington State wherein she states, "I, too, want to know what the CDC meant" by that statement.

She goes on to say:

As Public Policy Director of a nonprofit with a mission to restore scientific integrity to public health policy, I have stayed on the sidelines of the debate about whether or not SARS-COV-2 virus actually exists, choosing instead to focus on educating about existing inexpensive treatment protocols that are being marginalized. No matter what the cause, people the world over are being hospitalized and dying, and the first step in eradicating

fear is to provide hope. Knowledgeable practitioners have been using nutrient and oxidative therapies, as well as non-patentable drugs, to successfully address viral infections for decades and longer, and those same methodologies work even if the exact viral cause of the symptoms is unknown. They are working for those who "test positive" for COVID-19. (2)

But the world has been devastated by the unprecedented response to a "novel virus" with severe shut downs and restrictions, and in some places, such as my home state, there is no end in sight to the measures, despite the existence of effective treatments, the fact that more than 99% of individuals are not at risk of severe infection outcome, and the peak in fatalities was over months ago. We are told to continue distancing, masking, and waiting for vaccines, which are unlikely to provide a safe or effective solution, based on the history of coronavirus vaccine development and the results emerging from clinical trials.

We all deserve to know the truth about this virus and what PCR test results really mean. (end quote)

On Feb 6th of this year, the GP (Janet Menage) from Wales writes another letter to the BMJ:

Dear Editor:

History is littered with examples of the atrocities which ensue when doctors abandon their traditional principles and judgement in favour of unquestioning subservience to government diktat – medical involvement in torture, human experimentation and psychiatric punishment of political dissidents being familiar examples.

Abbasi takes as axiomatic that there was no prior immunity in the population, that lockdowns are effective, that computer modelling is realistic, that statistics have been accurate and that WHO statements are reliable. All of these parameters have been widely challenged by knowledgeable and conscientious researchers whose findings were often disregarded, censored or vilified.

From a medical perspective, it was clear early on in the crisis that disregarding clinical acumen in favour of blind obedience to abnormal ventilation measures, reliance on an unsuitable laboratory test for diagnosis and management, and abandoning the duty of care to elderly hospitalised patients and those awaiting diagnosis and treatment of serious diseases, would create severe problems down the line.

Doctors who had empirically found effective pharmaceutical remedies and preventative treatments were ignored, or worse, denigrated or silenced. Information regarding helpful dietary supplements was suppressed.

This was further compounded by rule-changes to death certification, coroners' instructions, autopsy guidelines, DNR notices and the cruel social isolation policy enforcement regarding family visits to the sick and dying.

When medical professionals allow themselves to be manipulated by corrupt politicians and influenced by media propaganda instead of being guided by their own ethical principles and common sense based on decades of clinical experience, the outlook becomes very bleak indeed.

Historically, public respect for and trust in doctors has exceeded that awarded to politicians. The unquestioning capitulation of medicine to an authoritarian executive and predatory corporate power may have undermined the doctor-patient relationship for a generation." (end quote)

The PCR test doesn't test for contagions. It tests for nucleic acids, which find their source in every living thing, including human beings, animals, plants, bacteria, and fungi.

Moreover, the test is not binary. It doesn't return a simple positive or negative result. The line between the two is entirely arbitrary, which is where the false doctrine of asymptomatic carrier and transmission comes from.

Fraudulent testing is behind the whole cov!d scam.

****There is no formal, standardized, clinical diagnostic criteria for cov!d.****

Without a positive PCR test, there can be no cases or actual cov!d illness and death. (A case doesn't require illness.) It's ALL BS!

Other causes of death are being hijacked by a v!rus *narrative. The CDC says as much.

The whole thing was driven by an non-approved test.

XXXXXXXXXXXX

Catherine Fits:

Let's pretend we're in a world where we have two groups of people. One consists of on-line retailers. The other, of main street retailers. The online retailers and their pals pretend that there's a plague. And they announce that all the main street retailers are non-essential. At which point, the Central Bank prints a lot of money which they lend to the online retailers at 0%. And those retailers can now take over the market share of the main street retailers, essentially for free. They can take all their income and that drives their stock up. So their stocks go way up and let's say they sell their stocks when they are very high. And they reinvest that money in building out smart grids in communities so that they can expand their market share even further. And let's say the government creates something called opportunity zones where they can shelter their capital gains tax on their sale of stocks. So how do they get a whole lot of real estate fast and cheap? Well, they send in an army of protesters to burn the place down, in the opportunity zones, and that enables them to pick up the real estate for cheap. (end quote)

Nevermind the main street retailers who were simply run out of business, because they were regarded as non-essential by executive tyrants.

Sound familiar?

Lastly, simply sequencing pieces of genetic material and stringing them together does not constitute isolating and characterizing a v!rus, nor proving it pathogenic and contagious, nor proving one even exists.

AG Doug Peterson
Nebraska Attorney General's Office
2115 State Capitol
PO Box 98920
Lincoln, NE 68509

Dear AG Peterson-

I served Lincoln's Mayor, Leirion Gaylor Baird, with a formal public records request for a digital copy of her covid vaccine card.

She presented herself, in her official public capacity, as an example for the public to follow with regard to getting the covid vaccine.

The event was staged for a photo op, and the photo was posted on her official Facebook page (see link below), which makes it "a public record and subject to the [sic] Nebraska's Open Government and Public Records laws." (See image #13 attached.)

<https://www.facebook.com/MayorLeirion/posts/918459598970913>

The public has a right to know whether this event (of her receiving a covid vaccination) was genuine or not...whether she actually received the vaccine or not. [Especially given the side effects people are experiencing, including death.]

The only way for the public to know this at this point...the only way for the public to know that her example is genuine, and therefore worthy of being followed, is to see her vaccination card/record. In the event that it becomes necessary to show proof of vaccination, no one can simply present a picture of themselves with a needle in their arm and pass that off as proof of vaccination. A vaccination card must be presented. The public deserves to know if she is being honest. Granted, she could forge the document, but that would not be wise, as it could come back to haunt her.

She has denied my request multiple times. See all correspondence connected with my requests attached to this email.

Can you help us with this??

My mission is simply to hold elected and appointed officials accountable to We the People they were elected to serve, and to keep them honest in all their dealings with their constituents.

Please call or write if you need additional information.

Thank you for your assistance.

Sincerely,

Robert J. Borer

Public Records Request for Mayor Baird's covid vaccination card - robert.borer@doane.edu - Doane University Mail

Rick W. Tast

2:34 PM (1 hour ago)

to Rick, Tiffany, Danielle, me

Mr. Borer,

This office has already provided a formal denial to this request on two previous occasions. Please refer to the emails sent to you on April 8, 2021 and April 13, 2021.

If you believe any records have been unlawfully withheld, please consult Neb. Rev. Stat. § 84-712.03 to determine your right to seek administrative and/or judicial review of this office's previous determinations.

Rick

Public Records Request for Mayor Baird's covid vaccination card - robert.borer@doane.edu - Doane University Mail

Robert Borer <robert.borer@doane.edu>

11:08 AM (5 hours ago)

to Rick, bcc: fanchon, bcc: Carey, bcc: J, bcc: Christopher, bcc: Mary, bcc: Ben, bcc: tony, bcc: Samuel, bcc: Allie, bcc: Allyssa, bcc: Ioan.eby, bcc: Patrick, bcc: Mark, bcc: Mark, bcc: C

Rick-

The matter of requesting and obtaining a copy of Baird's covid vaccination card is NOT closed. You have not provided me with an official formal denial. You have only said it was not appropriate. I maintain it IS appropriate, because she made her vaccination a matter of public record by posting the vaccination on her "Government Official" FB page titled: "Mayor Leirion Gaylor Baird." It directly states therein that "This is the official City of Lincoln account for Mayor Leirion Gaylor Baird. All information on this site is a public record and subject to the Nebraska's Open Government and Public Records laws."

Her covid vaccination is a matter of public record. See link directly below. This makes her record of that vaccination a matter of public record.

<https://www.facebook.com/MayorLeirion/posts/918459598970913>

Please issue me a digital photo copy of Baird's covid vaccination card...OR a formal denial, so that I may seek redress.

Thank you.

Robert Borer

mayor refuses to show evidence of getting the vaccine - robert.borer@doane.edu - Doane University Mail

Rick W. Tast

Apr 13, 2021, 3:57 PM (2 days ago)

to Mayor, coucilpacket@lincoln.ne.gov, Pat, Jennifer, Yohance, Danielle, Tiffany, Rick, me

Bob,

It should be noted the CDC, WHO, and OSHA do not require a vaccine administrator to wear gloves while giving vaccines. See generally: [During Vaccination Clinic Activities | CDC](#).

As it relates to your assertion that Mayor Leirion Gaylor Baird's vaccination card is a public record (contained in the second email sent by you below), your appeal of the determination the document does not constitute a public record to the City Law Department is not appropriate. You will need to consult Neb. Rev. Stat. § 84-712.03 to determine your right to seek administrative and/or judicial review of this office's determination should you choose.

Accordingly this request is considered closed.

Respectfully,

Rick

Thanks for the link. Perfect. Nor do they require anti-social face diapers. I just figured that since the baird clan requires those, and are such germaphobes, they would also require what is generally regarded as "proper." (I did say proper, not required.) Working EMS, we were always expected to wear them, and that was without handling needles. You never know when someone is going to suddenly fall ill or go down, especially with these highly toxic vaccines. (Moreover, gloves are better than soaking your hands in sanitizer all day.) But then, all of that presupposes the vaccine was actually delivered, and we know it wasn't. It was all pretense, which is why you're having so much trouble on your end. Baird is as fake as they come, and I pity you for having to come to her defense.

Good day.

Rick-

Public record or not, she proves to be incapable of providing even a smidgen of evidence of integrity. Not that we expected her to be capable. We knew she wasn't. She doesn't have any (integrity). Just thought we'd give her a chance to follow through on the pretense and try to fool us. Her puppet nurse didn't even know how to don the proper ppe in the pretended administration of the "vaccine." How funny. You woulda thought one of them would have caught that before snapping and publishing the pic.

Good job, Rick. Thanks for helping her find a loophole in the letter of the law. This is really what we wanted. It gives concrete evidence of her true spirit, which some, who are unfortunate enough to have to work directly with her, say does not contain any moral fiber whatsoever.

You might just be on our side after all.

We will tell everyone your beloved boss refused to show evidence of getting the vaccine.

Yours truly.

Okay. I've decided to revisit this, pursuant to the statute you referenced: NEB. REV. STAT. § 84-712.03.

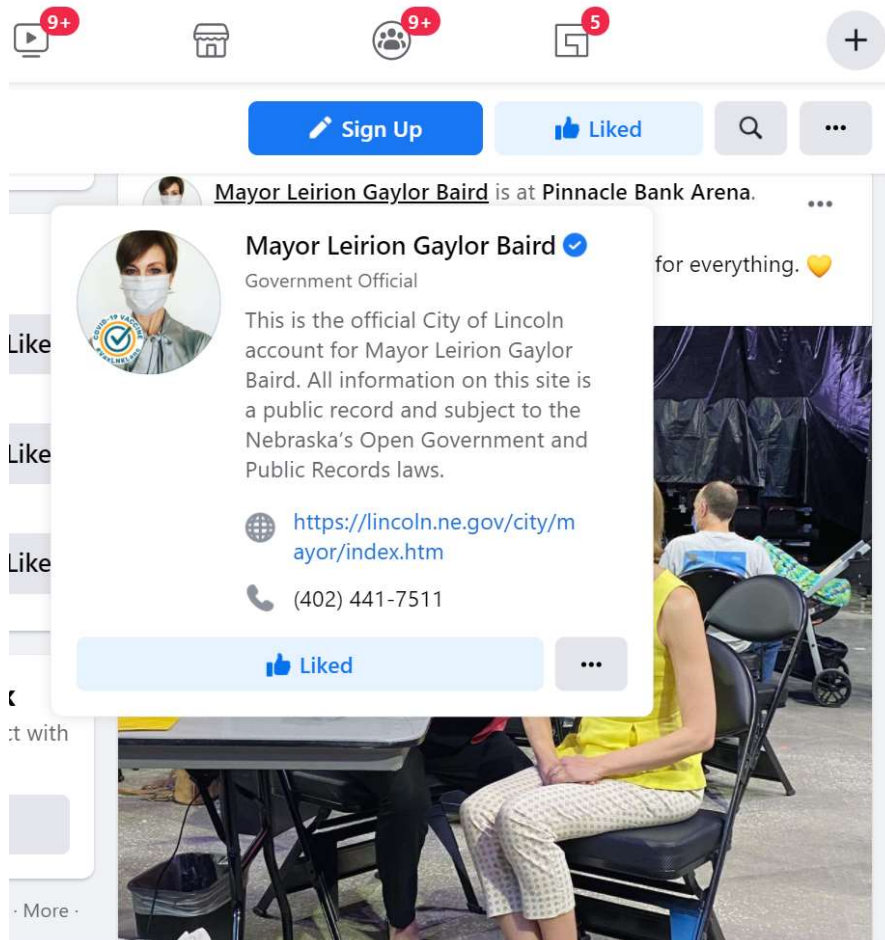

Baird's vaccination, and the associated card, are a matter of public record. The image below says as much. The alleged vaccination involved two public officials, the Head of the LLCHD and the Head of the Mayor's office, operating in their respective official capacities, to publicly advocate for the corporate vaccine. It was photographed and shared on Baird's official FB page. See text and image below.

RE: Public Records Request dated April 8, 2021

Mr. Borer,

This correspondence will serve as the City of Lincoln's response to your public records request dated April 8, 2021 directed to Mayor Leirion Gaylor Baird. The request stated:

"In the interest of holding elected officials accountable, and affirming their integrity—or lack thereof—to the public, and given that you have waived your right to privacy by publicizing the event of your covid vaccination in an attempt to persuade others to follow suit, I am requesting, pursuant to Nebraska Public Records Law § 84-712 et seq., the following:

-a digital photo copy of your covid vaccination card"

NEB. REV. STAT. 84-712.01 states:

"...public records shall include all records and documents, regardless of physical form, of or belonging to this state, any county, city, village, political subdivision, or tax-supported district in this state, or any agency, branch, department, board, bureau, commission, council, subunit, or committee of any of the foregoing."

Vaccinations cards provided to individuals receiving COVID-19 vaccine by the Lincoln-Lancaster County Health Department do not constitute a public record. For this reason, the City of Lincoln has no documents responsive to your request.

If you believe any records have been unlawfully withheld, please consult NEB. REV. STAT. § 84-712.03 to determine your right to seek administrative and/or judicial review of this office's determination.

Kind regards,
Rick Tast
Assistant City Attorney

Subject: How to shut the "pandemic" down in one easy step

Senators, Council Members, Colleagues, Family, Friends, etc.,

Test Nebraska has but one lab.

It is located inside the St. Elizabeth Medical Center at 575 S. 70th St., Lincoln, NE 68510.

This lab is separate from their own lab.

All samples/specimens collected at Test Nebraska collection sites go to this lab and are tested with a "Co-Diagnostics **PCR** assay."

Specifics about this assay can be found publicly online at this location:

https://codiagnostics.com/wp-content/uploads/2020/12/Logix-Smart-SARS-CoV-2-COVID-K-002-RUO-Instructions-for-Use-IFU-Rev_0.pdf

On page 3 of this instruction manual, it states:

The Logix Smart SARS-CoV-2 (COVID-K-002) Test kit is a **research use only** multiplex test, based on real-time PCR (qPCR) technology, for the simultaneous qualitative detection of SARS-CoV-2 (COVID19) specific RNA. For research use only (RUO). **Not for use in diagnostics procedures.**

And then, in the PCR instruction manual put out by the CDC, titled: "CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel For Emergency Use Only Instructions for Use" (Revision 6), it states, under the subheading "Warnings and Precautions":

For **in vitro diagnostic use** (IVD).

- This test has not been FDA cleared or approved; this test has been authorized by FDA under an **EUA** for use by laboratories certified under CLIA, 42 U.S.C. § 263a, to perform high complexity tests.
- This test has been authorized **only for the detection of nucleic acid** [that allegedly belongs to a virus...it doesn't test for a virus, per se]....

- This test is **only authorized for the duration of** the declaration that circumstances exist justifying the authorization of **emergency** use of in vitro diagnostic tests...

"In vitro means" they are not directly testing a specimen from the body, but contaminating it first by mixing it with reagents.

"EUA" means this test can only be used as long as there is an "emergency" in place. Once the "emergency" is over, it can no longer be used!

This is the primary reason the powers-that-be are keeping the emergency declaration in place.

Without the EUA/experimental testing (fraudulent testing is more accurate), there can be no more cases, symptomatic or asymptomatic...period.

And without cases, there can be no "pandemic."

Again, the PCR test doesn't test for contagions. It tests for nucleic acids only, which find their source in every living thing, including human beings, animals, plants, bacteria, fungi and so-called viruses.

Moreover, the PCR test is not binary. It doesn't return a simple positive or negative result. But a line must be drawn between the two, and that line is aggregate and entirely arbitrary, which is where the false twin doctrines of asymptomatic carriers and asymptomatic transmission come from.

Fraudulent testing is behind the whole cov!d scam.

****There is no standardized, clinical, diagnostic criteria for cov!d.** There simply isn't. Therefore there is no covid *without a test!* There's just the same old respiratory diseases we've always had, just aggravated by fear, isolation and medical malpractice.**

All alleged covid deaths have either been due to pre-existing morbidity that was hijacked by a v!rus *narrative, via a fraudulent test, that resulted in medical malpractice (that's why 92% were 65 and over, and 48% took place in LTC facilities), or they resulted from medical malpractice in the event of an acute illness, or both.

That's it.

The whole planned "pandemic" has been driven by a politically motivated virus narrative and an unapproved PCR test.

Want to shut the "pandemic" down?? Want to shut the fear and fear-mongering down?? Want to shut the masking of our children down?? Want to shut the massive needless spending and waste down that will only result in economic disaster and the slavery of our children, and maybe even ourselves?? Want to return to normal??

If so, then shut down the phony "state of emergency"!!!

Without the "state of emergency" there can be no more phony PCR testing.

The rest of the dominos immediately fall from there. Including vaccinating the world with highly toxic

and experimental vaccines.

It's that easy.

It's just a matter of who's going to do it. Our executives won't. And the judiciary in this state (as it is in most) is dragging its feet like a dog with two broken hind legs. That means our deliberative bodies must come to the rescue and be our heroes. You must act on behalf of We the People. If you lose, at least we know who our domestic "enemies" are, and we can rout them out. Lack of transparency, trade deals under the table, democrats running as conservatives, getting elected and then voting as rank leftists, etc...these things are all killing us.

You have to try, you have to propose, you have to do your jobs, so We the People can do ours. If you don't do yours, and do them soon, it's not going to be pretty. America won't survive its foreign enemies. We are destroying ourselves from within, and all our enemy will have to do is waltz in.

Are you watching what is going on in our Nation's Capital? The Democrats are doing everything they can to do us in.

We are now in a real crisis...a real emergency...and not because of a "virus."

We need to get rid of the fake emergency so we can fight the real one.

So-called public health agencies, and their political allies (in the executive branch, especially), are now domestic public enemy number one. They are the leading threat to our health, in every aspect...economically, emotionally, mentally and physically.

Please do what is right. And let the chips fall where they may.

Greetings!

Attached please find a letter of support in regards to an important resolution you have placed on your meeting agenda for next week.

Please let us know any questions and how to best be of assistance with this matter.

In closing thank you for your consideration of this communication and for your ongoing commitment to public service.

All our best,

Danielle Conrad, J.D.

RE: Proposed Resolution 21-R151

Dear Honorable Members of the Lincoln City Council,

For over 50 years in Nebraska, the ACLU has worked in courts, legislatures, and communities to protect the constitutional and individual rights of all people. With a nationwide network of offices and millions of members and supporters, we take up the toughest civil liberties fights. Beyond one person, party, or side — we the people dare to create a more perfect union.

Nebraska

134 S. 13th St. #1010
Lincoln, NE 68508
(402) 476-8091
aclunebraska.org

We write in support of Proposed Resolution 21-R151, which affirms the City's commitment to diversity and inclusion and restates the City's opposition against racism and hatred based on race, nationality, or ethnicity.

It is well established that "Nebraska has some of the country's fastest growing communities of color" including Hispanic and APPI residents.¹ Our community has rightly taken pride in our tradition of welcoming people, including people who are immigrants, refugees, and asylees. We are fortunate to have a diverse community and many people who are AAPI Americans and people of AAPI descent calling Lincoln home.² These residents work in all parts of our economy, have children who attend schools in our city, and enrich our community culture.

The time is right for this resolution. In recent months there have been a notable and measurable increase in anti-AAPI hate crimes and discrimination throughout this country. We commend local leaders for giving voice to these issues and honor their authentic lived experiences that challenge us all to be better and do better.³ All residents should know that the City of Lincoln rejects racism and bigotry and reaffirms our commitment to a diverse, supportive, inclusive, and protective community. Thank you for your time and consideration of this matter and for your ongoing commitment to public service.

Sincerely,

A handwritten signature in blue ink, appearing to read "Danielle Conrad".

Subject: Air Park Rec Center - SUPPORT

To whom it may concern,

I live in the Air Park area and my kids attend Arnold Elementary. **I'm writing my letter of support for the new Air Park Rec Center.**

As a social worker in Omaha and my children attending school in Lincoln, I see the need and benefit for a safe environment for our children in the community. The current rec center is in poor condition and a new building is needed in our community to create a safe environment for our children. My kids also attend the before school programming offered via Parks & Rec / Air Park Rec.

Again, my letter is of support for the new building.

Thank you,

Rachel Houston PCMSW/PLMHP

Subject: Bond financing Airpark Rec Center

Lincoln city council,

I would like to voice my opinion and support for bond financing for the Air Park Rec Center. Parks & Rec has worked at raising money for the project, but it needs public support with bond financing to get the much needed project underway.

I have been a resident of Lincoln for almost 13 years, and was pleased to purchase a home in Hub Hall sub division of NW Lincoln in 2007. I have seen the growth in the area since my husband and I moved in. The rec center has been a place for my kids to go after school, summer camps, and a place for have practices. The joke among my kids when it rains is will there be buckets to catch the rain with leaks in the roof (and the sporadic air conditioning during the summer for day camps). Many of my neighbors have voiced concern to me about the current buildings safety, and have expressed excitement to the new center and them using it for everything from birthday parties to family reunions and feeling proud to be using the facility.

The community and neighborhoods are growing in this area as evidenced with the building of NW High it can be expected it will continue to increase demand on the facilities like the new rec center.

Please approve the bond financing to include the Air Park Recreation Center project.

Sincerely
Molly Petrik

Subject: Airpark Recreation Center

The Airpark Recreation Center has been a staple for many generations of families in the Airpark area. Before and After School care has always been full. Drop In gym use especially over lunch has always been busy. Boxing had been a mainstay for a number of years, and how the Rock Steady boxing program helps a multitude of adults suffering from Parkinson's.

We have held a number of events at the center including Easter Egg Hunts, Halloween parties, and National Night Out events.

But the old building has been getting tired for some time now and I can't believe it is cost effective to continue the baling wire and duct tape repairs necessary to keep this 70+ year old building going.

Replacement of the building has been discussed for many years.

Back in 2008 when the proposal was made to replace the General Arnold Elementary School (also a left over from Lincoln Air Base days), it was determined that the new school building would house the elementary school, the public library, and eventually the recreation center.

The city even put forth some funding to prepare the new school building for this planned addition in the future.

Zoom ahead 10 years and the community is still waiting for the funding to be found to fulfill this promise.

So now it is in your hands. The mechanism is in place to provide the needed funding to complete this project. We need your votes to make this a reality.

Let's get this new building funded and begin construction before the old building cannot be utilized any longer.

The Arnold Heights Neighborhood Association requests that you vote yes to approve the Certificate of Participation (COPS) bond financing. For this project

Thank You

Arnold Heights Neighborhood Association

Subject: Don't continue to buy it

Officials, Friends, Acquaintances-

Please be advised:

There is no standardized clinical diagnostic criteria for "covid."

Nor is there an approved clinical/lab test for SARS-Cov-2 (the alleged cause of "covid").

There's only an experimental, indirect and unapproved lab test that looks for small fragments of genetic material that are incorrectly interpreted as "evidence" of a novel contagion.

This test can only be used under a declared state of emergency. Doesn't matter if there's an actual emergency or not. All they need is a declaration.

Rescind the declaration and the entire thing falls apart and goes away, because the test necessarily goes away (EUA *only*).

No tests, no cases.

No cases, no fear porn.

No fear porn, no masks or experimental unapproved vaccines.

There is another way, though.

Everyone just stops volunteering to get tested.

Again, no tests, no cases.

They can't force this experimental test on anyone. (Nor the experimental vaccine.)

Voluntarily getting tested and/or vaxxed is volunteering to be a lab rat. If you test positive and need hospitalization (many people test positive and require no hospitalization, because they have no symptoms), you get treated like a leper. Fearful medical staff don't provide good care. You get under- or overtreated. (Isolation isn't treatment. It's torture.)

If you get the jab, and suffer injury or death, as many are, you are on your own. No one is obligated to pay for damages, because the fact is, you volunteered.

At 62, I continue to be completely illness free since the "pandemic" started, despite refusing to wear

a face diaper, despite refusing to social distance, despite traveling extensively, despite acting totally normal around literally tens of thousands of other normal (unmasked) people.

NOT ONE DAY OF ILLNESS DURING THIS "PANDEMIC." (It's very easy to do.)

Moreover, I haven't seen one person succumb to a deadly contagion on the street.

People get sick by means of nutritional deficiency (poor quality food), overeating, exposing themselves to toxins/pollution (in what they eat, drink, breathe, absorb and allow to be injected), not getting enough physical activity, sunshine and fresh air, and by harboring negative emotions—especially fear and bitterness. These emotions cause serious stress. Chronic stress causes/contributes to physical illness.

Health comes from the inverse. Healthy people don't get the flu, pneumonia, "covid," or anything else...all claims to the contrary notwithstanding.

The body was magnificently designed.

Microbes don't cause disease. They *occasion* a diseased condition. They are nature's/God's provision for breaking down diseased tissue and getting rid of it.

Instead of helping the body to get healthy again by means of good nutrition, rest and loving and caring touch, etc., modern medicine tries to kill the clean up crew. And that's the reason why we, as a nation, continue to descend into more and more chronic degenerative illness. They NEVER address the real problem. And why? Because it's not profitable. It's that simple.

As long as we allow the state of emergency to continue, we continue to allow the psychopaths running this operation (Gates, Fauci and the like) and their multitude of useful idiots (Biden, Baird and Co) to destroy our national, economic, physical and emotional wellbeing.

Time for it to end.

Not buying your fear porn, your child abuse, your anti-social, anti-family and anti-human boogeyman cult.
