Subject: Woods Park Master Plan
Date: Sunday, May 15, 2022 8:14:43 AM

May 15, 2022

Dear City Council Members,

Another Master Plan update to Woods Park adding six tennis courts, a building and a parking lot is in the works. This will make it the 6th or 7th master plan update/amendment in 35 years. How many other parks in Lincoln have been updated and amended as many times as Woods Park?

I would like to see an updated Master Plan for Woods Park that will finally put a stop to the encroachment of the tennis facility into the green space, improve the pedestrian circulation, add seeding and irrigation to the existing open fields and add park amenities such as benches, picnic tables and trees.

Woods Park is one of the remaining green spaces in the center of Lincoln and serves a wide breadth of individuals, including those who are underserved, live in the central core of the city and often have no political voice. The city of Lincoln should not pave over this beautiful green space just to satisfy the needs of tennis – which serves less than 1% of the city.

As a professional landscape architect, I have been on the design team for many projects throughout the city of Lincoln and around the country; several of those projects being parks. It is my opinion that the Woods Tennis facility is poorly planned and has created a barrier that park users must navigate around in order to use the park. The facility has caused drainage issues, re-routed walking paths, moved a sidewalk into the outfield of the baseball field, funneled walkers into an unsafe, narrow path between the tennis building and the baseball fence and has made it difficult for people living south of the park to access the north areas of the park. The updated Master Plan for Woods Park should include the best possible design for all the people using the park, not a design trying to fit a large tennis complex into an overcrowded park.

Woods Park is approximately 45 acres and approximately 18 acres of this land is in active 'pay to play' recreation (baseball, tennis & swimming). The park is already overcrowded and cannot support additional courts.

In a recent Lincoln Journal Star article, Lynn Johnson, Director of Parks & Rec stated that the city needs to take a broad view of the existing tennis and pickleball courts, find out how much people are actually playing and come up with a plan to meet that demand. Lynn Johnson said, "We go through the master planning process to do a better job of trying to make sure we distribute all these opportunities throughout the community rather than accidentally getting more in one part of the city". So I ask, why are all the tennis courts being concentrated at Woods Park?

Last year, Lincoln City Council passed a Climate Action Plan, pledging to reduce the city's carbon

emissions. Maintaining green space and trees in Woods Park fits perfectly into the goals of that plan – taking away green space and trees, does not. Please do your part by keeping the remaining open space in this beautiful park green.

I invite you to spend some time at Woods Park walking along the paths in the northern half and then trying to navigate around the recreational facilities. View the park as the neighbors do, and you will see that the city cannot afford to lose more green space in the center of Lincoln.

Respectfully,

Mary Anne M. Wells
