Subject: Flood plain proposal

Dear Council Members,

Please give serious consideration to adopting the proposed amendments offered by the Stormwater Coalition on the flood plain changes before you. The construction industry has been hit hard by supply chain issues from the last two years that have already driven up the costs of new construction and remodeling in this area. We do not need to add further cost increases to our city for the sake of potential flooding issues until this can be studied further. We would like to add to our existing facility in the future and adding another 1 foot to the current flood plain area that we are in would cause some major cost increases for us to add on to our building.

Thanks for your consideration,

Terry

it is with great sadness that I send you this. Can we organize testing as suggested in the below article. Just yesterday I watched a group of young boys at Lincoln City getting trained by volunteers on the basketball court who made me smile. Are they and others engaging in sports at risk?

A rare rational discussion, in this time of massive censorship, here on Robert Kennedy's program.....

<https://live.childrenshealthdefense.org/chd-tv/shows/good-morning-chd/nfl-star-drops-suddenly-with-peter-mccullough-md-mph/>

how about the other concerns I had. Do we need to each get tested for glyphosate as well as our city water. Is it really healthy and necessary for me to get a blast of chemical smells when I turn on the faucet. Do other alternatives need to be explored? you need to bring in various testing companies. I will send to you in a separate an E-mail titled:

Are the products being locally sold really safe? I've already sent you my concern about roundup with glyphosate. A local recently told me that they believed they were spraying it close to the post office at night and begged out of fear to not use their name. Get your own free email memberships to both CHD and Friends of the Earth. When **URGENT ACTION NEEDED: The EPA is deciding if it will approve bee-toxic neonics for the NEXT 15 YEARS -- we have to ACT NOW!**

The situation is dire, Janette. The EPA is considering approving bee-killing pesticides called neonics -- which are already **heavily contributing to the downward spiral** of wild bee populations. Bees can't wait another **15 YEARS** for these toxic chemicals to be banned!

Neonics can kill bees directly. Even when bees survive the exposure, **the pesticides can SEVERELY IMPACT their ability to navigate, find food, fight diseases and pests, and reproduce.** But greedy companies like Bayer-Monsanto continue to produce and profit from BEE-TOXIC neonics, **pushing vulnerable bees further toward the BRINK OF EXTINCTION** each day.

The numbers are staggering: **over the last two decades**, populations of rusty-patched bumblebees have **DROPPED 87%**, American Bumblebees have **DECLINED by 89%**, and western bumblebees have **PLUMMETED 93%**. If the EPA approves neonics again, it could spell DISASTER for vulnerable bees. Our pollinators deserve better, Janette. **Please, will you stand with us and urge the EPA to BAN neonics by 11:59pm**

[TONIGHT? >>](#)

[SIGN THE PETITION NOW](#)

Did you know that **one out of three bites of food we eat** is pollinated by bees? That's right, Janette -- without bees, **almonds wouldn't even EXIST!** These vulnerable pollinators are essential to thriving ecosystems; we rely on them for **75% of the world's most nutritious food crops.**

But Big Ag continues to DOWNPLAY the effects of TOXIC neonics on pollinators, people, and the planet. This RECKLESS pursuit of profit is **driving many wild bees and other pollinators toward EXTINCTION.** The EPA could step up and ban these toxic pesticides -- but we need YOUR help to push it to act. [Please, Janette, will you sign your name NOW and tell the EPA to prioritize pollinator health? >>](#)

When you enter a bathroom, you might find a bottle of Head & Shoulders shampoo or a roll of Charmin toilet paper. But did you ever realize the true cost of these products? I don't mean the cost at the store, but rather the price that old-growth forests like the "Amazon of the North" and Indonesian rainforests, Indigenous communities, and our planet pay to make these and other Procter & Gamble products. [Stop P&G from decimating our forests: Protect these critical habitats and the planet.](#)

Human rights violations. Harmed wildlife. Irreplaceable ancient trees

cut down. These are some of the dire consequences of P&G's sourcing of virgin fibers and conflict palm oil for its products. And all of this is pushing us further into a climate catastrophe.

P&G is turning a profit at the expense of our forests and our collective future on this planet, Janette. We can't let it continue on this destructive path -- **not when so much is at stake.**

URGENT ACTION NEEDED: Baby sea turtles could be CHOKING TO DEATH on plastic right now. Take action!

Plastic waste is overtaking our oceans. Scientists estimate there will be **MORE PLASTIC THAN FISH** by 2050. That means a higher chance for turtles to mistake floating plastic bags for tasty jellyfish -- a potentially deadly error. Even if turtles manage to avoid choking, ingesting plastic can cause *malnutrition, chemical contamination, and damaged internal organs.*

PLASTIC CAN STICK AROUND FOR CENTURIES. Once an animal dies and decomposes, the plastic it consumed is released back into the ocean for its next victim. Over time, it breaks down into microplastics that pollute the *water we drink, the food we eat, and even the air we breathe.* But there's good news: **Biden could act now to help STOP the plastics crisis and you can help convince him**

The harm plastics cause begins before these toxic products make it to the ocean -- or even onto store shelves. Giant plastic production facilities spew pollution into nearby communities -- largely low-wealth communities and communities of color. The people who live near these facilities face *increased risk of cancer, respiratory diseases, and other illnesses.*

Meanwhile, plastic corporations increase production every year. **We need**

to address the plastic crisis TODAY.

Hello,

I thought the extra street tax was to just repair streets- especially pot holes, but it seems that it is also being spent for other things in regards to streets or city needs.

Thank you.
