

Running Edge in Internet Explorer Mode

- 1) Open Microsoft Edge. You may have to use the search feature on the Windows taskbar.
- 2) Click on the ellipses (three dots) at the top right corner.

- 3) Choose "Settings".
- 4) Click "Default Browser" from the options on the left side.
- 5) Under the section for "Allow sites to be reloaded in Internet Explorer Mode", choose the option for Allow.

- 6) Under the section for "Internet Explorer mode pages", click Add. In the text box that appears, type <https://pdox.lincoln.ne.gov/>. Click "Add". **Note:** The setting only lasts for 30 days. You may need to reset IE mode after 30 days.

- 7) Click the Restart button:

- 8) After Edge restarts, navigate to the ProjectDox page.
- 9) Click the ellipses again. Choose "Reload in Internet Explorer Mode". You should see a banner at the top letting you know you're in Internet Explorer mode.
