We have them in Kansas and they are doing well. It is time NE move forward and help with progress too. NE is very behind where the future is as they seem to want to live in the past. Our world needs saving and the time is now. It is not the 1800's any more. Our laws need to be changed too. We can no longer live in the past. We must think of our kids. It's time for true equality, science of today, and get rid of the hate and fear that so many are causing.
