to whom it may concern:

I applaud your transparent process with regard to energy policy in Nebraska. I urge Nebraska county and state officials to aggressively move forward with the development of wind energy. Nebraska should be the national leader in wind energy development. Wind as a natural resource for sustainable energy use in our state is a no-brainer.

again, thanks for the path you are on keeping citizens informed and encouraging input relating to state energy policy. please keep wind and solar energy as priorities in future planning.

sincerely,

dana orlich
