LANCASTER COUNTY
BOARD

To Whom it Concerns

First, I wish to express that I have been saying for decades that we need to harness the wind in Nebraska for good energy.

It is relatively inexpensive and does not pollute as other sources of energy do. It is almost always blowing, so we should take advantage of it.

I am not sure of the figures, but the county would benefit financially from allowing wind power. The increased taxes alone could benefit every one from schools to ~~to~~ potentially farmers if other taxes could be lowered. Please take this into consideration when revising proposed regulations.

It is disappointing that we have allowed a few citizens to ~~to~~ disrupt the potentially many benefits of clean renewable energy to our area.
