To whom it may concern:

Thank you to the planning commission for creating an set of guidelines that takes into affect the noise and concern for the public over the concern for income. It is a public service to protect all those under the proposed plan and those in the future. I would request that you also increase the set back distance and keep the noise standards at their current levels to help protect the public safety now and in the future. These standards will have a huge impact. Please proceed with caution as the population density of this county is more rural subdivision than farm ground and needs to be treated as a so.

Thank you,

Jim Jurgens
