LANCASTER COUNTY
BOARD

Dear Sir:

I am writing in regard to the draft of commercial wind energy regulations drawn up June 8, 2015. I was present at all the meetings held with the working committee in which many concerns were raised, specifically regarding the proposed Gallum wind farm. Were these concerns, raised by the working committee and the public, duly considered? It would appear many of them were not, at least specifically, the setback distance. Many suggestions were made, but the distance is still set at 1000 feet, which is not a safe distance.

The noise regulations are much better than the setback distance, and more in accord to information and concerns shared.

I would ask, once again, that final regulations not be written without further consideration. There is so much at risk; please do all you can to protect the public safety.

Sincerely,
Charlotte A. Vieth
