Capital Improvement Program

Introduction

This Capital Improvement Program (CIP) is the City of Lincoln's six year program that plans for significant public improvements across the City. The CIP compiles all City projects to be budgeted in the next two years or planned for over the next six years. The complete CIP represents approximately \$1.2 billion worth of investment in our community.

While the City Charter calls for a six year capital improvement program, the City Council only approves a two year Capital Budget*. This is not, however, to suggest that the projects in the remaining years of the CIP are not without significance. Projects in the third through sixth year are used by elected officials and staff in the formulation of future CIPs and other departmental level capital programming documents. Projects in years three through six also represent the needs of all City departments. The private sector also considers the six-year CIP when making investment and development decisions.

* On November 2, 2010, the citizens of Lincoln approved an amendment to the City Charter that allows for a biennial budget process. This amendment allowed the City Council to pass an ordinance to establish the process for the biennial budget adoption. As part of the charter, the Mayor is required to submit to the Council for consideration a recommended operating and capital budget no later than forty days prior to the beginning of the biennial period. Due to the uncertainty caused by COVID-19, the Mayor is proposing the code provisions related to a biennial budget be suspended for 2020-21. This will allow more time to determine the financial impact COVID-19 may have on Fiscal Year 2021-22.

Capital Improvement Program

Key to Funding Sources and Definitions of Terms

Athletic Fees: This local funding source is generated from a surcharge applied to registration fees for various athletic program activities. Revenues that exceed expenses are used to make specific improvements to athletic fields and facilities.

Advance Acquisition: This funding source provides resources from sources such as property tax, sales tax or special revenues to be used for the acquisition of real estate or right-of-way for public purposes. This funding source may come from local, state or federal funds.

Bridge Replacement: This federal funding source provides resources to assist the City to replace or rehabilitate deficient highway bridges.

Build Nebraska Act Funding: As a result of Nebraska LB 84, 2011, a portion of existing State sales tax funding was directed to transportation projects throughout the State and in Lancaster County and the City of Lincoln. This funding source represents the local share of that funding that is directed to the City of Lincoln.

City Wheel Tax, Residual: This local funding source is generated by a City tax on all vehicles registered within the corporate limits. A portion of the City Wheel Tax is specifically dedicated to only fund the construction, design, and right-of-way acquisition of streets, roads, alleys, public ways, or parts thereof, or for the amortization of bonded indebtedness when created for such purposes.

City Wheel Tax, Residential Rehabilitation Fund: A portion of the City Wheel Tax is specifically dedicated to be used only for the purpose of rehabilitating existing residential streets.

City Wheel Tax, New Construction: This local funding source is generated by a City tax on all vehicles registered within the corporate limits. A portion of the City Wheel Tax is dedicated to fund general street improvements and/or new construction in the City.

Community Development Block Grant (CDBG): This federal funding source is from the City's CDBG Entitlement appropriation and used to fund projects recommended by the Community Development Task Force. Federal guidelines require that a minimum of 70% of these funds be spent on projects and programs that benefit low- and moderate-income persons within the community.

Community Improvement Financing: This local funding source is generated from City approved Redevelopment Projects and provides resources through bonds, generated by tax increment financing, as guided by Community Development Law provided in the Nebraska State Statutes.

Congestion Management Air Quality: This federal funding source provides resources to fund projects and programs in air quality non-attainment and maintenance areas for ozone, carbon monoxide (CO), and small particulate matter (PM-10) which reduce transportation related emissions.

Developer Contribution: This funding source is generated from private development to support specific public projects.

Federal Aid: These funds include any Federal subsidy received in aid of a public undertaking.

Federal National Highway System: Provides federal resources for improvements to roads and related infrastructure that are part of the National Highway System.

Federal Urban Area Projects: This federal funding source is designated for urbanized areas with over 200,000 population and provides resources for a variety of eligible transportation projects.

Golf Capital Improvements: This local funding source is generated from golf course revenues that exceed expenses and used to make golf course improvements.

Golf Surcharge: Fee added to Greens Fee that is designated for capital improvements at all of the City's Municipal courses.

General Obligation Bonds: These bonds are backed by the full faith and credit of the City and require voter approval. The City pays the principal and interest on General Obligation Bonds through a property tax levy.

General Revenues: The general fund provides resources from sources such as property tax and sales tax for general operating functions of City departments. This local funding source represents pay-as-you-go contributions from the general fund for capital projects with or without other funding sources.

Highway Allocation Bonds: These Bonds are payable from a specific source of revenue (State fuel tax, and City Wheel Tax). These funds are designated for projects throughout the City to rehabilitate, construct and improve streets, intersections/ interchanges, sidewalks, bikeways and trails, safety projects, intelligent transportation infrastructure, and landscaping in connection with street improvement projects. These funds are also used in the study, design, acquisition of easements or right-of-way to support public projects.

Highway Allocation Funds: State fuel tax collections allocated to the City via a State funding formula. These funds are designated for projects throughout the City to rehabilitate, construct and improve streets, intersections/ interchanges, sidewalks, bikeways and trails, safety projects, intelligent transportation infrastructure, and landscaping in connection with street improvement projects. These funds are also used in the study, design, acquisition of easements or right-of-way to support public projects.

Impact Fees: This local funding source is dedicated for new infrastructure in the following categories: water, wastewater, parks, and arterial streets. An impact fee charge is levied against new development to generate revenue to support specific public projects. Impact fees are a one-time, up front charge paid by new construction only. The fees can generally be used on public projects within the district that it is collected.

Keno Funds: This local funding source is provided through an agreement between the City and Keno operators within the corporate limits. A percentage of gross receipts from gaming operations are to be used for the purchase, establishment, maintenance or expansion of park and recreational services and library programs and facilities.

Lancaster County: Provided by Lancaster County to support specific projects. This funding source represents pay-as-you-go contributions from general funds for capital projects with or without other funding sources.

Land Sale Proceeds: This local funding source is provided through the sale of City surplus property. The revenues generated are used for specific public projects.

Landfill Revenue: This local funding source is generated from disposal fees levied on commercial refuse haulers and residents. Revenue that exceeds expenses are used to make landfill improvements.

Lease Purchase Financing: Proceeds from a financing agreement in which the City (lessee) purchases a capital item (asset) and agrees to pay rent payments to a lessor over a time period not to exceed the useful life of the asset. The rent payments will include principal and interest and the end of the term of the rent period, the City will own the asset.

Municipal Infrastructure Redevelopment Fund (MIRF): Provided by the State of Nebraska through annual appropriations and must be used for public infrastructure projects.

Other Financing: This revenue refers to sources of funding that are not normally used in the context of the City's CIP program.

Occupation Tax (Solid Waste): This local funding source was implemented in 2003 and levies a tax on the disposal of waste in the municipal landfill to support the City's integrated solid waste management system.

Parks & Recreation Repair and Replacement Fund: Revenue collected from the lease of Parks and Recreation Property for personal wireless facility towers. To be used for repair and replacement of Parks & Recreation facilities.

Revenue Anticipation Notes: A short-term debt security issued on the premise that future revenues will be sufficient to meet repayment obligations.

Revenue Bonds: These Bonds are payable from a specific source of revenue and do not pledge the full faith and credit of the issuer. Revenue Bonds are payable from sources of revenue that do not affect the property tax rate. The City uses revenue bonds for Lincoln Water System, Lincoln Wastewater and Parking Garage public projects. Lincoln Electric System may also use revenue bonds to fund specific projects.

Railroad Transportation Safety District: This local funding source is generated by a county-wide public entity - the Railroad Transportation Safety District, which has taxing authority to levy a property tax. These funds are designated for projects throughout the City and County to eliminate automobile and railroad conflicts.

Service Charges: Income generated by the City's Parking Garages or other services and facilities. Revenues that exceed expenses are used to make specific improvements or construct facilities.

Special Reserves: Existing fund balances which have accumulated in a particular fund and have not been designated for a specific use.

State/Federal Funds: State and Federal funds received in aid of a public undertaking.

State Revenue or Aid: These funds include any State subsidy received in aid of a public undertaking.

State - Train Mile Tax: State tax on rail traffic passing through the City and used for constructing, rehabilitating, relocating or modifying railroad grade separation facilities.

STPP Hazard Elimination: This federal funding source provides resources for safety improvements on any public road for activities including railroad crossings, public transportation facilities and public pedestrian and bicycle pathways, and trails.

Street Drainage Project Funding: This funding source is provided by Watershed Management General Obligation Bonds for street drainage design and/or construction projects at various urban locations to pay for the urban drainage and/or water quality portion of street projects.

Tennis Fees: This local funding source is generated from tennis program activities. Revenues that exceed expenses are used to make specific improvements to tennis facilities.

Tree Assessment: A dedicated citywide special assessment to fund the cost of replacing public street trees systematically as they are removed due to damage, structural deficiency or disease, and to address replacing the current deficit of street trees in the estimated 12,000 "gaps" along public streets. Assessment also used to maintain and preserve existing public street tree infrastructure. Method of assessment per assessable units within city limits.

Transportation Enhancement: This federal funding source provides resources for transportation-related activities that are designed to strengthen the cultural, aesthetic, and environmental aspects of the transportation system.

User Fees: This local funding source is generated from user fee revenues from City services. Revenues that exceed expenses are used to support specific public projects.

Unknown: Generally used when a specific funding source has not yet been identified.

Utility Revenues: This local funding source is from a specific source of revenue. Utility Revenues are from sources of revenue that do not affect the property tax rate. Lincoln Electric System, Lincoln Water System and Lincoln Wastewater use utility revenues for capital improvement projects.

Summary of Department Projects - Explanation of selected headings

Budget Outcome	Which of the 5 budget outcomes as identified by the Mayor's budget process is addressed by this project?
Date Anticipated	The date this facility is anticipated to be in service, if applicable.
Rating	A: Urgent B: Necessary C: Desirable
Status	New: First time this Project appears in CIP
	Continued: Project has appeared previously, future completion date
	Ongoing: Project has appeared previously, no future completion, this project is part of the ongoing mission of the department.
	Delayed: Project has appeared previously and was delayed for one reason or another.
Comp Plan Conformity	Degree to which this project conforms with the current Comprehensive Plan.
Prior Appropriations	Funds were identified in previous Capital Budgets for this project
Six Year Total	Total funds identified for the current 6 year CIP period.
Costs Beyond	Total funds that are planned to be shown in future CIPs (goes forward up to 12 years in the future).
Project Total	Total of the above three amounts - Prior Appropriations, Six Year Total and Costs Beyond.
Funding	This table shows a detailed schedule of the project funding by source of funding and year.
Activity	This table displays the year in which the listed activities are planned to occur.

Project: Transportation Vehicle Replacement									
Description:									
One of the goals at Aging Partners is individual self-determination and control. Vehicles are used to transport older adults and people with disabilities to Aging Partners' Senior Centers and program activity sites. This helps to keep those individuals fully engaged in their communities and facilitate self-determination and control about their independence, well-being and health. Aging Partners' vehicles, equipped with wheelchair lifts, are used to meet the needs of individuals having mobility limitations. Vehicles are routinely analyzed to justify replacement needs. Aging Partners' current fleet contains vehicles with high mileage and requires higher maintenance. A total of two replacement vehicles have been identified for FY 2021/2022 and FY 2022/2023. The funding will be split between federal (80%) and local match (20%).					Budget Outcome:		Safe and Healthy City

Project: Replace Bennett Martin Library								
Description:								
The Bennett Martin Public Library, 136 S. 14th Street, has served the City of Lincoln well for more than 55 years. It was a cultural anchor in downtown Lincoln and served the needs of a diverse community of users. Over the past several years, the role and services provided by public libraries have evolved considerably and the current building no longer serves a quality community such as Lincoln. This project has been included in the CIP since 2006 as a result of the 2003 Space Needs and Facility Study and the Library Board taking action to replace the facility rather than remodel. The Main Library Vision and Concept Study completed in 2012 provides an estimated cost for such a building, which has been confirmed by additional analysis by staff and consultants. If this project does not move forward, considerable deferred maintenance project costs will be incurred.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Upgrading of Branch Libraries									
Description:									
Libraries of today reflect the shift away from building collections to building human capital, relationships and knowledge networks. This trend, in combination with the goals set in the Library's Strategic Plan, was the basis for the Facilities Plan adopted by the Library Board in 2015 and revised in 2019. We need to improve the spaces that we provide to children by creating areas in all libraries that excite children's imaginations and support effective learning by including developmental play opportunities through furnishings and more permanent installations. A variety of projects will freshen, update, and rearrange the interiors of our facilities to meet the needs of an innovative and vibrant city. Additional square footage would be added to Anderson and Bethany branch libraries. Converting to Radio Frequency Identification (RFID) tags would allow borrowed and returned items to be processed as a group rather than handling items one-by-one. With over three million checkouts per year, this would greatly improves library efficiency, increase accuracy, and save time for library customers. RFID requires an up-front investment for tags and equipment. Sorters, which check in and sort materials, would be installed at three of the busiest branch libraries. Smart Chutes, which check in materials immediately when deposited in outside book drops would be installed at all locations. Recommended funding source is General Obligation Bonds. If General Obligations Bonds are not approved, these project will be requested in future years.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Eiseley and Walt Branch Parking Lots								
Description:								
Eiseley (1530 Superior Street) and Walt (6701 S. 14th Street) branch library parking lots are in need of milling and resurfacing. The lots were installed in 2002 prior to the opening of the new branch libraries. This project had previously been planned for FY2022/23 but due to condition of lots, the project has been moved to FY2020/21 due to urgency. Temporary patching was done in FY2018/19 but milling and resurfacing are needed soon to insure safe environment.					Budget Outcome:		Safe and Healthy City

Project: Eiseley and Walt Branch Roof Replacement								
Description:								
The Eiseley and Walt Branch Libraries were constructed in 2001-2002. The roofs carried a 15 year warranty. The roof membranes are failing, pulling away from edging, and causing leaks. The existing EPDM membranes will be removed and replaced with new 45 mil EPDM membranes over the existing IPS insulation. The existing rock ballasts will be reused to secure the new 60 mil EPDM membrane used on the walls only. The new 45 mil ballasted EPDM roof will come with a 15-year warranty. Project: Replace Bookmobile								
Description:								
The Library Bookmobile provides individualized library services to a diverse population throughout Lincoln and Lancaster County. Focus areas include County towns and cities; youth with emphasis on children at risk (including preschools and day cares); seniors; and areas in Lincoln not close to existing libraries. The current vehicle, fueled with compressed natural gas, was purchased in 2012 and is nearing end of life with frequent interruptions to service due to mechanical issues. Other Financing may include Library Re-appropriations.					Budget Outcome:		Equitable and Inclusive City

Project: Williams Branch Relocation							
Description:							
The Parks Department is planning a stand-alone Recreation Center just east of Arnold School, the current location of the Williams Branch, and has invited the Library to relocate to this Center. Such a move would allow the library much more flexibility in serving the community. For security reasons, the library is currently restricted to being open to the general public only when school is not in session. Cost would be nominal with funding coming from Keno and proceeds from sale of current square footage to LPS. Timing of project would run concurrent with the Parks Department timeline. Project: Refurbish Bennett Martin Public Library 4 Landing Elevator												
Description:												
The passenger elevator serving 1st - 4th floors of the building is a traction elevator installed in 1978. The elevator is over 40 years old and parts are becoming impossible to find. This is the only elevator in the building serving the 3rd and 4th floors, which house public collections and meeting rooms as well as administrative offices. The traction elevator is expensive to install as a retrofit due to the amount of engineering required.					Budget Outcome:		Safe and Healthy City

Project: Bennett Martin Public Library Deferred Maintenance							
Description:							
<p>If the Bennett Martin Public Library is not replaced by a new facility in the near future, several projects that have been deferred must be accomplished. These projects include a new HVAC system as well as air handling units. Carpet on the 1st - 4th floors needs to be replaced. Carpet on the 1st and 2nd floors was instated in 1987, with carpet on 3rd and 4th floors installed in 1978. A second passenger elevator also needs to be refurbished. The elevator has three landings and serves the lower level to 2nd floor of the building. It is the only elevator that serves the lower level occupied by staff, offices, work areas, recycling center, and storage.</p> <p>Project includes: Closed Loop Heating/Cooling: \$355,500 Air Handling Units: \$92,800 Carpet Replacement: \$330,000 Elevator Upgrade: \$200,000</p>				Budget Outcome:		Strong and Resilient City

Project: G:LES Operations Center								
Description:								
Continue phased construction of a second LES operations facility (LOC) at 98th & Rokeby Rd. Upon completion, allocation of a portion of existing staff from the Walter A. Canney (WAC) Service Center, 27th & Fairfield, to the LOC and reallocation of downtown administrative activities to the LOC and WAC. Identify the placement of a location that will accept customer bill payments. This will provide LES with opportunities to better meet the needs of LES customers by providing an increased level of service reliability, mitigate the risk of having all materials and equipment at one location, and prepare for city growth. Prior appropriations include actual monies spent in 2013-2019 plus the approved 2020 calendar year budgeted amount. Also included in appropriations is actual monies spent on the purchase of the property. This was originally 0614 – G: Land – Service Center in 2012/2013 CIP. Project: G:Meters								
Description:								
Annually this project anticipates the purchase of varying electric solid state, programmable utility meters for all classes of LES customers (residential, commercial & industrial). In 2020 Meter Services (MS) will continue to advance automated meter technology throughout the LES Service Area. In years 2021-2024 we will evaluate technology such as a Meter Data Management (MDM) system. This system will need to inter-face with SAP and with Advanced Metering Infrastructure (AMI) devices. Project: S:West Lincoln Substation Rebuild											
Description:											
Upgrade the 115kV West Lincoln substation which was constructed in approximately 1937. The project will enhance system reliability by reconfiguring the 115kV bus and replacing obsolete equipment. The project also includes retiring 115-35kV transformers T082 (41.6 MVA), T083 (50 MVA) and associated 35 kV bus work removed from service in 2017. The substation will meet current standards for structure design and appearance as opposed to the current configuration.					Budget Outcome:		Strong and Resilient City

Project: S:70th & Bluff Replace Transformer								
Description:								
This project recognizes the possibility of replacing the existing 161-115kV, 100 MVA transformer (T691) which was manufactured in 1956, will be 70 years old in 2026 and is the oldest transformer in the system. This transformer provides a connection with the OPPD service area through 161kV Line 1559 which is proposed to be rebuilt in the future. LES will coordinate with OPPD to evaluate the appropriate capacity and timing for the transformer and determine if it should be installed at the 70th & Bluff substation or in a new substation constructed closer to the Lancaster-Saunders County line or inside the OPPD service area. Project: O:Transformers									
Description:									
This item covers the installation of overhead distribution transformers to serve new load and to replace old, deteriorated transformers. LES plans to remove all PCB-contaminated distribution transformers from the system during this next CIP 6-year period. All distribution transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers. Project: O:Service Area Adjustments									
Description:									
LES and Norris have entered into a Joint Planning Agreement. The agreement calls for the planning in a Joint Planning Area and the orderly transition of service area from Norris to LES as required to keep all of the City of Lincoln within LES' service area. These adjustments will provide a buffer area around the city limits to allow planning for infrastructure in these areas.					Budget Outcome:		Strong and Resilient City

Project: O:Rebuilds									
Description:									
The rebuild budget item is for replacement or removal of deteriorated (or otherwise obsolete) facilities. Some rebuild work will be associated with new or increased loads. Rebuild work will also be required on joint poles with the telephone company. We will also annually test and treat poles with preservative to extend their life.						Budget Outcome:		Strong and Resilient City

Project: O:Relocations									
Description:									
This item provides for the relocation of existing overhead distribution facilities. This item also includes the overhead portion of an overhead-to-underground relocation project. Relocations are generally requested for federal, state, county, or city governmental agencies for road widening, sewer construction, etc. Customers also request relocation work for various projects. An "aid-to-construction", based on non-betterment cost to LES, is usually required for these projects.					Budget Outcome:		Strong and Resilient City

Project: O:Major Circuits									
Description:									
FEEDERS This budget item provides for ongoing construction of new 12kV and 35kV feeders (main distribution circuits). Reconductoring of existing overhead feeders for capacity requirements and the installation of 600 amp disconnect switches for sectionalizing are also covered by this project. Distribution feeder conductors are economically evaluated including the life-cycle cost of electrical losses. This allows LES to install higher capacity lines with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.	Budget Outcome:		Strong and Resilient City						
	Map ID:		OHD170						
	Date Anticipated:		NA						
	Rating:		A						
	Status:		Ongoing						
	Comp Plan Conformity:		Generally Conforms with Plan						
CAPACITORS This item provides for the installation of pole-mounted distribution capacitor banks. Capacitors are used for power factor correction on the distribution system. These capacitors provide more economical operation and reduced greenhouse gases by reducing unmetered electric losses in the distribution and transmission system. They also provide needed voltage support at peak load conditions. This item also includes funding to complete the conversion of the existing radio-controlled system and some fixed banks to a new radio-controlled system due to obsolete equipment and lack of support.

Project: U:Transformers									
Description:									
Based on projected customer growth, pad-mounted transformers will be purchased each year to serve new load and to replace existing transformers that are damaged or fail in service. Disposal of PCB-contaminated transformers is included in this project. This item also covers the standard installation charge for the new transformers (per FERC accounting). LES plans to remove all PCB-contaminated distribution transformers from the system during this next CIP 6-year period. All distribution transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.	Budget Outcome:		Strong and Resilient City

Project: U:Rebuilds							
Description:							
This item provides for replacement of existing underground facilities due to age, deterioration, or other operating problems. The identified projects are general system upgrades that will extend the life of existing underground facilities. We recognize that some of our underground cable and equipment is approaching the end of its useful life. We anticipate the increased need to replace deteriorating underground cable and obsolete equipment to maintain adequate reliability levels for our customers. Replacements for some facilities are being installed due to indications that they have reached the end of their service life. Other replacement will be done on an "as required" basis.	Budget Outcome:			Strong and Resilient City

Project: P:Laramie River Station									
Description:									
This item covers LES' share of anticipated annual capital expenditures for the Laramie River Station (LRS), a three-unit 1670 MW plant. The LRS facility consistently ranks among the lowest cost generating stations in the United States. This performance record is a result of efficient and effective design and the continued review and upgrade of facility systems. The plant's facilities are in good working condition and in compliance with all environmental and other regulatory requirements. The plant just completed installation of the new NOx emissions control systems on all three units. After almost 40 years of operation, the system is beginning to show its age. This fact, coupled with technological advances, is cause for additional investments in the Plant. A number of significant plant improvements are scheduled for the 2020 through 2026 time frame, including upgrades which will improve plant efficiency, reliability, as well as reduce environmental impacts. Major projects include upgrading multiple electrical distribution systems and remediation of coal storage ponds (installing better pond liners).				Budget Outcome:		Strong and Resilient City

Project: P:Walter Scott Energy Center #4									
Description:									
Ongoing capital investments in LES' newest base load power plant. LES is responsible for a 100 MW (12.76%) share of the WSEC Unit #4 capital investments. WSEC #4 uses a high efficiency, super critical steam boiler design and extensive emissions control systems, which significantly reduces fuel consumption and air emissions, compared to standard coal plant designs. As the plant ages additional investments will be required to maintain plant efficiency, reliability and market economics. Major projects include a waste ash pond closure and control system upgrades.					Budget Outcome:		Strong and Resilient City

Project: P:Local Generation Rokeby Environmental, Regulatory & Safety									
Description:									
This Budget item covers a variety of projects at local gas fired power plants: Rokeby Station and 8th & J Street Station. These plant improvements and upgrades are necessary to maintain the operating reliability, efficiency and market economics for these critical generating assets. Budget estimates are based on historical expenditures. The budget also covers the remodel of the Rokeby Generating Station Operations Center which is required to accommodate increased staffing. Project: P:Misc Env.,Safety,Security								
Description:								
The purpose of this budget item is to provide for unanticipated capital expenditures imposed by regulatory or operational requirements, unplanned equipment upgrades or to address critical safety issues. Based on operating experience in the Southwest Power Pool (SPP) Integrated Market (IM), LES' local generating assets have reached a new level of required performance and availability. With requirements of the SPP Market, it will be critical to maintain these generating assets at a high operational level. Changing environmental regulations and permitting mandates often require unanticipated unit modifications. Physical and cyber security requirements for the sites' and associated control systems have become a significant driver for capital investments. It is anticipated the security mandates from organizations such as NERC, FERC and Homeland Security will only grow in scope.					Budget Outcome:		Strong and Resilient City

Project: ADA Compliance Improvements								
Description:								
The Americans with Disabilities Act (ADA) requires modifications to many of the existing facilities Lincoln Parks & Recreation (LPR) is responsible for operating in order to provide improved accessibility to individuals with physical limitations. Current system deficiencies are continuously identified and prioritized as part of LPR's 10-Year Facilities Plan. Priority projects over the next several years will focus on improvements to pool facilities and restroom structures at Oak Lake, Mahoney, Roper, Peter Pan and Tierra Parks. It is noted that this priority list is subject to change as immediate repair needs arise during the course of each year.					Budget Outcome:		Equitable and Inclusive City

Project: Backflow Prevention Compliance Program								
Description:								
Lincoln Water Systems has identified below-grade backflow prevention equipment as a potential hazard to community health. Lincoln Parks & Recreation continuously encounters deficiencies in its current water distribution systems and uses funding from this program to make improvements in operation efficiencies, reduce maintenance concerns and comply with City standards. Work to be funded by this program over the next several years is anticipated to include repair/replacement of the water service and metering at Bethany, Mahoney and Pioneers Parks as well as the replacement of numerous drinking fountains in parks and along trails across the City. Project: Mech/Elec Systems and Pool Pumps								
Description:								
Funding from this project is used for the ongoing repair, replacement and renewal of mechanical and electrical systems located throughout Parks & Recreation (LPR) facilities. This includes pool pumps/filter systems/controllers associated with aquatic facilities and public fountains in order to keep them all in safe and efficient operating conditions for both staff and patrons/visitors. These funds are also used to refinish pool basin surfaces and to purchase materials used by LPR's Mechanical Maintenance Section.					Budget Outcome:		Vibrant City Economy & Quality of Life

Project: Area/Ballfield/Play Court Lighting								
Description: Recreational lighting associated with ballfields, play courts and pools has an anticipated life span of approximately 30 years. LPR's facilities inventory includes 24 lighted ballfields and 26 lighted play courts. This program provides funding needed to repair and/or replace existing (aged) electrical service and area lighting located throughout the park system in order to meet current electrical codes and outdoor/recreational lighting standards, as well as to provide for safe, comfortable and efficient operation. Priority projects are identified by staff in Lincoln Park & Recreation's (LPR) 10-Year Facilities Plan but are subject to change as more immediate needs arise during the course of each year. Where feasible/applicable, fixtures are updated with LED lighting.					Budget Outcome:		Vibrant City Economy & Quality of Life

Project: Tennis Facilities Improvements								
Description: Under the operating/lease agreement between the City of Lincoln and the Friends of Woods Tennis (FOWT), funds for this program are generated from user fees at the Woods Tennis Center facility and used for the ongoing maintenance, periodic repairs and any upgrades needed to continue providing safe, operational tennis facilities. Funding is routinely used for resurfacing needs for the asphalt courts, lighting repairs and fencing/screening improvements associated with the outdoor courts. Project: Drainage Channel Stabilization/Erosion Control/Dams								
Description: The increased volume and intensity of storm water runoff resulting from development and urbanization in and around many of the properties Lincoln Parks & Recreation is responsible for maintaining has resulted in erosion that leads to the increased depth and width of the drainage channels running through them. These funds are used in partnership with Public Works & Utilities - Watershed Management to restore and to stabilize these channels and protect park land and park infrastructure against future degradation. Project: Public Art Preservation									
Description:									
This program provides funding to support Lincoln Park & Recreation’s efforts to preserve the community’s public art inventory. Extreme weather conditions make timely and routine preservation important to extending the life of this inventory and funds are used for major maintenance, repairs and restoration activities.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Communications Towers									
Description:									
There are multiple communication towers currently located on City-owned property to accommodate 18 cell service provider's equipment through lease agreements. Once these towers are constructed on public property, the City of Lincoln is responsible for the well-being of these towers. Funding in this program will be used to complete assessments and make any needed repairs to the tower structures to assure that public safety is not compromised by the presence of these towers at park sites, ballfields and the municipal golf courses. Project: Prairie in the Parks Seeding Program							
Description:							
Lincoln Parks & Recreation is responsible for maintaining over 6,000 acres of parkland and open space throughout the community. In an attempt to improve environmental stewardship, enhance the community's landscape diversity and to decrease routine O&M expenses, low traffic/passive use parkland, drainage way corridors and open spaces are being converted to more drought tolerant native prairie grasses. This type of landscaping requires less frequent mowing while increasing habitat diversity and stabilizing area soils from erosion associated with extreme weather conditions and storm water runoff. This program is used as a source of matching funds for potential environmental grant opportunities and to purchase seed/establishment materials in a continued effort to develop Prairie in the Parks areas on City-wide basis. Project: Park Acquisition/Demolition/Development Projects							
Description:							
This project provides funding for park land acquisitions and park-related maintenance activities that include demolition of park facilities deemed not feasible for repair/renovation and the development of new/replacement facilities. Projects that are identified in LPR's 10-Year Facilities Plan include future land acquisitions to provide outdoor recreational opportunities consistent with community growth and park master planning as well as rehabilitation to existing park structures used for maintenance operations and equipment storage. The funds are also used to purchase materials needed by LPR's Carpentry/Heavy Equipment Section to address various repair and replacement work that will arise each year. Project: Playground Renovations & Safety Components									
Description:									
<p>LPR is responsible for maintaining 84 playgrounds across the community. Much of the equipment in these playgrounds is in excess of 20 years old which represents the industry standard anticipated life span. Over the years, equipment which does not meet current guidelines for safety and/or ADA accessibility standards has been removed. With this funding, approximately two to four playgrounds will be redeveloped annually utilizing proto typical designs adapted to each individual park site with consideration of maintenance, accessibility and cost efficiency. The Parks & Recreation Advisory Board reviews the sites identified by staff as in need of renovation as part of LPR’s 10-Year Facilities Plan and recommends prioritization of phased improvements. The highest priority project sites currently include the playgrounds at Easterday, Nevin, Stuhr, Sunrise, Filbert, Near South, Williamsburg, and Antelope South Parks. Funds will also be used for play surfacing repairs/replacements at multiple playground locations.</p> <p>Playground funding is regularly utilized to repair and/or purchase replacement playground equipment to assure that all playgrounds located throughout the park system are in safe, working order and kept in compliance with national safety standards and ADA accessibility guidelines.</p>					Budget Outcome:		Safe and Healthy City

Project: Hard Surfacing									
Description:									
<p>Hard surfacing funds are regularly used to repair and/or replace concrete/asphalt/rock associated with the existing hiker/biker trails, parking lots, roads, park pathways and play courts. Many such facilities were constructed approximately 20 to 40 years ago and were not designed for the traffic loads they now experience. The community-wide system requires ongoing rehabilitation to provide for continued safe and comfortable usage and to meet ADA accessibility standards. The Lincoln Park & Recreation’s 10-Year Facilities Plan identifies a large number of repair and replacement projects in all four quadrants of the City and priorities remain subject to change as immediate repair needs arise during the course of each year.</p>					Budget Outcome:		Safe and Healthy City

Project: Commuter/Recreation Trails								
Description:								
An ongoing program to rehabilitate the existing community-wide trail network is essential to maintaining a safe, operational commuter/recreational trail system. The current trail network consists primarily of concrete surfacing with some segments of asphalt and rock, all of which is exposed to extreme weather conditions. In addition, portions of older trail segments do not meet today's ADA accessibility standards. Experience has shown that multiple 'immediate repair needs' will arise during the course of each year and thus priority use of these funds is subject to change. Funds from this program are also used as matching funds to federal Recreational Trails Program (RTP) grants to complete larger-scale repair/replacement project and to conduct regularly scheduled pedestrian bridge inspections to ensure structural safety per EO No. 83372. Project: HVAC Systems								
Description:								
Lincoln Parks & Recreation (LPR) is responsible for maintaining nearly 200,000 square feet of indoor recreation space across the community with effective Heating, Ventilation and Air Conditioning (HVAC Systems). These systems are becoming aged and require an ongoing program to fund repair and replacement needs in order to provide for continued safe, comfortable and efficient operations. Priority rehabilitations include the HVAC systems at the F Street Community Centers and the Chet Ager Building at the Pioneers Park Nature Center along with replacement of the chiller at the Belmont Recreation Center. Project: Ballfields/Playfields								
Description:								
Lincoln Parks & Recreation maintains numerous ballfields/playfields at locations across the City. With 25 lighted ballfields and 68 backstops, periodic repair/replacement/renewal of the supporting infrastructure is needed to provide for their continued enjoyable use and to insure public safety. Example infrastructure includes fencing/gates, backstops, goal structures, dugouts, bleachers, irrigation systems and ancillary facilities. Project: Building/Structure Flooring & Wall Treatments								
Description:								
Lincoln Parks & Recreation estimates that its building facilities include approximately 170,000 square feet of interior floor coverings of various types (i.e., carpet, tile, wood, etc.). Wall treatments include painted dry wall, concrete block, etc. The anticipated life span for these floor coverings and wall treatments is 20-25 years on the average and an ongoing program of repair/replacement and/or renewal is necessary to sustain continued safe, desirable and appealing use. Project: Building/Structure Roofing								
Description:								
Lincoln Parks & Recreation is responsible for maintaining nearly 400,000 square feet of building roof area on structures throughout the community. Funds from this program will be used to repair and/or replace the roofs of existing park and recreation structures, including community centers, support buildings, restroom facilities and shelter structures. These roofs include a multitude of types and composition with an average anticipated life span of 25 years. Where determined feasible, composition roofs and flat roofs will be replaced with pitched metal roofs to reduce ongoing maintenance costs. It is important to note that priority projects for this program will generally develop throughout the year as immediate repair needs arise, but at this time priority projects include the Log Cabin Picnic Shelter in Antelope Park, the multiple buildings at the Star City Shores Aquatic Facility and the F Street Community Center. Project: Skatepark Renovations								
Description:								
Lincoln Park & Recreation's facilities inventory currently includes two skateparks located at Peter Pan and Tierra Parks. Both facilities consist of modular pieces constructed of various material types. These materials are exposed to extreme elements and are among the most heavily used in the park system. As a result, they require a high level of continuous repair/replacement activity to provide for continued safe and desirable use. This funding is used to repair components as needed and to replace them when repair is no longer feasible.				Budget Outcome:		Safe and Healthy City

Project: Park Area Alt. Irrigation Source Development									
Description:									
The use of potable water supplied by the Lincoln Water System places an economic strain on Lincoln Parks & Recreation’s (LPR) operations and maintenance budget. It also can create a significant demand on a limited supply of public drinking water. The installation of individual irrigation wells at various LPR sites will provide more cost-effective and environmentally preferred alternative water sources (i.e., non-potable) for landscape irrigation purposes. Priority sites for well installation currently consist of Antelope Park (Elks Ballfield, Veterans Memorial Garden, Legacy Tree Grove and the public use areas surrounding the Auld Recreation Center and band shelter); Sampson Park (Sherman Field and Midget Football Complex) and Peter Pan Park. Project: Air Park Recreation Center - Replace Facility								
Description:								
<p>The building housing the Air Park Recreation Center is a remnant of the former Lincoln Air Base facilities and is in need of significant structural repairs and renovations. It is located on the east side of NW 48th, but serves a youth population that lives primarily on the west side of this major arterial. Given the fact that the building is in a dilapidated condition, generally dysfunctional for its current programming and poorly located for its service area, planning efforts were made with Lincoln Public Schools during the design of the new Arnold Heights School to locate a future community recreation center adjacent to the school building. In response to this planning effort, construction of the Arnold Heights School included two adult-sized gyms funded in part by the City (previous LPR-CIP) for joint use as a community recreation facility. This project will provide the funding needed to continue design development and construction of a replacement community center building on undeveloped park land located between NW 48th and Arnold Heights School.</p> <p>Other Financing may include grants and private donations compiled through a capital campaign by the Lincoln Parks Foundation.</p>					Budget Outcome:		Vibrant City Economy & Quality of Life

Project: Lincoln Cares Program								
Description:								
<p>Lincoln Cares is a voluntary community donation program that offers customers of the Lincoln Electric System (LES) an opportunity to add one dollar each month to their bill payments to provide funding for Lincoln Parks & Recreation facilities and program improvements. The improvement projects selected for Lincoln Cares funding would not otherwise be possible within the constraints of the available City budget. Projects to be funded by the Lincoln Cares Program are determined annually and since the start of the program in 2003, approximately \$35,000 have been applied to 1-3 projects on an annual basis.</p> <p>Other Financing may include annual projection of donations collected through the Lincoln Cares Program.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Pinewood Bowl Renovations									
Description: With the increased programming (SMG produced concerts) at the Pinewood Bowl amphitheater in Pioneers Park, the support facilities and infrastructure are in need of renovating for the continued safe, efficient and enjoyable use by both patrons and performers. Much of the existing infrastructure is aged and in need of significant improvements including the restroom and storage facilities, mechanical and electrical systems, roof structures, lighting, irrigation, drinking fountain, and hard surface walkways. A multi-year renovation effort of this facility will be completed using funds provided by the Visitors Promotion Committee and the Lancaster County Board of Commissioners. Other Financing may include a multi-year Visitors Promotion/Lancaster Country grant.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Sherman Field - Infield Rehabilitation							
Description:							
Recognizing this facility as one of Lincoln's historic icons, a major renovation effort of the Sherman Field at Sampson Park support facilities was completed in 2012. Rehabilitation of the infield is needed for the continued safe, desirable use of the ballfield itself. Over time, portions of the irrigation system have worn out and become compromised with granular material. To level/create uniform grades across the infield and eliminate areas of inadequate drainage, a complete regrading and revegetating of the infield is planned. Project: Parks & Recreation Livable Neighborhoods							
Description:							
Livable Neighborhoods is a commitment to improving and maintaining strong, vibrant neighborhoods. In conjunction with Lincoln Transportation and Utilities, Parks and Recreation, and Urban Development, this project provides funding to further that commitment. Funding is provided for planning and design, preliminary engineering, and construction of improvements in the public ROW, and other measures resulting in Livable Neighborhoods such as park improvements, trails, and street trees. Specific locations will be identified through a multi-departmental process to identify and prioritize areas.				Budget Outcome:		Safe and Healthy City

Project: Facility Renovations & Community Growth Projects									
Description:									
<p>The Mayor's (Coleen Seng, September 2005) appointed Lincoln Parks & Recreation (LPR) Infrastructure Finance Committee recommended going to a vote of the people for general obligation (GO) bond funding for multiple 'Quality of Life' projects associated with repair/replacement/renovation of existing LPR facilities and system/facilities improvements to meet the City's growth demands for recreational opportunities. Bond funding could potentially serve as a means to close the gap between funding currently identified for LPR repair and replacement projects (i.e., cell tower lease proceeds, keno revenue and limited General Revenue) and the amount needed annually in the most recent update (2019) of the LPR 10-Year Facilities Plan.</p> <p>The 2019 update to the Lincoln Parks & Recreation 10-Year Facilities Plan estimated approximately \$2.6M (excluding replacement of the Air Park Recreation Center and funding needed for EAB Response & Recovery) is needed annually for repair/replacement projects to keep existing facilities and supporting infrastructure in operable condition for safe and desirable public use. Keno revenue and the proceeds from cell tower leases associated with park sites currently provide about \$1.3M annually for repair/replacement projects. An additional \$1.3M is needed each year to reach the projected \$2.6M.</p> <p>This project may include numerous projects identified in the 10-Year Plan including replacement of the Air Park Pool, renovation of the Auld Pavilion, development of bike park in Boosalis Park, improvements in Cooper Park, green infrastructure improvements across multiple facilities, development of play/sports fields in Jensen Park, rehabilitation of several existing pool facilities, development of new neighborhood parks, renovation of the Pioneers Park lodge, renovation of Standing Bear Park, upgrades to the Star City Shores aquatic facilities and renovation of the Woods Pool Bath House.</p> <p>Other Financing is unspecified at this time.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Street Tree Replacements								
Description: One of the hallmarks of Lincoln’s quality of life is its community forest, which is a prominent feature of its landscape. The Street Tree Replacement program provides funding to maintain and preserve the community’s existing street tree infrastructure. Funds are used to (a) replace public street trees systematically as they are removed due to damage, structural deficiency or disease, and (b) in-fill the current deficit of street trees in the estimated 12,000 "gaps" generally located in the community's older neighborhoods along public streets. Funding for this program is provided in-part by the 2-for-Trees Program. Other Financing may include grants and donations from sources such as the Nebraska Statewide Arboretum, Arbor Day, local corporations, etc.				Budget Outcome:		Strong and Resilient City

Project: Park Landscape								
Description: One of the hallmarks of Lincoln’s quality of life is its community forest, which is a prominent feature of its landscape. The Park Landscape Program is an ongoing landscape planting, development and maintenance program that typically includes the addition of private donations and grants. This program assists in the establishment and preservation of multi-generational stands of trees, shrubs and other landscape vegetation within the park system to assure variety in age and species. Funds are used to replace landscape components lost to the natural aging process, extreme weather events, vandalism and disease. These funds will also be used to support a phased (multi-year) effort to remove and replace the aging trees that create the iconic view corridors/vistas in Pioneers Park. Other Financing may include grants and donations from sources such as the Nebraska Statewide Arboretum, Arbor Day, local corporations, etc.				Budget Outcome:		Strong and Resilient City

Project: Neighborhood Park Land Acquisition & Development - I.F. Zone 1									
Description:									
The Lincoln Lancaster County Comprehensive Plan establishes a service standard of one neighborhood park per square mile of residential development which is consistent with a newer national goal of having a neighborhood park within a 10-minute walk of all residences. Land for neighborhood parks will need to be acquired and development of park sites should coincide with an increase in operational funding for ongoing upkeep and maintenance of the park. It is anticipated that consistent with typical neighborhood park development, improvements may include a playground, hard-surface play court (i.e., half-court basketball court), picnic facilities, connecting sidewalks, seating, open lawn/play field space and landscaping. These neighborhood parks will be located in Impact Fee Zone 1.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Neighborhood Park Land Acquisition & Development - I.F. Zone 3								
Description:								
The Lincoln Lancaster County Comprehensive Plan establishes a service standard of one neighborhood park per square mile of residential development which is consistent with a newer national goal of having a neighborhood park within a 10-minute walk of all residences. Land for neighborhood parks will need to be acquired and development of park sites should coincide with an increase in operational funding for ongoing upkeep and maintenance of the park. It is anticipated that consistent with typical neighborhood park development, improvements may include a playground, hard-surface play court (i.e., half-court basketball court), picnic facilities, connecting sidewalks, seating, open lawn/play field space and landscaping. These neighborhood parks will be located in Impact Fee Zone 3.				Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Fletcher Landmark Trail Phase I - Zone 2										
Description:										
Following primarily along the south right-of-way of Fletcher Street, this concrete trail will extend generally in an east-west direction from N. 14th Street to N. 27 Street. Located in Impact Fee Zone 2, this addition to the overall community-wide trail system will provide additional recreation and commuting opportunities/connections for trail users. The funding shown in this project represents the City's 20% match for anticipated Federal Transportation Alternatives Program funds. The total project costs are estimated to be \$929,800 with the Federal share to be \$743,800, or 80% of project costs. This project received prior year appropriations of \$86,000 in FY 19/20. Project: Golf Course Hard Surfacing								
Description:								
Each of the municipal golf course has hard surfacing that includes cart paths, sidewalks, parking lots, etc. that are continuously exposed to extreme weather conditions. These hard surfaces require ongoing repair, rehabilitation and replacement to assure that the facilities are maintained in manner that is safe for public use and desirable to golfers. Currently, the priority project for use of these funds is the rehabilitation of parking lots and cart paths as identified in the Golf Program 10-Year Facilities Plan; however, it often becomes necessary to revise priorities as more critical repair needs arise. Project: Golf Course Clubhouse								
Description:								
In order to serve the large numbers of golfers that visit the municipal golf course clubhouses, funds are needed for both annual repairs and for major maintenance activities to assure the safe, comfortable, attractive and efficient usage of each of the golf course clubhouse facilities. While it is often necessary to revise priorities as repair needs arise, the priority projects for use of these funds includes replacement of the flooring in the Highlands Golf Clubhouse and repair/replacement of multiple HVAC systems as identified in the Golf Program 10-Year Plan. Project: Golf Course Infrastructure								
Description:								
These funds are used to address critical repair/replacement needs related to the infrastructure for each of the municipal golf courses. Given the age and usage of much of the municipal golf course infrastructure, priority projects are continuously evaluated in an attempt to keep each of the golf courses in good working order. Priority projects identified for use of these funds include shoreline wall repairs at the Highlands and Mahoney Golf Courses and the development of forward tees at various courses. Project: Golf Course Irrigation Systems								
Description:								
Effective and efficient automated irrigation systems are vital to the daily and long-term operations of the municipal golf courses. Each course must be maintained in a healthy, inviting condition to continue attracting golfers. The existing irrigation systems at each of the courses require continuous maintenance and rehabilitation to assure that they are in working order and these funds are used to support both "in house" work as well as any contractual repair/replacement needs. At this time, the priority project identified for use of this funding over the next multiple years consists of replacing the complete irrigation system at the Pioneers (funding provided by a \$1.0M short term bond - COPS - with the Golf Program Surcharge funding debt retirement) and Holmes Golf Courses (funding also provided by the Golf Program Surcharge). Project: Cascade Fountain & Plaza Renovation								
Description: The Cascade Fountain, dedicated to Nebraska's retired teachers, is located at the intersection of 27th Street and Capitol Parkway in the Antelope Park Triangle where it has served as a Lincoln icon since 1978. As a result of continued operation over the last 41 years, the fountain basin/infrastructure and mechanical systems are in need of significant repairs and rehabilitation to keep the fountain in good working order. In partnership with the University of Nebraska-Lincoln Public Policy Center, the Lincoln Parks Foundation initiated a survey in 2019 to determine the community's connection to the Cascade Fountain, as well as gain input on its possible refurbishment. More than 7,500 individuals took the survey, surpassing all our expectations. The results showed a strong passion and love for the Cascade Fountain. Overwhelmingly, the community indicated a desire to retain and fix the fountain, shorten the basin, and create a plaza-like seating area for reflection, picnics, and events. This input has guided planning and design efforts that include replacement of the fountain basin and surrounding deck/plaza, renewed electrical service and lighting, and replacement and relocation of the mechanical pumps and piping. Other Financing may include grants and private donations compiled through a capital campaign by the Lincoln Parks Foundation.				Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Wilderness Park Master Plan Improvements								
Description: Wilderness Park has over thirty miles of natural surface trails for hiking, cycling, riding and skiing. In 2020, the master plan for Wilderness Park will be updated to guide future park renovation efforts and improve park visitors' experience. General categories of improvements are envisioned to include multi-use trail restoration as well as the addition of wayfinding signage/kiosks, parking lot improvements and associated amenities. In addition, the bridges located throughout Wilderness Park will be an area of focus. Each of the existing bridges is inspected on a regular rotation and those in need of repair and replacement are prioritized according to their condition and role in providing critical park access. Other Financing may include grants and private donations.				Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Fire Station Modifications and Repairs									
Description:									
All of our stations except for stations 11, 10, 12, 15, and 16 (which are new), need substantial modifications and/or repairs due to age of the facility. No major maintenance updates have been done to these stations in the recent past. The older facilities need to be updated with major repairs such as windows, roofs, heating/cooling and building structure additions. The cost of renovating fire station 7, 8, and 13 will likely be cost prohibitive and will need to be rebuilt. Fire stations 3, 5, 6, 9, and 14 need substantial modification. Fire Station 1, constructed in 1966, is unlike any of our other stations as it serves as our Administration Headquarters and is in need of significant repair. Physical resources for this building are large and numerous with replacement and repair costs estimated to be very substantial. Although we have an ever increasing need for better spaces to accommodate health, safety, and gender issues; stations 1, 2, 3, 4, 5, 6, and 9 will continue to serve their respective portions of the city effectively. This can be accomplished by the addition of a second story or additions at grade level to each of these facilities. With these changes, these structures may be utilized for many years to come. Other Financing may include COPS funding.	Budget Outcome:		Safe and Healthy City

Project: Replace Aerial Ladders									
Description:									
LF&R has four front line aerial ladder trucks and one reserve for a total of five aerial ladder trucks. The goal of LF&R is to remove aerial ladder trucks from front line service when they are 15 years old and remove from the fleet when they are 20 years old. Currently, the aerial ladder fleet consists of an assortment of vehicles; our oldest front line aerial ladder truck is 18 years old and purchased used. The oldest reserve aerial ladder truck is 24 years old during this CIP period. In order to reduce maintenance costs and assure safety of employees assigned to these vehicles, two aerial ladder trucks should be replaced following National Replacement Guidelines in 2020. An appropriation of 500k for apparatus replacement was provided during the last biennium but this appropriation will not keep pace with LF&R goals and national replacement guidelines. These are the only vehicles of this type in Lancaster County, including the mutual aid fire departments. This is an area of approximately 839 square miles with a total population exceeding 300,000 residents. LF&R has provided vehicles of this type to large scale incidents within the county when requested by the mutual aid system. Within the region is Omaha, Nebraska, 60 miles east of Lincoln. The City of Omaha, population 424,482, has nine aerial ladder trucks.	Budget Outcome:		Safe and Healthy City

Project: Fire Station 1/HQ, E-911							
Description:							
<p>LF&R administrative staff operate from two different locations; 1801 Q and MSC. Management of the department from one location would save money and the management would be more effective. More effective management would ultimately translate into better service for the community. Land has been offered to the fire department via a long term lease on 22nd and O street. This location would also offer long term space for 911 services, emergency management, and an emergency operations center. The sale of old station 1 could offset costs for the new station 1 campus. There is interest in the land and building where headquarters currently resides.</p>				Budget Outcome:		Safe and Healthy City

Project: New Fire Station 17								
Description:								
The rapid annexations and expansion of the City of Lincoln have affected emergency response time within the city. The goal of LF&R has always been to maintain a travel time of four minutes or less to intervene as quickly as possible, minimizing loss of life and property damage, and to perform vital emergency medical services to our citizens. Fire protection, emergency medical services, and the ISO rating have presented a need to add additional fire stations in areas of the city that have experienced significant growth. Land for the new station should be acquired as soon as the growth and development of an area begins to require service and the Comprehensive Growth Plan shows the area will ultimately grow and support emergency services for the area. Station 17 is proposed to be built at approximately 40th & Yankee Hill road and would house 10 firefighters. This station will meet the needs of the community for this growth area. As new fire stations are added to the city additional vehicles must be added to the fleet. One new engine, a new aerial, and an ambulance will be required for staff to use for emergency response. Project: LPD Team Assembly Station										
Description:										
The growth of the City's boundaries, service population and our commitment to Community Policing requires the Police Department to plan for additional decentralized facilities. The Assembly Station would be similar in design and concept to the 27th and Holdrege AND the Northeast Team police facilities. It is anticipated that a future stand-alone assembly station would increase efficiencies and serve Lincoln's expanding boundaries.				Budget Outcome:		Safe and Healthy City				
				Map ID:		404106				
				Date Anticipated:						
				Rating:		B				
				Status:		Continued				
The current team configuration at the Justice and Law Enforcement Center campus - 575 South 10th Street - requires officers serving Northwest Lincoln to travel greater distances. Likewise, it does not allow for expansion to an anticipated sixth geographic team in the future. Population projections, service borders and other demands for service(s) depicted in the Comprehensive Plan will require redistricting - the addition of a sixth geographic police team.				Comp Plan Conformity:		In Conformance with Plan				
The Police Department is amenable to a 'shared-site' proposal with another agency, such as: Lincoln Fire and Rescue, the Drug Court or the Emergency Communications Center.										
Phase One: Seek professional planning and design services: costs to determine: Space Needs, Design Criteria and Preliminary Budgeting approximately \$30,000 - 40,000.

Project: Emergency Communications 911 Center							
Description:							
The growth of the City's boundaries, service population, User Agency staff and a commitment to provide all of public safety and our community with a high level of service makes it necessary to relocate and expand the facilities currently available to the Emergency Communications 911 Center. Essential components to be considered: - adequate space for calltake/dispatch operations - adequate space for management/support operations - administrative/classroom space for the Emergency Communications Training Academy - technology lab for training simulation for Emergency Communications Training Academy and In-Service Continuing Education - state of the art technology and connectivity - adequate space for technology systems to support radio, telephone, and computer aided dispatch and other peripheral systems - planning for the least disruption of public safety communications - coordination with P25 City Radio upgrade project - coordination with back-up facility and technology. This is could be collocated with the police substation or another public safety building.				Budget Outcome:		Strong and Resilient City

Project: Broadband Infrastructure														
Description:														
This program component includes dedicated funding for an upgrade and expansion of the City's communications system infrastructure in support of the Lincoln Technology Improvement System. This funding supports the administration's vision of an Innovative and Operationally Excellent City. The ongoing program will help implement a coordinated system of broadband infrastructure designed for use by public and private broadband service providers. Examples of broadband infrastructure projects to be funded by this program include new and updated backbone conduit, innerduct, pull boxes, fiber optic cables and other system equipment. In addition, technology applications for advanced wireless research, DSRC radios, vehicle to infrastructure components, and smart cities applications are also included. Lincoln Transportation & Utilities

- Broadband Infrastructure
- **Solid Waste Operations**
- StarTran
- Transportation
- Wastewater
- Water Supply & Distribution
- Watershed Management

The City of Lincoln owns and operates two public landfills. The Bluff Road Landfill is permitted as a Municipal Solid Waste Disposal Area with current active disposal area projected to reach capacity in 2036 . This facility also has local site approval and is permitted for the adjacent land to the East of the current active area and will provide an estimated 50 years of capacity. The North 48th Street C&D Landfill is permitted as a Construction and Demolition Waste Disposal Area with capacity estimated until 2048.

Solid Waste Operations also manage numerous other programs including recycling, composting, transfer station and waste diversion. This includes the operation and maintenance of 19 city recycle collection sites and 9 county recycle collection sites.

All funding for Solid Waste Operations is generated from charges to customers. Charges to customers are based upon amounts of wastes hauled within City (Occupation Tax) and disposed of in the City of Lincoln's facilities.

These revenues provide funding for all operational expenses, capital improvement and debt service. No general funds are used for Solid Waste Operations.

Project: Acquire/Recondition Equipment							
Description:							
<p>Appropriations provide for the acquisition of replacement or new primary equipment or reconditioning of existing equipment needed to manage solid wastes, including equipment needed for creating safe access and meeting regulatory compliance requirements, and to manage landfill gas and leachate. Expenditures may range from \$100,000 to nearly \$1,500,000 per piece of equipment. Reconditioning equipment extends the useful economic life of the equipment at approximately 40% to 60% of new cost.</p> <p>Acquisitions and reconditioning proposed throughout this continuing project include equipment such as:</p> <ul style="list-style-type: none"> ▣ truck-tractor and trailer ▣ landfill compactor ▣ landfill dozer ▣ off-road articulated dump trucks ▣ tracked excavators ▣ earthmoving scrapers ▣ front-end loaders ▣ compost turners ▣ compost screens ▣ organic waste grinders/shredders ▣ motor graders ▣ water trucks/tankers <p>The project is funded by landfill fee / user fee revenues, which may include revenue bond proceeds.</p> <p>The project is part of Solid Waste Disposal/Landfill (705232) and part of Other Waste Management Programs (705240).</p>	Budget Outcome:		Safe and Healthy City

Project: Biogas/Landfill Gas to Vehicle Fuel								
Description:								
Landfill gas must be extracted from the Bluff Road Landfill as required by the EPA Clean Air Act in order to reduce emissions harmful to the environment. Electrical energy is currently produced from the extracted and processed landfill gas thru an agreement with Lincoln Electric System (LES). The project would direct the processed landfill gas, after additional processing to produce a higher quality gas, to a pipeline for vehicle fuel use. Under the Renewable Fuel Standard (RFS), vehicle fuel produced from biogas sources is needed to meet obligations therefore creating a demand for viable projects. The net revenue anticipated if the landfill gas is processed into a pipeline quality gas is greater than the net revenue received from producing electrical energy. Project: Closure/End Use of North 48th Street Landfill								
Description:								
<p>Nebraska Department of Environmental Quality regulations require specific actions to prevent future or mitigate existing impacts to ground water and surface water. The request for funding anticipates corrective actions will be necessary to address environmental impacts from wastes landfilled from the 1950's through the 1980's. The corrective actions relate to minimizing the impacts to the groundwater and surface water, and to preventing the migration of landfill gas beyond the property boundary. The project also provides for the purchase, placement and grading of additional cover soil, installation of structures to convey surface water away from the previously landfilled wastes, and the vegetation of areas on the closed landfill on a planned, phased basis. On-going improvements to existing stormwater conveyance systems, such as constructed ditches, culverts, and letdown structures are periodically necessary. The project also recognizes the opportunities available to use the property for passive recreational activities, and provides limited funding for establishing uses that are determined jointly with the Parks and Recreation Department.</p> <p>The project is funded by system revenues, which may include revenue bond proceeds.</p> <p>The project is part of Other Waste Management Programs (705240).</p>				Budget Outcome:		Safe and Healthy City

Project: Compost Facility								
Description:								
On-going improvements to the asphalt surface for the receiving and processing areas, as well as on-going improvements to the storm water detention basins used to manage surface water run-off are considered in this project. Other improvements may include the construction of a water well and/or water storage for fire protection and to establish a near-by water supply for maintaining adequate moisture levels in the compost materials to avoid odor issues, additional site security fencing and soil placement, grading and surfacing to expand finished material storage and load-out areas. Improvements needed for management of the wood waste generated by the Emerald Ash Borer are not included in this project.	Budget Outcome:			Safe and Healthy City

Project: Final Cover-Construction/Demolition Waste Landfill							
Description:							
The purchase and placement of soil is necessary for final cover construction at the North 48th Street Construction and Demolition Waste Landfill. The final cover must be designed and constructed in accordance with Nebraska Department of Environmental Quality regulations. The final cover is constructed and vegetated as areas of the landfill reach capacity.	Budget Outcome:		Safe and Healthy City

Project: Solid Waste Disposal/Landfill

Description:

General support related to the existing waste disposal facility on Bluff Road and associated infrastructure, including but not limited to the buildings, roadways, and water, wastewater, electrical, lighting, and security (fencing) and surveillance (camera) systems. The project may also be used to provide surveying, material testing, and calibration services, as well as study/evaluation for optimization, capacity determination and safety reasons. Engineering support for the automated processes associated with the leachate management system, the landfill gas management system, and the groundwater pumping system and water supply system is considered in this project.

The project ensures compliance with applicable State and Federal regulations when unanticipated and significant waste generating events or severe weather events causing damage at the facility occur. Additionally and in general, the project provides for the enhancements and improvements to existing infrastructure such as buildings, roadways, utilities and other ancillary infrastructure to assure safe and efficient operations. Other activities include semi-permanent litter fence construction, surface water management improvements, installation and abandonment of ground water and landfill gas monitoring wells, and surveillance (camera) and security (fence) system upgrades.

The project provides on-going funding for improvements of the nearly two-mile concrete access roadway, anticipated to be select panel replacement and crack sealing. Nearly one-half of the total roadway length is more than 25 years old.

A truck/wheel wash is also contemplated in this project to address potential regulatory issues under the air quality permits, as well as potential safety issues related to dragging mud onto Bluff Road and Highway 77. A convenience unloading area near the entrance is contemplated to eliminate the high risk customer visits where trailers are hand-unloaded at the active face of the landfill.

Construction of a non-potable water storage tank to establish fire-fighting capabilities and provide water supply for pressurized cleaning of leachate and landfill gas system equipment is contemplated in this project.

Nebraska Department of Environment and Energy (NDEE) regulations require the renewal of the Operating Permit for the Bluff Road Landfill every five years. The project provides for the engineering, environmental and operational review of the facility and the preparation of the required documents for a permit renewal application of the existing and future landfill.

The project includes the following planned efforts:

- Permitting of the Municipal Solid Waste Landfill; anticipated FY 21-22; \$150K
- Engineering Support; anticipated every year: \$35K each year
- Improvements: anticipated every year; \$250K each year

Other related projects include:

- Liner/Leachate System (705209)
- Final Cap/Gas System (705211)
- Gas Collection and Control System (705210)
- Land Acquisition/Soil Purchases (705214)
- Biogas/Landfill Gas to Vehicle Fuel (705237)
- Acquire/Recondition Equipment (705228)

The project is funded with landfill revenues, which may include revenue bond proceeds.

Project: Computer Hardware / Software										
Description:										
Up-to-date computer hardware and software is vital to making StarTran more efficient. Automated scheduling of both fixed route and Handivan as well as Automatic Vehicle Location (AVL) equipment will ensure that routes are efficiently scheduled. Funds are proposed in FY 2020/2021 and FY2021/2022 to purchase replacement AVL equipment for all vehicles, upgrade software for the AVL system, purchase tablets for our Handivans, purchase GPS units for Handivan operators, upgrade paratransit software (Handivan), purchase fleet facility parking software, predictive maintenance software, and purchase an automated fixed route scheduling system. Project: Bus Stop Amenities (Required by FTA)										
Description:										
Bus stop amenities (Transit Enhancements) include: benches, shelters, pads, signage, bicycle related equipment, and landscaping. These amenities make a transit system more safe, comfortable, and user friendly. Effective FY 2004-05, one percent of the FTA allocation to StarTran is required by FTA to fund transit enhancements. The priority of these funds will be directed towards 1) improving accessibility 2) replacement or improvement of shelters at major boarding locations and 3) adding benches to medium to high use bus stops. Project: Purchase 4 Handivans							
Description:							
Providing a high quality service to those with a disability includes purchasing comfortable and accessible vehicles. Funding is to purchase 4 Handivans in FY20/21. Handivans will be alternate fueled, and/or fuel efficient vehicles and proposed vehicle types will be reviewed by the Handivan Working Group. Past year funds will be used to assist in purchasing vehicles.				Budget Outcome:		Equitable and Inclusive City

Project: Predictive Maintenance											
Description:											
Predictive maintenance will extend the life of buses, reduce capital costs, reduce operating costs, reduce inventory carrying costs, and most importantly will reduce service disruptions due to mechanical failures. A predictive maintenance program identifies when parts will fail and then schedules these parts for replacement before they fail. To begin the program additional maintenance is needed up front. Software then determines when parts should be replaced.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Transportation System Optimization								
Description:								
<p>This program component focuses on optimization of transportation system assets owned, maintained, and operated by Lincoln Transportation. This funding supports the administration's vision of a Strong and Resilient City. The activities include program management and engineering studies to create a safe, effective, and efficient transportation system along with implementation of intersection safety and operational improvements, signal system optimization, increasing the capacity of streets (widening), structures within the built environment, turn lanes, complete streets concepts, active transportation deployment, and technology enhancements. The project efforts include street and intersection modifications, traffic control, roundabouts, new signal system hardware, adding lanes to existing streets, modification of existing lanes to improve safety and operations, street access improvements, mobility improvements, signing and markings, and transportation system management infrastructure. Construction and deployments are typically focused within the built environment.</p> <p>Future projects and programs include, but are not limited to:</p> <ul style="list-style-type: none">• West “A” Street from SW 23rd (West of Coddington) to SW 5th (East of Folsom)• S. 70th and “A” Streets Traffic Signal and Turn Lanes• Adams Street, N. 36th to N. 48th• “A” Street from S. 40th to S. 56th• Green Light Lincoln• 14th & Warlick/Old Cheney Improvements• 33rd & Cornhusker/Adams crossings with the BNSF Rail Corridor (RTSD) <p>More details related to the Optimization programs, street improvements, and construction projects and additional information can be found at: https://lincoln.ne.gov/city/ltu/projects/cip/transportation.htm</p> <p>Funding Information:</p> <p>Transportation System Optimization is funded by the Construction fund portion of the Street Improvement Vehicle Tax (aka - Wheel Tax); Highway Allocations Funds received from the State of Nebraska (consists of Motor Fuel Taxes, Registrations, Sales Tax, and Build Nebraska Act); Federal Aid in the form of Surface Transportation Block Grant Program (STBGP) funds received through the Lincoln / Lancaster County Metropolitan Planning Organization competitive programming and selection process and Impact Fees.</p> <p>In April 2019, the City of Lincoln voters approved a six-year, 1/4 cent sales tax to be used for street improvements and construction (aka – Lincoln on the Move funding). The ballot language directed 1.5% to be apportioned for the 33rd & Cornhusker project in conjunction with the Railroad Transportation Safety District (RTSD) agency funding. The proposed allocation represents 1.5% of the anticipated Lincoln on the Move (LOTM) revenue. In the out years, the vast majority of the new revenue will continue to be allocated for this project, but the exact percentage may be subject to variation based on the project recommendations of the Advisory Committee on Transportation (ACT) and public input. The collection of this revenue will end October 1, 2025 which is why the amount is reduced in the last year of this CIP.</p> <p>"Unknown" funding (UNKN) is that amount identified by the Lincoln on the Move Citizen's Transportation Coalition that remains yet unfunded, yet necessary to accomplish the goals of the Community's Long-Range Transportation Plan and associated priority of optimizing the existing transportation system.</p>				Budget Outcome:			Strong and Resilient City

Project: Transportation System Growth

Description:

This program component focuses on growth of new transportation system assets to be owned, maintained, and operated by Lincoln Transportation. This funding supports the administration's vision of a Vibrant City Economy and Quality of Life. The activities include program management and project development of additional streets, bridges/structures, intersections, traffic signals, active transportation infrastructure, technology enhancements, and facilities in new growth areas. Projects include new streets and transportation right-of-way improvements, new bridges & support structures, roundabouts, signal system hardware, facilities/sites, and major upgrades to the fringe area street network.

Future projects and programs include, but are not limited to:

S. 40th Street, Yankee Hill to Rokeby

West "A" Street from SW 23rd to West City Limits

Van Dorn Street, 84th to 98th

"A" Street, 89th to 93rd

Rokeby Road, 31st to 40th; 77th to 84th

Yankee Hill Road, 40th to 48th

W. Holdrege St, NW 48th to NW 56th

S. 98th St

Van Dorn & Park

104th and Holdrege

In April 2019, the City of Lincoln voters approved a six-year, 1/4 cent sales tax to be used for street improvements and construction. Of this new revenue to be collected starting October 1, 2019, a minimum of 25% must be apportioned to construction of new non-residential streets to promote private investment. In year one (FY 19-20), the proposed allocation represents 25% of the anticipated new revenue. In the out years, the allocation will be a minimum 25%, but the exact percentage may be subject to variation based on the project recommendations of the Advisory Committee on Transportation (ACT) and public input. A full list of these street improvement and construction projects can be found at: <https://lincoln.ne.gov/city/ltu/projects/cip/transportation.htm>

Project: Transportation Sidewalk Program								
Description:								
This program component focuses on sidewalk infrastructure assets including walks, curb ramps, and transition areas. This funding supports the administration's vision of a Strong and Resilient City. The activities include project development and delivery of projects that repair and rehabilitate sidewalks citywide. The project efforts include concrete panel replacement and leveling, sidewalk sawing and grinding, Americans with Disabilities Act (ADA) curb ramp construction, and segment sidewalk replacement. Other Financing may include COPS funding in the biennium budget years.					Budget Outcome:		Strong and Resilient City

Project: Transportation Livable Neighborhoods									
Description:									
<p>This program component for Livable Neighborhoods is a commitment to improving and maintaining strong, vibrant neighborhoods. This funding supports the administration's vision of a Vibrant City Economy and Quality of Life. In conjunction with LTU, Parks and Recreation, and Urban Development, this project provides funding to further that commitment.</p> <p>Funding is provided for planning and design, preliminary engineering, and construction of improvements in the public ROW, and other measures resulting in Livable Neighborhoods such as street enhancements, park improvements, trails, and street trees. Specific locations will be identified through a multi-departmental process to identify and prioritize areas.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Capital Improvement Program

FY 2020/21
– 2025/26

Lincoln Transportation & Utilities

- Broadband Infrastructure
- Solid Waste Operations
- StarTran
- Transportation
- **Wastewater**
- Water Supply & Distribution
- Watershed Management

Since before the Clean Water Act, Lincoln has treated its wastewater. Lincoln currently operates 2 Water Resource Recovery Facilities that treat wastewater and discharging water to Salt Creek that exceeds every state and federal clean water standard.

Water Resource Recovery Facilities also produce high nutrient Biosolids utilized by agricultural producers in and around Lancaster County. Biogas generated from the facilities is injected into the Natural Gas grid for use as vehicle fuel.

Over 1200 miles of wastewater trunk and sewer mains collect and route wastewater to the Water Resource Recovery Facilities.

All funding for Lincoln Wastewater System is generated from rate revenues. These revenues provide funding for all operational expenses, capital improvement and debt service. No general funds or tax funds are used for Lincoln Wastewater System.

The Capital improvement Program discussed here is based on Master Planning efforts that take place every 10 years and are updated every 5. The basis for LWWS's Master Plan is Lincoln's Comprehensive plan.

Project: Infrastructure and Systems Improvements (INF)								
Description:								
This project is to fund infrastructure projects to maintain or replace existing equipment, utility infrastructure, security upgrades, collection system rehabilitation and building upgrades, such as: Preliminary Engineering Sump Pump Program WW Cost of Street Construction Building & Roadway Improvements - \$75,000 Laboratory HVAC Improvements - \$25,000 Site & Building Security - \$100,000 Process Gate Improvements TSWRRF - \$200,000 SCADA/PLC Upgrades - \$200,000 Return Sludge & Waste Sludge Improvements - \$100,000 A-3 Elevator Improvements - \$150,000 WW Solids Handling Improvements - \$250,000 Solids Thickening Improvements - \$500,000 Entrance Gate Improvements NEWRRF - \$150,000 Lift-Station Equipment & Infrastructure - \$40,000 Selected Replacements - \$500,000 This project can be funded by utility revenues, which may include revenue bond proceeds. Capital Improvement Program

FY 2020/21
– 2025/26

Lincoln Transportation & Utilities

- Broadband Infrastructure
- Solid Waste Operations
- StarTran
- Transportation
- Wastewater
- **Water Supply & Distribution**
- Watershed Management

Lincoln Water System has been providing safe water to residents since 1883. The source of Lincoln's high-quality water is a river aquifer that provides natural filtering through sand formations. LWS treats and disinfects the water before sending it to customers. All water supplied by LWS exceeds every state and federal safe drinking water standard.

Over 1600 miles of water mains provide high quality, dependable water service to all of Lincoln's residents, institutions and businesses.

All funding for Lincoln Water System is generated from rate revenues. These revenues provide funding for all operational expenses, capital improvement and debt service. No general funds or tax funds are used for Lincoln Water System.

The Capital improvement Program discussed here is based on Master Planning efforts that take place every 10 years and are updated every 5. The basis for LWS's Master Plan is Lincoln's Comprehensive plan.

Project: Flood Mitigation Projects (FEMA 404/HMGP)							
Description:							
<p>These projects are associated with mitigation of Lincoln Water System assets that were not damaged per-se in the March 2019 flood event but are at risk of damage in future similar events. These projects have been submitted to the Nebraska Emergency Management Agency for funding consideration. The HMGP program is a competitive funding program and projects are selected based on merit and priority as determined by a State review committee. If any of the projects are selected for advancement up to and including being eligible for funding, reimbursement is based on a 75% / 25% cost share. The funding requested as CIP - Utility Revenues assumes all projects will be advanced for funding with a 25% cost share by Lincoln Water System.</p> <p>Example projects include:</p> <p>Project HM 1.1 - Salt Creek Overflow and Fuse Plug Repl Project HM 2.6, HM 3.5 and HM 4.5 - WSF Matching Funds Project HM 3.1 - Well 90-1 and Island Protection Project HM 3.3 & HM 4.3 - Standby Power 90-2 or 14-2 Project HM 3.6 - IWF & EWF Pipeline Protection Project HM 4.1 - Lanoma Beach Bank Stabilization Mitigation of Power Supply (OPPD Sponsered, LWS Funded)</p>				Budget Outcome:		Safe and Healthy City

Project: Flood Restoration and Mitigation Projects (FEMA 406)								
Description:				Budget Outcome:		Safe and Healthy City		
<p>These projects are associated with the repair and reconstruction of damaged facilities and various mitigation efforts to future protect damaged facilities. The restoration projects are eligible to receive FEMA and State Public Assistance funding up to 87.5% of the total cost of restoration to pre-event conditions. Mitigation projects are eligible to receive FEMA 406 funding that varies based on the comparison of mitigation costs to restoration costs. A specific mitigation project may not be fully eligible for FEMA 406 funding. Eligible expense are funded the same as FEMA /State PA; up to 87.5%. The funding requested as CIP - Utility Revenues assumes are costs are eligible and would be reimbursed at 87.5%.</p> <p>Example projects include:</p> <p>Various Emergency Repairs NWF Flood Restoration Engineering Services IWF Flood Restoration Engineering Services Project 1.5 Replacement of Well 56-7 Project 1.6 Raw Water Pipeline Replacement Project 1.9 Clear Creek Drainage Repair Project 1.7 Repair of Test Station for Wells Project 2.4 SWF Debris Removal Project 3.5 & 4.8 Tmp. Project: Infrastructure - Lincoln Pumping, Storage & Trans.														
Description:														
<p>Projects to rehabilitate or replace existing assets in Lincoln used for pumping, storage and transmission of water within the distribution system. Infrastructure projects provide for the ongoing repair, rehabilitation, and replacement of facilities and assets. Elements of these projects are anticipated to have a minimum service life of 15 years and/or extend the service life of the associated facility or asset. These projects are not considered as normal operations and maintenance expenses as these are funded in the LWS operating budget.</p> <p>Example projects include:</p> <p>Ongoing pipe painting and electrical equipment replacements at various pump stations</p> <p>Replace 90-30 PLCs in Lincoln Distribution Facilities: \$400k - FY20/21</p> <p>Replace 31st Street Valve (Gravity Feed to A Street): \$353k - FY20/21</p> <p>Remove Eddy Current Coupling at Northeast Pump Station: \$121k - FY20/21</p> <p>Replace Vine Street East Pump Station Conductor and Breaker: \$60k - FY20/21</p> <p>Replace Northeast Pump Station Pump #1 AFD: \$200k - FY20/21</p> <p>Decommission Merrill Street PS: \$325 - FY21/22</p> <p>Decommission NW12th PS: \$350 - FY22/23</p> <p>Condition Assessment of 48 inch Pipeline - Northeast Pump Station to Vine Street Pump Station: \$551k - FY22/23</p> <p>Condition Assessment of 36 inch Pipeline - 51st Street Pump Station to A Street Pump Station: \$260k - FY22/23</p> <p>Projects are funded by utility revenues which may include revenue bond proceeds.</p> <p>Costs beyond are estimated to be \$2.0M</p>					Budget Outcome:		Safe and Healthy City

Project: Infrastructure - Water Mains and Meters										
Description:										
<p>Projects to replace existing water mains and meters that have served their useful life, funding also begins to address full Lead Service Line replacements.</p> <p>Water main replacement selection is based on frequency of broken mains, history of interruption of traffic and commercial or industrial customers, and/or opportunities to time construction with other improvements such as roadways. Funding goal for Water Main Replacement is projected at \$9 to \$12 million per year, which corresponds to a replacement rate of approximately 7 miles per year. This is considered an initial rate of water main replacement required to maintain the annual water main breaks below 14 per 100 miles of water main. The replacement rate funding increases to approximately 8 miles per year in FY 24/25 in an effort to maintain the replacement rate at approximately 0.6% of the water distribution system, which is a 167 year replacement schedule.</p> <p>Funding for full lead service line replacements related to water main replacement projects are included in the totals. Funding for replacements of lead water service lines not associated with water main replacement projects is included and planned to begin implementation in FY 20/21. A 14 year program is currently planned to address 3000 lead water service lines.</p> <p>Water meter replacement is generally based on a battery life estimated to be 18-22 years. The current water meter replacement program is a continual replacement program where we replace 5% of the meters (4400 meters) each year which matches with the 20 year battery life.</p> <p>Projects are funded by utility revenues which may include revenue bond proceeds.</p>					Budget Outcome:		Strong and Resilient City

Project: New Source of Water Supply									
Description:									
<p>Project provides for the development of a second source of water supply including the creation of a reserve fund to pay for future design and construction of various elements a water supply source. Several options were evaluated in the 2013 Water Master plan with the preferred long term alternative being the development of a wellfield, treatment plant, and transmission pipeline to Lincoln. Estimated cost for this alternative is nearly \$1.5 billion when constructed in approximately 2050 based on current water demand projections in the 2020 Master Plan Update. This project sets aside \$1.0 - \$2.0 million beginning in FY19/20. Costs beyond include increased annual funding of the reserve fund as well as bonding. Other incremental supply options continue to be evaluated and the reserve would be available to also fund these alternatives which, if implemented, would likely delay the development a new wellfield and treatment system.</p> <p>Example projects include:</p> <p>Ongoing Reserve Fund: \$19.4M - FY20/21 - FY25/26</p>					Budget Outcome:		Safe and Healthy City

Project: Water Mains and Meters-Locations To Be Determined									
Description:									
Water distribution mains and meters to serve the growth of the community, in accordance with the Comp Plan. Mains to be constructed in Impact Fee Areas 1-7 - at locations - in pressure districts - in years to be determined. Eligible projects are to be considered from the "To Be Determined" listings of projects in Projects #0043, #0044, #0045, #0046, #0047, #0048, and #0049 - Water Distribution Mains - Areas 1-7.					Budget Outcome:		Strong and Resilient City		
					Map ID:		803002		
					Date Anticipated:		Ongoing		
					Rating:		C		
					Status:		Ongoing		
Funding amounts shown are estimated to be available for growth related projects in all 7 Water Distribution Main Areas. Not all projects listed as "To Be Determined" can be funded with estimated funding amounts. Priority will be given to Opportunity Projects - Opportunities to extend water mains through an area where permanent paving will be placed, opportunities for economic development, and necessary looping to provide reliable service to growth areas. \$0.25 million will be set aside each year for economic development projects. \$0.20-\$0.25 million is projected for new water meters associated with growth and development projects. Projects are funded by impact fee revenues, and utility revenues which may include revenue bond proceeds.					Comp Plan Conformity:		Generally Conforms with Plan

Project: Water Master Planning, Preliminary Design, & Engineering Support										
Description:										
Projects provide for the evaluation and recommendations related to well field modeling and capacity, water supply permitting, water supply evaluations, CIP project estimates, and other miscellaneous engineering analysis. This project also includes funding for the next comprehensive facilities master plan scheduled for FY23/24. Comprehensive Master Plans are generally performed every 10 years and serve as the basis for recommending future improvements, replacements and upgrades. Comprehensive evaluations are performed with respect to water demands, available water supplies, system capacities, facilities condition assessments, regulatory impacts, water quality assessments, and financial implications. Project: Water System Reimbursement to Development									
Description:									
Contribution to developers to up-size water mains to 12" & 16" sizes on distribution system grid. Provides adequate flows for fire protection and looping for reliability in distribution system - to provide for growth. Also provides funding for Water Districts that are created to address areas where water mains have not been installed to serve properties in established neighborhoods.				Budget Outcome:		Strong and Resilient City			
				Map ID:		507000			
				Date Anticipated:		Ongoing			
				Rating:		C			
				Status:		Ongoing			
Projects are funded by utility revenues which may include revenue bond proceeds.				Comp Plan Conformity:		Generally Conforms with Plan

Project: Water System Reimbursement to Street Construction									
Description:									
To reimburse the cost to lower or relocate water mains that conflict with paving line and grade. A betterment cost formula that takes into account the age and condition of the existing water main in addition to the condition of the street, may be used to determine the cost share between Water and Street Construction funding.					Budget Outcome:		Strong and Resilient City

Capital Improvement Program

FY 2020/21
– 2025/26

Lincoln Transportation & Utilities

- Broadband Infrastructure
- Solid Waste Operations
- StarTran
- Transportation
- Wastewater
- Water Supply & Distribution
- **Watershed Management**

Watershed Management is responsible for administering the Municipal Separate Storm Sewer System Permit under the Clean Water Act. It also reviews development plans, drainage projects and oversees capital projects

This administration is funded by General Funds.

Capital Improvement projects are funded by voter approved General Obligation Bonds.

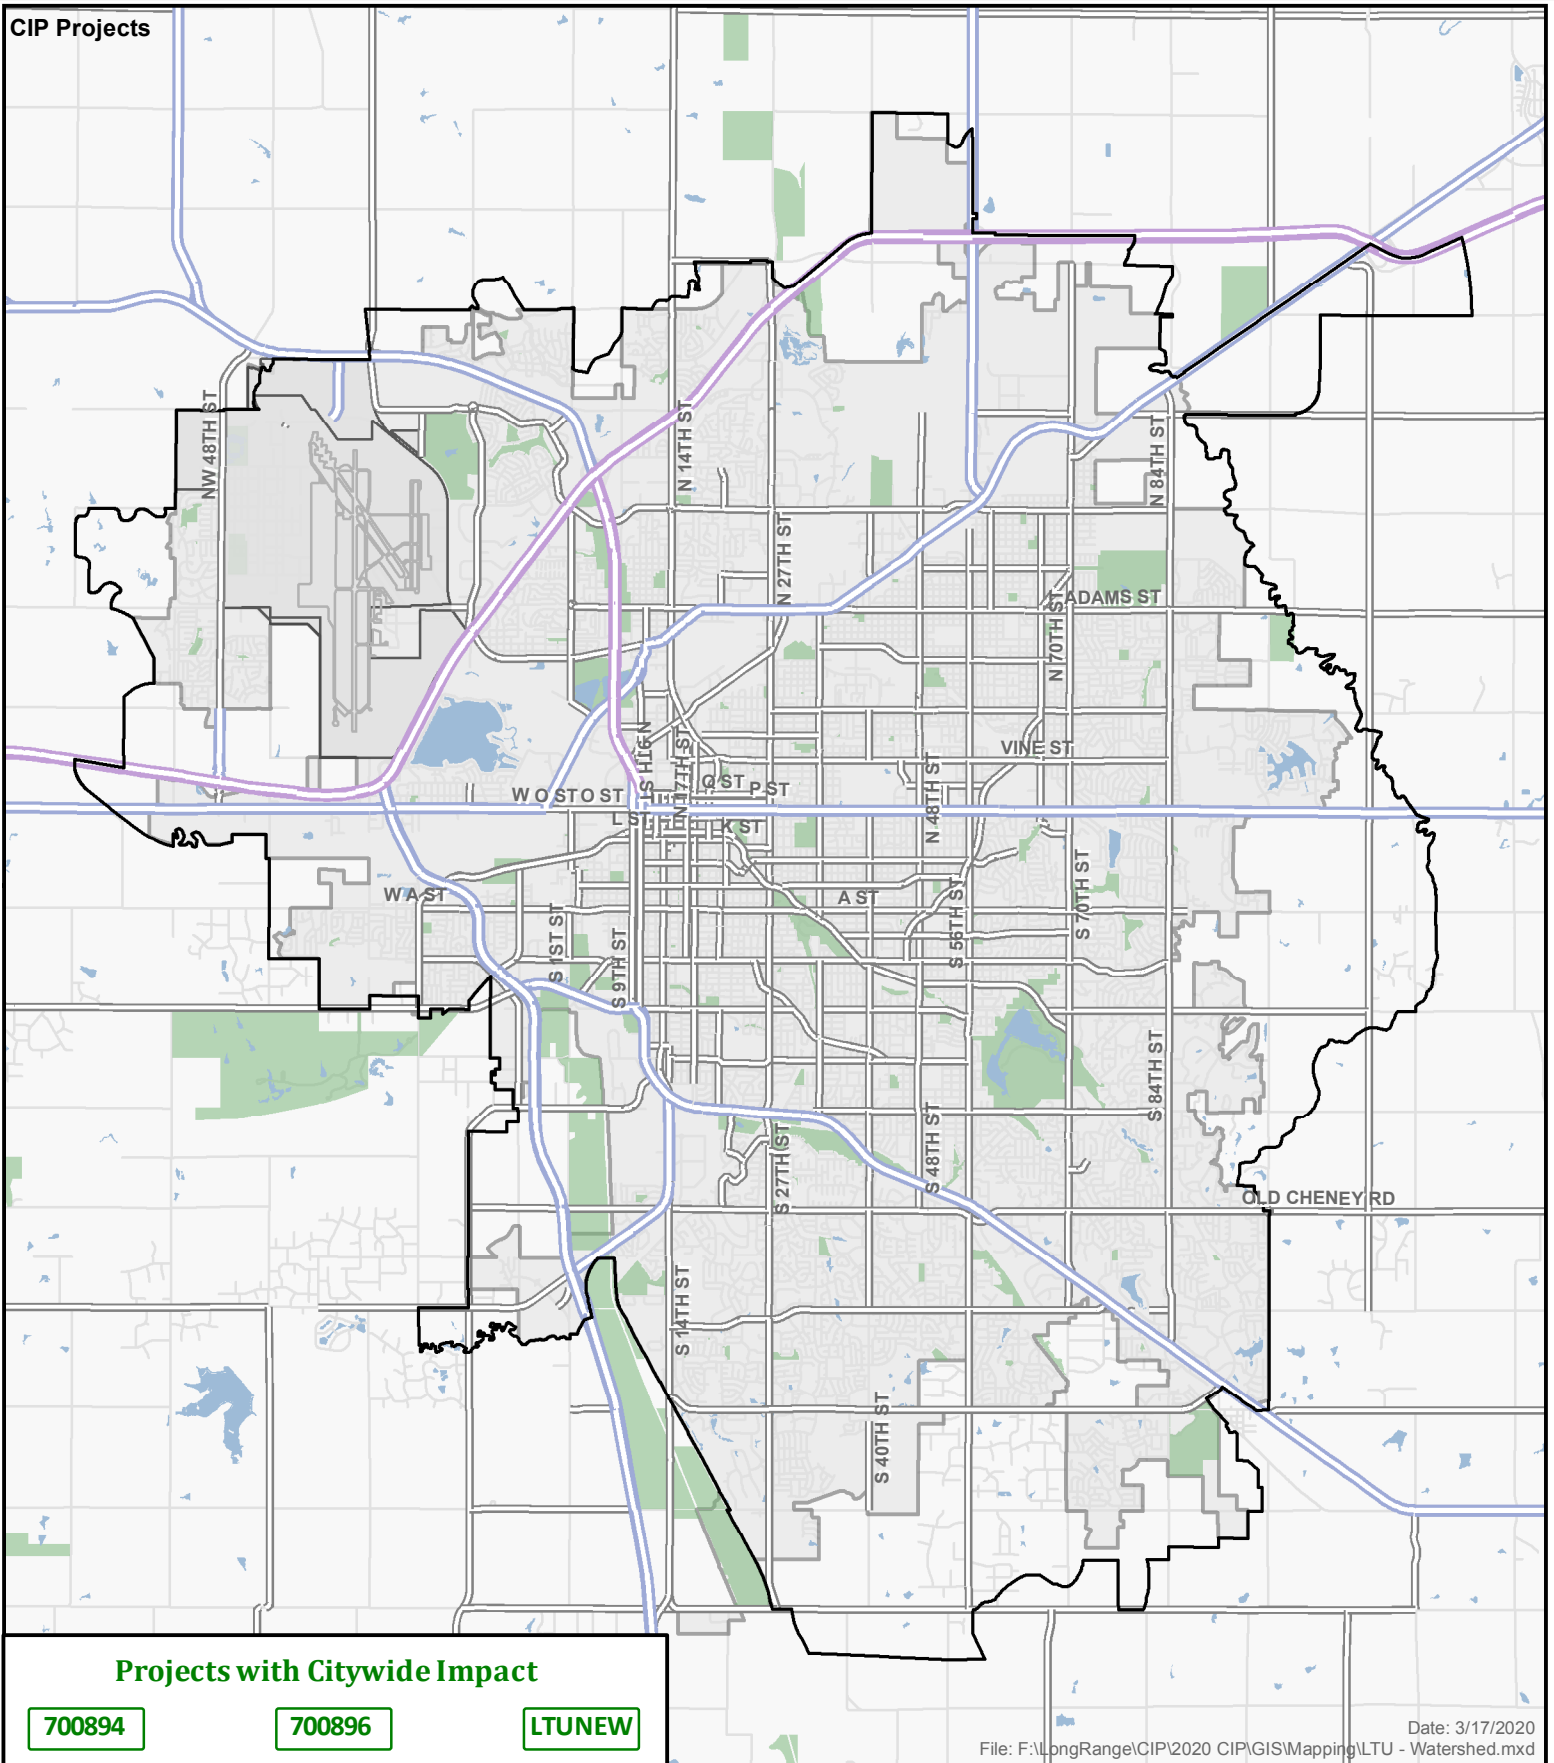

Project: Flood Mitigation							
Description:							
This program provides assistance for those areas of the City in a current floodplain or flood risk area.	Budget Outcome:				Safe and Healthy City		
	Map ID:				LTUNEW		
	Date Anticipated:				Fall 2022		
	Rating:				B		
	Status:				New		
The program is based on recommendations from the Salt Creek Floodplain Resiliency Study (projected February 2020 completion date), as well as from future studies and programs currently underway (City of Lincoln Floodplain Mitigation Master Plan, Sustainability Working Group).	Comp Plan Conformity:				In Conformance With Plan		
Funding to be used for ongoing support of the City’s Community Rating System (CRS). Currently the City of Lincoln has a CRS rating of 5 which provides a 25% reduction in flood insurance for property owners in the federally designated floodplain that have flood insurance.							
Funding will also be used to develop and implement recommended nonstructural programs such as: voluntary buyouts, conservation easements, setbacks and riparian preservations, cost share for low impact developments, cost share for reducing flood risks to individual homes/businesses on a voluntary basis (e.g. dry and wet flood proofing, structural and mechanical elevation), and public outreach regarding purchase of flood insurance and awareness of flood risks.							
Project Total: \$ 400,000				Prior Appropriations: \$ -		Costs Beyond:

Project: Stream Stability and Revitalization								
Description:								
<p>This project is for the stabilization and revitalization of streams to reduce safety threats to the public and reduce damages to property and infrastructure adjacent to streams.</p> <p>These projects are for public urban areas (e.g. Parks) that experience known and on-going stream bank and bed issues. It is also for agricultural areas to reduce ongoing environmental degradation to stream and riparian corridors, and hydraulic structures (bridges and culverts) and prior to developments to protect susceptible stream banks to prevent future and more costly damage after development occurs.</p> <p>Types of projects include scour protection, grade controls, composite revetments, bank and toe armoring, bank stabilization, re-vegetation, plunge pools and similar type of stream stability practices.</p> <p>Many of these projects are cost shared with the Lower Platte South Natural Resources District (NRD), with the NRD taking the lead on projects involving major streams per a 1965 agreement (e.g. Salt Creek & Tributaries, Beal Slough, Haines Branch, Antelope Creek, Deadmans Run, Stevens Creek, Lynn Creek, Middle Creek). Projects are coordinated where appropriate with the Parks and Recreation Department and Lancaster County.</p> <p>Examples of projects to include may be Parks projects (e.g. Porter Park, Trendwood Park, Rudge Park, North Lights Greenway, ECCO Park) and those from Watershed Master Plans especially those within the city limits or Comprehensive Plan Tier 1 areas (e.g. Stevens Creek #14, 15, 16 and 19, Little Salt Creek #12, Salt Creek #1 and 6, Oak Creek #1 and 2).</p>				Budget Outcome:		Safe and Healthy City

Project: Urban Drainage								
Description:								
<p>This project provides for rehabilitation, enhancements, replacements and new urban storm drain systems in established urban areas for the improvement of urban drainage systems to aid in protecting life and property, and for improving stormwater quality to local streams and lakes.</p> <p>The City has over 640 miles of storm drain systems, open channels, thousands of storm drain manholes and related storm drain items. Known records date back to the early 1900's with the oldest recorded install date of 1888. The City has a state and federally mandated stormwater permit that includes requirements for the improvement of stormwater quality in urban runoff.</p> <p>Projects are coordinated with the Traffic Division of Lincoln Transportation and Utilities to avoid traffic and street disruption multiple times over a short period. Projects are prioritized based on information from previous studies (e.g. Watershed Studies), know problem areas and information from city staff and the public. Stormwater quality projects are coordinated with Lower Platte South Natural Resources District and others (e.g. Parks, private entities) as appropriate.</p> <p>Examples of projects to include may be those such as urban storm drain projects in the areas of 10th & Park, 11th & Harrison, 63rd & Aylesworth, 24th & E, 15th & Dodge, 68th & Fremont, 41st & J, SW 13th and B, and so on.</p>				Budget Outcome:		Safe and Healthy City

Project: Watershed Studies								
Description:								
<p>This program provides information on localized and riverine flooding risks, to assist in identifying capital projects to increase public safety and reduce property damage (e.g. minimize exposure to the public on flood risks). Accurate flood risk mapping provides better known flood risks and assists in preventing future developments/structures from being put in a flood risk area.</p> <p>Approximately 25 percent of the city’s existing storm drain systems (open, closed, detention) have been evaluated based on current day standards. This funding request is for the continuation of an on-going watershed subbasin evaluation program to identify storm drain deficiencies for future drainage capital projects and prioritize stormwater expenditures for Urban Drainage. Storm drain records will be concurrently updated for those watershed subbasins that are evaluated.</p> <p>The current FEMA flood maps were based on information from the late 2000’s and generated from 1960’s rainfall data and at that time up to date stream records. This funding request is to update the FEMA maps based on national best practices rainfall records (NOAA Atlas 14) and updated stream records. It is planned to map the standard 100 and 500-year food maps as well as projected future flood map based on climate modeling. Concurrent with an update to the FEMA flood maps will be an update to the City of Lincoln Watershed Master Plan.</p>				Budget Outcome:		Safe and Healthy City

Project: Downtown Public Improvements								
Description:								
These General funds provide for the repair and replacement of key streetscape elements within downtown's public ways and spaces. Qualified repair and replacement elements are to include street trees, shrubs, ornamental grasses, perennial plantings, site furnishings and other amenity elements, ornamental lighting, wayfinding signage/graphics, hardscape paving surfaces, and bike lane facilities and markings. They also provide for the enhancement and activation of existing downtown streetscapes through the incorporation of new streetscape amenities. Project: Parking Meters								
Description:								
These funds provide for the purchase of multi-space parking meters for use in surface parking lots and on-street. It is anticipated that a total of 55 multi-space units will be needed in the Telegraph District and to complete the installation on the City streets of Innovation Campus. Parking Services is also planning to replace 900 antiquated coin-only single space parking meters. The majority of these old parking meters will be replaced with multi-space meters by installing the pay stations in the downtown core and shifting existing credit-card enabled meters to new locations. Project: Parking and Revenue Control Equipment									
Description:									
The funding for this project is to acquire new parking and revenue control equipment for eleven City-owned parking garages. The implementation of the command center based operational model requires that Parking Services update its existing parking and revenue control equipment from the current Amano McGann equipment to a system that allows us to integrate all of our parking service providers into a single control system. This will offer customers a full range of payment options, such as Apple Pay, Google Pay, Passport, credit card, decrementing value card, or cash. Equally important updating the equipment will allow Parking Services to integrate with local hotels as they implement their "digital key" option. Most hotel chains expect to have their digital key system fully implemented by 12/31/2020. Without an equipment upgrade it will not be possible for Parking Services to match that deadline. Project: Parking Garage Wayfinding and Signage									
Description:									
<p>These funds provide for the creation of a sign standards manual, design of new wayfinding, identification and informational signs for all parking garages. These funds will also provide for the fabrication and installation of all signs. Additionally, these funds will be used to create or acquire software that will provide customers with the ability to determine the closest available parking resources to their potential destinations.</p> <p>The goal is to create a system of wayfinding that allows a customer to select a destination, identify the closest available parking option, be directed to that option, and be informed of pricing and payment options. If a public parking garage is selected the customer will be presented with, upon entry, both static and dynamic signs directing them to available parking spaces.</p> <p>A secondary goal is to install dynamic signs in the first floor elevator lobbies of all public parking garages which will display current information about parking rules, products, and conditions. Information about future events affecting parking conditions will also be displayed. Parking Services would like to work with other departments to develop appropriate messaging for their benefit, as well.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Operations Command Center Support									
Description:									
<p>These funds provide for the purchase of the cameras, software, and server hardware to continue the expansion of the command center - based operational model adopted by Parking Services. The command center staff currently has access to 204 camera views that allow them to observe activity within all thirteen parking garages operated by the City. Additional cameras will be installed in the Eagle Parking Garage upon the completion of the renovation of that facility, as well as the new Block 4 parking garage on which construction will start in April 2020. All existing surface parking lots will have cameras installed as part of this project.</p> <p>Parking Services will also be identifying areas of coverage within each of the parking facilities where camera installation will assist in improving customer service and enhancing customer security. The increasing number of cameras will require continual upgrades to the software and hardware to meet the video management demand.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Structural Repair/Maintenance of Parking Garages										
Description:										
<p>These funds provide for the continuing process of structural repairs and maintenance on the parking garages. Parking Services is committed to maximizing the useful lifespan of all existing parking facilities. These facilities range in age from the Center Park Garage, which opened in 1978 (42 years), to the Lumberworks Parking Garage, which open in 2014 (4 years). As the oldest parking facility, the Center Park Garage requires a higher level of inspection and maintenance. Cornhusker Parking Garage (37 years) and University Square Parking Garage (34 years) are also facilities which will require increased maintenance due to the age of the structure.</p> <p>Parking Services contracts with a qualified structural engineering firm to assess the structural integrity of each parking garage and develops a project list of concrete repair, waterproofing, and other tasks which are designed to correct any identifiable deficiencies before they impact safety and structural longevity. The cost of the structure inspection, development of project specifications, and construction administration is also included in this project.</p>						Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Urban Development Livable Neighborhoods										
Description:										
<p>Livable Neighborhoods is a commitment to improving and maintaining strong, vibrant neighborhoods. In conjunction with Lincoln Transportation and Utilities, Parks and Recreation, and Urban Development, this project provides funding to further that commitment.</p> <p>CDBG funding is provided for planning and design, preliminary engineering, and construction of improvements in the public ROW, and other measures resulting in Livable Neighborhoods such as park improvements, trails, and street trees.</p> <p>A multi-departmental committee identified the South of Downtown area (parts of the Everett and Near South neighborhoods) as the first focus area. Located between 10th and 17th, A and L, the City is partnering with the South of Downtown Community Development Organization (CDO) and its stakeholder committees to complete a Redevelopment Plan and Strategic Plan that will identify specific projects for implementation. Community Conversations (open houses) continue to provide an opportunity for residents' input and involvement. Consistent with the Vibrant City Economy and Quality of Life outcome, these strategies and projects will improve safety and provide a healthier environment for residents by removing blight and thus reducing neighborhood nuisances and conflicts.</p> <p>Previous efforts on 11th Street, A to J, in the heart of the project area, improved sustainability and set the course for additional projects in this area. The construction of bio-swales at intersections improved water quality; pedestrian LED lights are energy efficient and increase safety; bike lanes and intersection bump-outs have increased walkability and bikability creating a pedestrian friendly corridor and improvements promoting healthier lifestyles.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Affordable Housing								
Description:								
<p>Assist Low Income Housing Tax Credit projects or affordable housing projects in low-income census tracts and adjacent tracts. Source of funds is the Turnback Tax Fund. State statute allows 10% of the funding from the Turnback Tax to be dedicated to low income housing if funds are not currently needed for the purposes described in Neb Rev. Stat. Section 13-2604. In Lincoln, this statute applies to funding for the Pinnacle Bank Arena.</p> <p>The Livable Neighborhoods Division of Urban Development works to increase safe, affordable housing, support neighborhood vitality, and address homelessness issues. Continuing to provide and sustain safe, quality, affordable housing options for lower-income households to improve quality of life for all of Lincoln’s residents is essential to the Department’s mission. The City is in the process of completing Lincoln’s Affordable Housing Coordinated Action Plan that will guide the use of Turnback Tax funds for specific projects, in conjunction with fees paid for Tax Increment Financing (TIF) funded projects.</p>					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Haymarket South Streetscape/Parking								
Description:								
The Haymarket South Streetscape/Parking Project is located largely between N and J Streets and 6th and 9th Streets in Downtown Lincoln. This project was created with the 8N College Housing TIF subproject. The goals of the project are to address parking, pedestrian, bicycle, and vehicular circulation and connectivity, contextual placemaking, collaboration with other public and private improvements, and the resiliency of the district. The project area is in the Lincoln Center Redevelopment Plan Area and overlaps with the South Haymarket Neighborhood Plan, a subarea of the Lincoln Lancaster County Comprehensive Plan, as well as the South Salt Creek Neighborhood. The Project Area is adjacent to the future South Haymarket Park, as well as private redevelopment projects that include West Haymarket Block 4, Telesis/Dairy House, and other potential projects. The Project is currently in the design phase with the construction of the first phase of street, streetscape, and parking improvements expected to start in 2021. Future phases will be dependent upon availability of funding and public/private partnerships.					Budget Outcome:		Vibrant City Economy and Quality of Life

Project: Downtown Entryways Redevelopment Project								
Description:								
The Downtown Entryways Redevelopment Project is located largely between 10th and 28th Streets, and P and N Streets, as well as the blocks between 9th Street and 10th Street and S to M Streets, including adjacent alleys and rights-of-way in Greater Downtown Lincoln. TIF funds will be used to address key entrypoints into Downtown, enhance the O Street Streetscape, improve high priority intersection crossings on 9th and 10th Streets, and improve area alleys. The Project Area is in the Lincoln Center, Antelope Valley, and North 27th Street Corridor and Environs Redevelopment Plan Areas and overlaps with the South Haymarket Neighborhood Plan, a subarea of the Lincoln Lancaster County Comprehensive Plan. Several neighborhoods will be impacted by the new district improvements: South Salt Creek, Haymarket, Downtown, Hawley, Hartley, Malone, and Woods Park Neighborhoods. The Project is a Catalyst Project in the Downtown Master Plan, titled “Enhance the Front Door to Downtown.” The Project Area also overlaps with Downtown Master Plan Catalyst Projects like the Downtown Music District, Downtown Cultural District, Pershing/Community Commons Project, 11 Street Greenway, and numbered two-way streets improvements, as well as current and potential private redevelopment projects that include 9th and O Street, LES Building Reuse, Gold’s Redevelopment, Willy’s Knight Redevelopment, and other potential projects. The Project is currently in the planning phase with the design expected to start in fall of 2020. Phases will be dependent upon availability of funding and public/private partnerships. Project: West O Entryway Project								
Description:								
The TIF funds for this project are intended to address aesthetic and functional improvements on West "O" Street between the Harris Overpass and Northwest 56th Street. Proposed right-of-way improvements include street trees and other landscaping, gateway and monumentation elements, sidewalk and trail connections, improved public transit facilities, crosswalks, site furnishings, and banners or other branding enhancements. The project goal is to create a more vibrant, welcoming and functional streetscape that will serve to stimulate private reinvestment along this major entryway corridor.
