

LABORER II

NATURE OF WORK

This is routine laboring work of a semi-skilled nature.

Work involves the efficient and responsible performance of work of a more difficult nature than the Laborer I requiring manual skills or special knowledge acquired through on-the-job training or experience. Duties may be performed as a crew member or individually. Employees of this class are expected to use judgment and discretion in carrying out known work methods and procedures. An employee in this class may be asked to drive and operate equipment with the percent of work time spent on equipment operation being less than 50%. If equipment operation is the deciding factor as to the classification of the employee, the actual percent of time spent on equipment operation must be greater than 30% and less than 50%. Employees in this class may act for the supervisor in his absence. Work assignments are received through written and oral instructions and are inspected in progress or upon completion. Supervision is received from a technical or an administrative superior. Supervision may be exercised over subordinate employees.

EXAMPLES OF WORK PERFORMED

Operates small power rodding machine used in cleaning and unclogging storm sewer lines, storm sewer manholes and storm sewer catch basins; assists other personnel in laying storm sewer and water lines and building manholes for storm sewers.
