Outdoor Water Conservation Tips

Water your lawn deeply once a week.

Check your sprinkler system. Set it to water once or twice a week.

“Don’t set and forget” your irrigation system. Turn it on only when watering is needed.

Water in the early morning hours for best results.

Adjust mower blades to 3” to 3 1/2” to help keep moisture in your lawn’s soil.

Be weather-wise. Don’t water if rain or wind is forecasted.
