Capital Improvement Program FY 2021/22 – 2026/27

Lincoln City
Libraries

## Project: **Replace Bennett Martin Library**

## Description:

The Bennett Martin Public Library, 136 S. 14th Street, has served the City of Lincoln well for more than 55 years. It was a cultural anchor in downtown Lincoln and served the needs of a diverse community of users. Over the past several years, the role and services provided by public libraries have evolved considerably and the current building no longer serves a quality community such as Lincoln. This project has been included in the CIP since 2006 as a result of the 2003 Space Needs and Facility Study and the Library Board taking action to replace the facility rather than remodel. The Main Library Vision and Concept Study completed in 2012 provides a estimated cost for such a building, which has been confirmed by additional analysis by staff and consultants. If this project does not move forward, considerable deferred maintenance project costs will be incurred.

Activity type

Libraries of today reflect the shift away from building collections to building humar capital, relationships and knowledge networks. This trend, in combination with the goals set in the Library's Strategic Plan, was the basis for the Facilities Plan adopted by the Library Board in 2015 and revised in 2019. We need to improve the spaces that we provide to children by creating areas in all libraries that excite children's imaginations and support effective learning by including developmental play opportunities through furnishings and more permanent installations. A variety of projects will freshen, update, and rearrange the interiors of our facilities to meet the needs of an innovative and vibrant city. Additional square footage would be adde to Anderson and Bethany branch libraries. Converting to Radio Frequency Identification (RFID) tags would allow borrowed and returned items to be processe as a group rather than handling items one-by-one. With over three million checkouts per year, this would greatly improve library efficiency, increase accuracy and save time for library customers. RFID requires an up-front investment for tags and equipment. Sorters, which check in and sort materials, would be installed at three of the busiest branch libraries. Smart Chutes, which check in materials immediately when deposited in outside book drops would be installed at all locations. Recommended funding source is General Obligation Bonds. If General Obligations Bonds are not approved, these project will be requested in future years **Project Total:** 8,200,000 Prior Appropriations: 0
