- (B) Operational Limits for Area Sources. Area sources subject to a standard adopted by reference in paragraph (A) of this section and specifically referenced in this paragraph may accept operational limits to avoid the requirements associated with operating at the source’s maximum design capacity or monthly throughput.
- (1) General Provisions. An owner or operator of a source may apply for coverage under this provision if the following criteria are met:
 - (a) The Director has established operational limitations for the industry category in paragraph (B)(6) below.
 - (b) The responsible official for the source certifies that it will comply with the applicable paragraph(s) of this section.
 - (c) Records are collected and maintained as described for each applicable paragraph and retained for a period of not less than five (5) years and made available to the Department for review upon request.
 - (d) A source may change its status under paragraph (B)(6) below without violating this rule by meeting the following requirements:
 - (1) The owner or operator of the source must provide written notification to the Department of the intent to change status. The notification must be certified by the responsible official for the source.
 - (2) The source must comply with the requirements for its industry category.
 - (2) Approval Procedures.
 - (a) Notice of Intent. The owner or operator of a source intending to be covered under this provision shall submit a complete Notice of Intent Form provided by the Department.

- (b) Department Approval. Department approval of the Notice of Intent Form request shall be in writing. Upon approval, the source must comply with the applicable limitations specified in paragraph (B) of this section.
- (3) Duty to Comply. Each source approved for coverage under this provision must comply with all paragraphs of this section applicable to the source. Any non-compliance shall constitute a violation of the LLCAPCRS and the Act, and is grounds for enforcement action and/or for disapproval of the Notice of Intent to operate under this provision.
- (4) Compliance with Other Applicable Requirements. Compliance with the provisions of this section does not shield the owner or operator from the duty to comply with any other applicable requirement under the LLCAPCRS or the Act not specifically addressed in this section.
- (5) Duty to Provide Requested Information. Additional information, such as an annual emissions inventory as required by Article 2, Section 6, or information necessary to determine applicability or to determine that emissions from the source in conjunction with all other sources will not prevent attainment or maintenance of the ambient air quality standards specified in Article 2, Section 4, must be provided upon Department request.
- (6) Industry Categories Eligible to Accept Operational Limits.
 - (a) A bulk gasoline terminal subject to 40 CFR Part 63, Subpart BBBBBB (NESHAP for Gasoline Distribution Bulk Terminals, Bulk Plants, and Pipeline Facilities at Area Sources), with a maximum calculated design throughput capacity greater than or equal to twenty thousand (20,000) gallons per day, may be approved to operate pursuant to the provisions of paragraph (B) of this section if the owner or operator certifies that the source will comply with paragraphs (B)(1) through (B)(5) above and each of the following:
 - (1) Limit actual gasoline throughput to less than twenty thousand (20,000) gallons per day; and
 - (2) Maintain a daily record of actual gasoline throughput, in accordance with the provisions of paragraph (B)(1)(c); and
 - (3) Comply with the requirements specified in 40 CFR Part 63, Subpart BBBBBB for bulk gasoline plants with a maximum design throughput capacity of less than twenty thousand (20,000) gallons per day.
