	Since the public acquisition of the Lincoln City Lines in 1971, StarTran has been providing efficient, convenient and economical public transportation services. The services provided comply with the current 2040 Long Range Transportation Plan - 2016 Update. Previous capital improvement programs have included equipment essential in StarTran's provision of services. The FY 2022-2025 TIP describes capital items which will afford the opportunity for continued improvement of StarTran services. Future years include continued replacement of StarTran transit vehicles and purchase of associated equipment/items.								
1	Purchase / Financing of Full Size Buses and Related Equipment A phased purchase of full-size replacement transit buses is identified as follows:								
	Buses Purchased         Funding Accumulated         Potential Replacement         Delivery           14         FY 2020-21 through FY 2021-22         14-2006 Gillig Buses         CY2022								
	FTA requires that full-size transit vehicles have a twelve-year economic life, although StarTran typically operates buses more than twelve years before replacement. All of the current buses being replaced as indicated above will have exceeded the required twelve years of operation. An analysis of the structural and engine conditions of the StarTran fleet is conducted annually, which is utilized to develop the replacement schedule of StarTran buses. The above phased bus replacement schedule is in compliance with the most recent analysis and bus replacement program.

11	Predictive Maintenance Predictive maintenance will extend the life of buses, reduce capital costs, reduce operating costs, reduce inventory costs, and most importantly will reduce service disruptions due to mechanical failures. A predictive maintenance program identifies when parts will fail and then schedules these parts for replacement before they fail. To begin the program additional maintenance is needed up front. Software then determines when parts should be replaced.	TOTAL	200.0 F 50.0 S 250.0	A	0.0	0.0	0.0	0.0	0.0
