## Capital Improvement Program

FY 2022/23 — 2027/28

## Lincoln Transportation & Utilities

- Solid Waste Operations
- StarTran
- Transportation
- Wastewater
- Water Supply & Distribution
- WatershedManagement

Watershed Management is responsible for administering the Municipal Separate Storm Sewer System Permit under the Clean Water Act. It also reviews development plans, drainage projects and oversees capital projects

This administration is funded by General Funds.

Capital Improvement projects are primarily funded by voter approved General Obligation Bonds.

Project: Stream Stability and Revitalizat	ion							
Description:								
This project is for the stabilization and revitalization of streams to reduce safety				Budget Outo	come:	Safe and Hea	Ithy City	
threats to the public and reduce damages to property and infrastructure					ated:	Fall 2023		
				Rating:		В		
-						Ongoing		
These projects are for public urban areas (e.g. Parks) that experience known and on-going stream bank and bed issues. It is also for agricultural areas to reduce ongoing environmental degradation to stream and riparian corridors, and hydraulic structures (bridges and culverts) and prior to developments to protect susceptible stream banks to prevent future and more costly damage after development occurs.					Conformity:	Generally Co Plan	nforms with	
Types of projects include scour protection, grade controls, composite revetments, bank and toe armoring, bank stabilization, re-vegetation, plunge pools and similar type of stream stability practices.								
Many of these projects are cost shared w Resources District (NRD), with the NRD to major streams per a 1965 agreement (e.g Haines Branch, Antelope Creek, Deadman Middle Creek). Projects are coordinated w Recreation Department and Lancaster Co	iking the lead . Salt Creek & ns Run, Steve where approp	d on projects Tributaries, ns Creek, Lyr	involving Beal Slough, nn Creek,					
Examples of projects to include may be P Trendwood Park, Rudge Park, North Light from Watershed Master Plans especially Comprehensive Plan Tier 1 areas (e.g. Ste Salt Creek #12, Salt Creek #1 and 6, Oak C	s Greenway, those within evens Creek # reek #1 and 2	ECCO Park) a the city limit †14, 15, 16 and ).	nd those s or

Project: Watershed Studies								
Description:								
This program provides information on localized and riverine flooding risks, to assist in					me:	Safe and Healthy City		
identifying capital projects to increase public safety and reduce property damage (e.g.				Date Anticipa	ted:	Fall 2023		
minimize exposure to the public on flood risks). Accurate flood risk mapping provides				Rating:		A		
better known flood risks and assists in preven	iting future de	velopments/st	tructures	Status:		Ongoing		
from being put in a flood risk area.					onformity:	In Conformar	nce with Plan	
Approximately 25 percent of the city's existing storm drain systems (open, closed, detention) have been evaluated based on current day standards. This funding request is for the continuation of an on-going watershed subbasin evaluation program to identify storm drain deficiencies for future drainage capital projects and prioritize stormwater expenditures for Urban Drainage. Storm drain records will be concurrently updated for those watershed subbasins that are evaluated.  The current FEMA flood maps were based on information from the late 2000's and generated from 1960's rainfall data and at that time up to date stream records. This funding request is to update the FEMA maps based on national best practices rainfall records (NOAA Atlas 14) and updated stream records. It is planned to map the standard 100 and 500-year food maps as well as projected future flood map based on climate modeling.								
In addition, the City of Lincoln Watershed Master Plan will be updated to reevaluate the Capital Improvement Projects and reassess the stream conditions to determine if additional projects are needed.								
Finally, an environmental impact analysis of development on the upper watershed of Salt Creek within the planning horizon of the 2050 Comprehensive Plan will be completed using general revenue.
