Opportunities & Challenges

National Best Practice Models
There is a great deal of research available on national best practices and data-based decision making. Lancaster County would be better served by utilizing this information available from other jurisdictions and the National Association of Counties.

Nebraska Legislature
Decisions made by the Legislature on everything from justice reform to infrastructure financing affect the County. It is important to continually educate State Senators about Lancaster County’s issues and monitor legislative bills for potential impacts. Focusing in on legislative priorities that have been held over from year to year and moving into the future to create legislation in partnership with our lobbyist that benefit the residents of Lancaster County will be a challenge for the new CAO.

Management Turnover
As baby boomers age, Lancaster County is seeing significant turnover among elected officials, department directors, and senior leadership. The development of a management level on boarding program would be advantageous for the County’s new employees, along with creation of a meaningful metric for department director evaluations.
Moving the County Forward
Working with staff, the Board & elected officials to modernize operations and move the County forward into the future will be a priority. The selected candidate must have the ability to help address the needs of a growing and changing County, especially aging infrastructure and increasing population in jail, and will strive to continuing to build relationships and increase partnerships/collaboration with other elected officials.

Diversification of Revenue
Lancaster County can no longer be dependent upon property taxes alone. Efforts to move toward a more "fee based" system would require a statutory change but would allow costs to be paid by those utilizing the service.
